Asea Brown Boveri France launches five-year plan to create jobs

By John Ridding in Paris

FRANCE yesterday launched a five-year plan to create jobs by reducing taxes on employers and increasing the flexibility of the labour market, but leaving the social security system intact.

Rising unemployment, which cur-rently stands at 11.6 per cent of the workforce and is forecast to reach 12.5 per cent by the end of the year, is one of the biggest problems facing Mr Edouard Balladur's centre-right RPR-UDF coalition government. Reducing unemployment is seen as central to the hopes of the conservative parties in the 1995 pres-idential election. Mr Michel Giraud, the

point plan, said it was aimed at addressing the structural problems of the French labour market. It would cut the costs of hiring workers, encourage part-time employment and ease rigidities in working practices.

The principal measures include the transfer from employers to the government of social security charges for Prance's lowest paid workers. The transfer is expected to include employees earning up to 1.5 times the minimum wage of about FFr5.900 (3996)a month.

The plan also proposes the replacement of the 39-hour working week with an equivalent annual total to improve

industry and cut overtime payments.

Under the proposals, part-time workers will be able to increase the number of hours they work while receiving state benefits. The system of apprenticeships and training will be devolved to local

government organisation But the measures stopped short of reforming the minimum wage, or salaire minimum de croissance (Smic), regarded by industrialists as an important obstacle to employment. Mr Balladur said last week he would not use "the pretext of economic crisis to reduce the protection

of the least advantaged" The measures were also limited by

ket analysts estimated that transferring social security payments to the state would cost about FFr4.8bn this year and more than FFr100bn for the five-year period. The government has forecast a budget deficit for the current year of FFr317bn. But private sector economists. such as Mr Jean-Francois Mercier at

will be closer to FFr350bn. Economists in Paris said the plan was unlikely to have a rapid impact on the level of unemployment. "They are right to address structural issues," said one economist at a French bank, "but the

Salomon Brothers, predict the deficit

higher for several months vet

The stagnant state of the French economy was illustrated yesterday by industrial production figures which showed output in June had declined by 0.2 per cent from May and that second quarter production was 0.3 per cent below the first quarter.

Union leaders, who will discuss the plan with Mr Balladur next month, expressed opposition to the proposals. Mr Marc Blondel, general secretary of Force Ouvrière, described them as "dangerous". But the government's large majority in parliament suggests that sig nificant alterations are unlikely.

Fed intervenes to stem yen's rise and lift dollar

Patrick Harverson in New York and Gordon Cramb in Tokyo

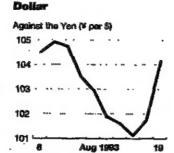

THE US monetary authorities yesterday dramatically reversed the yen's powerful rise by inter-vening in the foreign exchange markets and buying the dollar. The move took currency dealers by surprise.

Four interventions by the New York Federal Reserve Bank trig-gered a sudden surge in the dol-lar which earlier this week had looked set to fall through the Y100 level. The New York Fed conducts open market operations for the US central bank. The intervention pushed up the

value of the dollar by nearly 4 per cent in four hours. Shortly after the London close yesterday, the dollar was trading at Y105.10, having been at Y101.20 earlier in the day. The move was a substantial one, even by recent currency market standards. The Fed's intervention will sur-

prise and gratify the new Japa-nese government, which has said for the past week that it would like central banks from other Group of Seven industrialised countries to help stem the yen's rise. The Bank of Japan bought dollars again earlier yesterday in the Tokyo market, but until now has felt friendless. Mr Morihiro Hosokawa, sworn

in as prime minister last week, spoke by telephone to President Bill Clinton during the day.

Among the issues they discussed was the continuing high level of Japan's trade surplus with the US, which analysts in Tokyo thought would militate against any effort by the west to ease the resultant plight of Japanese exporters. The countries are to hold bilateral trade talks next

In the US, Mr Lawrence Summers, the treasury underaffairs, said the US was "concerned that the recent rapid rise in the value of the Japanese yen could retard growth in the Japa-Without the intervention, it is

likely that the yen would have continued to rise in the wake of news that the US trade deficit had widened to \$12.06bn in June, the widest monthly trade gap since October 1987. Some analysts said the intervention, the first by the US in three months.

may have been part of a covert deal between the US and Japan

which is yet to be unveiled. Some Wall Street analysts guessed that the Fed's action was linked to a cabinet meeting in Tokyo yesterday which pledged to introduce another fiscal stimulus in the Japanese economy in the autumn. Mr Joe Taylor, a currency analyst with Technical Data, a market analysis group, said: "Possibly, the Japanese gave some sort of assurance to the Clinton administration that the structural impediments to a healthy trade relationship would

Another interpretation was that, while Washington and Tokyo were still willing to let the dollar fall against the yen, they were concerned about the speed of the recent decline. An analys at one of the largest US securities houses said: "I think the intervention is a gesture to the markets, a signal that everyone too aggressively. It's a dampen-

Yesterday's intervention prompted investors to sell Japanese government bonds in the belief that a weaker yen would reduce the chance that the Bank of Japan would cut the official discount rate.

Barclays chooses non-banker Taylor as chief executive

By John Gapper in London

BRITAIN'S Barclays Bank yesterday ended a year of contro-versy over its senior management by reaching outside the banking industry for a new chief executive, appointing Mr Martin Taylor, the 41-year-old chairman and chief executive of Courtaulds Textiles, to the job.
In one of the most radical cor-

porate appointments in recent years, Barclays hired Mr Taylor, a former Financial Times journalist, to split the running of the largest UK bank with Mr Andrew Buxton, its executive chairman. British banks have appointed

more executives from other industries in recent years, but Mr Taylor is the first chief executive with no banking experience. Mr Buxton said his preference had been a non-banker who could bring fresh insights. The news was welcomed by shareholders who have criticised

to split the roles was announced in January. Mr Buxton said that Mr Taylor would have responsibility for running the bank's three operat-

Barclays since it was disclosed in

April 1992 that Mr Buxton would

combine the roles of chairman

new chief executive of Barclays

ing divisions, including its UK branch bank and BZW investment bank. He would retain primary responsibility for strategy and external relations.

Mr Buxton emphasised, however, that Mr Taylor would also have a large role in forming strategy. "There are bound to be some important strategic decisions over the next few years, and we will make them together," he said. intended to become non-executive chairman and seek a job elsewhere within a year. Criticism of Barclays' manage-

ment increased earlier this year when the bank disclosed that it provisions fell.

they welcomed the appointment, they wanted to know exactly what leeway Mr Taylor would have within Barclays. One investor said that it was important that Mr Taylor was given a free hand to change management.

Mr Taylor said he intended to stay at Barclays for 10 years, although he could not foresee whether he would succeed Mr Buxton as chairman. He will join the board on November 1 and become chief executive on

GERMAN prosecutors investigating allegations of industrial espionage by senior Volkswagen employees have made progress following up new clues, according to Mr Thomas Selfert, head of the economic crimes division in the Darmstadt public prosecu-

His comments yesterday fuelled speculation that the criminal probe is entering a decisive phase. Further witnesses have been

interrogated, while evidence from "top-class and important" witnesses from Volkswagen has yielded nothing to persuade investigators to call off the probe, Mr Seifert said.

The investigation is believed to have focused in recent days on reports that 11 VW trainees were instructed to punch GM following this trail," Mr Seifert

Opel asked for the launch of a criminal inquiry in late April, following the defection from General Motors to VW of Mr José Ignacio López de Arriortua, GM's global purchasing director, and several

Opel supported its suspicions with affidavits relating to missing secret data.

Volkswagen claims that no secret information has made its way into the group's possession, although it admitted earlier this month that "possible confidential" material had been destroyed on company property.
Mr Georg Nauth, official

spokesman for the investigating team, said investigations so far had confirmed testimony from Adam Opel, the German

made on July 22, linked Mr confidential data found in a Wiesbaden house.

However, Mr Nauth denied press reports that investigators had established "without doubt" that the VW trainees had copied Opel secrets into the VW database.

Mr Nauth refused to name any VW witnesses, although he said Mr López and three associates under investigation had not been interviewed yet. Mr Ferdinand Piech, VW group chairman, had not been called because he is not a suspect".

The "top-class" witnesses referred to by Mr Seifert are known to include Mr Daniel Goeudevert, a former VW director, and Mr Klaus Liesen chairman of the group's board of supervisors, who are also

A Croat offensive has prevented aid from reaching the city for 100 days, its 30,000 odd Moslem inhabitants are reportedly becoming critically short of food and water. There is Red Cross concern about detention camps near the city.

This Crost enclave faces severe this cross encave isses severe problems of overcrowding: originally supporting some 7,000 people, it is reported to have more than 20,000 refugees living in precarious conditions The UN is attempting air drope.

Gomji Vakut region Renewed fighting between Moslems and Croats has isolated many communities. After UN officials were recently attacked, aid groups say the area is becoming too dangerous to operate in.

Rexrodt seeks road to peace for car makers

By Christopher Parkes in Frankfurt

MR Gunter Rexrodt, the German economics minister, has had almost three weeks in which to reconsider his impulsive hint that he might be prepared to act as middleman in the industrial espionage row between Volkswagen and Adam Opel, the German subsidiary of General Motors.

On Tuesday night he was given food for thought in an hour-long meeting with Mr David Herman, the beguilingly mild Opel chairman. They had a "good talk" on matters of a "non-communicable nature". according to official statements. The minister will hear from VW's Mr Ferdinand Piech at a similar private session

Signs of potential misunderstandings were already apparent as this week's meetings were announced. Mr Rexrodt's office was careful to stress that the minister's aim was to gather information, while VW tried to suggest the talks were in some way a continuation of Mr Piech's own peace-making

These started with an abortive attempt to heal the breach with Mr Jack Smith, GM president, after a nasty exchange at the end of last month.

The VW chairman's suggestions at a press conference,

Piech: cold-shouldered by GM

laced with war-like, xenophobic overtones, that Opel secrets had been "planted" on his new employees and in VW computers, had earned him the riposte from CM that his ideas were grotesque and that his grasp on reason might be less than

A telephone call to Mr Smith was rewarded with the cold shoulder.

Mr Piech might communicate in writing with Mr Herman, but he had to retract his charges first, he was told. A

telephone call from Mr Piēch to Mr Rexrodt, who had appealed for more moderate language and warned against damaging Germany's international image, was the cue for

this week's interviews. Both sides, the government and other German motor makers have reason to be worried. Although it is understood Washington does not see any immediate danger to inter-gov ernmental relations, the fact that the US Justice Department has begun an investigation into the case is reason enough for concern.

Future US sales prospects for German car makers, not least VW itself, may also be at stake. BMW and Mercedes-Benz are at or beyond the point of no return on their first-ever investments in US car plants. Mr Reyrodt is also confronted by a mood approaching panic in some sectors of the domestic vehicle components industry, caused partly by VW's draconian price-cutting demands.

However much the minister may wish for calm, his halfhearted mediation offer came too late. Mr Rexrodt appears to believe that it is best if both sides agree to keep quiet and let the criminal investigations

Volkswagen pre-empted his wishes last weekend when it said it was withdrawing from the war of words.

Izetbegovic expects no quick deal

By Laura Silber in Geneva, Michael Littlejohns in New York and Chrystla

BOSNIA'S President Alija Izetbegovic yesterday dismissed hopes of a quick set-tlement to the 17-month war after the presidents of Serbia and Croatia joined talks

on the republic's ethnic partition. "I do not expect the successful conclusion of negotiations very soon," he said after almost five hours of meetings with his Serb and Croat adversaries.

His remarks came as the Serbian president, Mr Slobodan Milosevic, and his Croat counterpart, Mr Franjo Tudjman, returned to Geneva to join all-party talks, in a move which was hoped would give fresh impetus to the peace process.

Earlier Lord Owen, the international mediator, indicated he was making a final push to broker an accord "in the next few days" - although he conceded that prob-lems remained over the boundaries of the future partitions. "We've got a very real problem on the map," said Lord Owen, who hoped it could

be resolved in days. Mr Izetbegovic, a Mosiem, yesterday repeated that he would refuse to endorse any peace agreement that had not been previously approved by the Bosnian parlia-

ment, and demanded that the Serb forces lifted their siege round Sarajevo. In spite of Wednesday's agreen place Sarajevo under UN administration the siege of Sarajevo remained in place,

Mr Izetbegovic said., The United Nations yesterday confirmed that a few Serb troops remain on the strategic Mount Igman, but a spokesman said

they posed no real threat. But with the threat of air strikes now receding, a UN spokesman in New York

last night emphasised that although the UN now has the capability to use air power, this does not mean such action is imminent. That decision rested with Mr Boutros Boutros Ghali, the UN secretary general, and still had not been made, the official, Mr Joe Sills, said.

But as a sign of the diplomatic preagainst air strikes, Russian President Boris Yeltsin yesterday took credit for the fact that neither the UN nor Nato had employed force against Serbia and suggested that it may soon be possible to lift sanctions against Serbia.

"It will be necessary to reconsider the sanctions against Yugoslavia," Mr Yeltsin told a press conference in Moscow, if current negotiations "continue to proceed normally". Russia, a traditional ally of Serbia, has repeatedly indicated in recent weeks that it was uneasy about the threat of air strikes.

Oil companies resume Azeri talks

By Deborah Hargreaves

NEGOTIATIONS have re-opened in London between eight foreign oil companies and officials from Azerbaijan over a \$9bn oilfield development in the Caspian Sea. The Azeri government is understood to have agreed that the project be discussed as a joint development between the companies rather than holding separate negotiations for the three fleids, estimated to contain 4.5bn barrels of oil.

The talks had been put on ice during the political umbeaval in Azerbaijan in June

Azerbaijan vesterday announced that Armenian forces captured the strategic southern city of Cebrayil and were within striking distance of the Iranian border, writes Chrystia Freeland in

If the Armenian forces - pushing down from the disputed enclave of Nagorno-Karabakh - reach the border they will cut off a buse swathe of southern Azerbatian. According to a statem released by the Azeris, Armenian forces are advancing toward the town of Goradiz, just 5km from Iran. Armenia's capture of Cebrayil is the most recent in a series of Armenian victories.

when the republic's leader, Mr although the companies had Abulfaz Eichibey, fled the capi-tal and was replaced by Mr in New York in the interim. Gaidar Aliyev, an official from the Brezhnev era. Mr Aliyev officially relaunched the negotistions 10 days ago in Baku, must still be finalised. The

NEWS IN BRIEF

Yeltsin renews push for early elections

By Chrystia Freeland in Moscow

THE Russian president, Mr Boris Yeltsin, yesterday stepped up his campaign to force parliamentary elections, announcing a two-month strategy to oust the existing, conservative legislature. At a press conference held to celebrate the second anniversary of the failed coup. Mr Yeltsin said parliament was blocking the economic reforms made possible by the victory of pro-Yeltsin

forces in August 1991. But Mr Rusian Khasbulatov, chairman of parliament and one of Mr Yeltsin's most bitter opponents, vowed that early autumn elections will not take place. The existing Russian constitution makes no provisions for calling a poll before the current legislature's mandate expires in 1995.

Ukraine's currency plummets

The Ukrainian currency yesterday plunged in value against the dollar, plummeting to less than one-third of its previous value, writes Oleh Mamaiev in Kiev.

Officials attributed the devaluation at the central bank's hard currency auction as a reaction to new regulations which oblige Ukrainian exporters to sell 50 per cent of their hard currency earnings to the government at the fixed rate of 5.970 coupons to the dollar. Western economists believe the Ukrainian economy moved into hyper-inflation in June. In yesterday's trading the Ukrainian coupon fell to 19,050 against the dollar, from last

Hungary shows signs of recovery

Hungarian industry is showing the first signs of recovery after four years of recession and stagnation, according to government figures published this week, writes Nicholas Denton in Budapest, industrial production grew 5.5 per cent in the year to June, taking activity back up to the levels of two years ago. There was a 5.3 per cent leap in the month to June. However, industrial production remains more than 30 per cent down on the late 1980s and disappointing export statistics clash with the latest indications of stronger economic activity.

Italian funding repayment offer

Former Italian health minister Francesco De Lorenzo, one of the most reviled figures in the country's huge corruption scandal, was quoted yesterday as offering to repay L4bn (£1.67m) in illegal funding he received, Reuter reports from Rome. "The illegal contributions amount to some L4bn. I will give them back, selling what I can," he told the Corriere delia Sera newspaper in an

Greeks end stand-off with king

Former King Constantine said yesterday that the Greek government had agreed to withdraw two navy ships and an air force aircraft that had been escorting a yacht he had rented for a family holiday, Reuter reports from London. Constantine told the BBC that he had agreed to stay away from two towns in the Peloponnese peninsula, as demanded by the government, and in return the ships and aircraft would leave him alone.

Bundesbank's money target missed again

By David Waller in Frankfurt

GROWTH in German money supply has exceeded the target range set by the Bundesbank for the fourth consecutive month.

According to provisional figures, M3 - which comprises cash in circulation as well as savings and short-term time deposits - grew at 7.5 per cent in July on an annualised, seasonally adjusted basis. This fol-lows growth of 7 per cent in June and compares with a target range of 4.5 to 6.5 per cent. Although the headline figure was in line with the expectations of economists, there was disappointment about a sharp. 8 per cent rise in bank credits to companies and private individuals over the past six months.

7.6 per cent growth rate in the six months to July. Economists said that the August M3 was likely to climb still higher, reflecting Bundesbank currency interventions. The disappointing July M3

figure was released just a week before the Bundesbank's policy-making council meets on August 26 to consider whether monetary conditions warrant Yesterday Mr Helmut Schlesinger, the Bundeshank president, warned of the "grave disruptions" which can occur on financial markets if high expectations of interest rate cuts are not fulfilled.

In remarks reported by a German news agency, he said that the currency market upheaval of recent weeks "should make it clear to everyone" what happens when mar-

expectations. · Alice Rawsthorn in Paris adds: Mr Jacques Delors, president of the European Commis aion, yesterday criticised Chancellor Helmut Kohl for suggesting that the EC might have to delay the timetable for monetary union. Mr Delors

kets are fed with unrealistic said that the chancellor's remarks had "added to the

Germany tied by its own policies

By Quentin Peel in Bonn

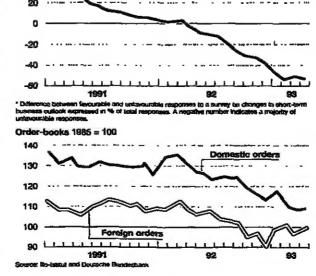

THE key to turning round the recession in Germany lies in export markets: on that, the Organisation for Economic Co-operation and Development, the Economics Ministry. and the country's main economic institutes are agreed. They are not sure, however, when the real upturn will come, and how strong it will

Moreover, there is a clear relationship between policies intended to tackle domestic problems and the health of Germany's main export markets. The Bundesbank's strict monetary stance, designed to stabilise inflation and maintain D-Mark stability, has been a deciding factor in the stagnation afflicting other European Community economies.

At the same time, the D-Mark's strength is an important factor militating against a rapid recovery of German The latest ORCD report

sums up neatly the arguments of optimists and pessimists. The former, it says, "expect declining German interest rates will quickly lead to lower rates elsewhere, and thereby stimulate European activity, and hence the demand for German exports". They argue that recent losses of export market share can be attributed more to the high proportion of investment goods in German exports than

Western Germany Ito business climate* 1985 = 100

to their relatively high price. Pessimists, on the other hand, fear that expensive German exports will continue to lose market share in 1994. They blame the rise in wage costs and D-Mark revaluation, especially against most of the other currencies in the European monetary system. The OECD errs on the pessi-

mistic side: it forecasts export

growth next year at 2.3 per

cent, compared with 3.8 per

cent suggested by the economic institutes, and the Rconomics Ministry's 4 per cent. That is against a background of 2.5 and 5 per cent expected growth this year and next in Germany's main export markets. The OECD suggests that higher wages and the strong D-Mark this year add 5 per cent to relative unit labour costs in manufacturing, calculated in a common currency. That should

1994, as the D-Mark stabilises and more moderate wage deals work through the system.

The report also points to important changes in the composition of Germany's balance of payments, which led to a huge swing into deficit on the current account in the aftermath of unification. Between 1989 and 1992, the current account deteriorated by DM147bn, a swing from a surplus equal to 5 per cent of GDP, to a deficit of 1.5 per

Main factors were a surge in imports (largely unification-re-lated) and much more modest growth in exports. The deficit on invisibles also widened for four reasons: soaring tourism payments; a sharp drop in net investment income, as appreciation of the D-Mark meant large valuation losses on foreign assets; loss of military receipts with the withdrawal of allied troops; and rising net transfers abroad.

"As long as eastern Germany's investment needs con-tinue to outstrip its domestic savings ability, and the required 'external' funds are not provided through expenditure switching in western Germany, the external current account deficit may be expec-ted to remain in deficit," the OECD concludes.

The OECD is loath to criti-

cise any German institution too openly, but it does allow questions about the ade-

measure of money supply to creep into its analysis, and therefore some implicit ques-tioning of the strictness of its

interest-rate straitjacket. It also points out that inflation has been caused by sev-eral factors which do not respond easily to the Bun bank's lead interest rates: taxpush effects and administrative price rises in east Gerand structural excess demand in the housing market, forcing up rents and construction

suggesting a decline to 5 per cent on short-term rates by the end of 1993, and to 4 per cent by the end of 1994. As for the federal government, the criticism is mainly of past policy failures. The OECD economists say the costs of unification were not seen in time, and the fiscal adjustment

It urges the central bank to

taxation

French prepare financial reshuffle

By John Ridding in Paris

THE top echelons of France's financial administration are preparing for a round of musi-cal chairs following Mr Jacques de Larosière's appointent as head of the European Bank for Reconstruction and Developme

The most important move will be a replacement for Mr de Larosière as governor of the Bank of France. The central bank is in the process of being granted autonomy in the formulation of monetary policy and the new governor will take control at a particularly difficult time following the European currency crisis which has resulted in the effective flotation of the

French franc.
The favourite for the post is Mr Jean-Claude Trichet, currently director of the French Treasury, the most powerful civil service post in France's financial administration. His selection as head of the central bank would trigger a further reshuffle within the Treasury.

The decision on the next central bank governor will be taken by the cabinet and President François Mitterrand meeting as the council of ministers on August 25. But bankers and diplomats in Paris say that Mr Trichet faces little

opposition for the post.
"He would seem to be the natural choice," says one French banker. "He has the right background and the right views." Mr Trichet served as senior aide to Mr Edouard Balladur, the current prime minister, when he was economics minister in 1986 and 1987.

The implementation of laws granting the central bank independence in monetary pol-icy is expected by the end of the year. The French government has promoted the reform in order to strengthen the financial authorities' anti-inflationary credentials. But the task of maintaining a tight monetary policy will be complicated by pressures for more expansionary policies to help stimulate the economy and by the increased instability of the franc resulting from the ERM

Should Mr Trichet become the governor of the Bank of France, there is no clear candidate to replace him as head of the Treasury. One name mentioned in French financial circles is that of Mr Christian Noyer, the chief of staff of Mr Edmond Alphandery, the economy minister.

Overnight rate cut in France

THE Bank of France vesterday continued its cautious repair of the damage caused by the European currency crisis by lowering overnight interest rates for the fourth time in 10 days. The rate was trimmed by half a point to 8.25 per cent. However, the bank left its key intervention rate at 6.75 per cent and also held the 5-10 day lending facility at 10 per cent. Economists suspect that the French are awaiting the outcome of next Thursday's meeting of the Bundesbank

council. Although the franc has stabilised this week, the central bank's own financial position still shows the strain of the crisis. The bank yesterday disclosed only a slight reduction in the deficit on its foreign currency reserves, to FFr175bn in the week to August 12 from FFT188bn in the previous week.

JAPAN'S new coglition government promised yesterday to produce within a month an emergency programme aimed at deregulating the economy.

Its intention is both to curb the rise of the yen and ensure that the benefits of the currency's present strength are felt by consumers.

Each ministry is being told to identify regulations that could be lifted to achieve these ends - ranging from import harriers to price controls. The electricity power federa-tion last night yielded to official pressure to cut its charges, in order to reflect cheaper imported energy.

The initiative, decided at the first economy and the foreign exchange meeting yesterday of a special ministerial council on the economy, followed persistent calls for action from industry, which is suffering under the twin burdens of a prolonged slowdown at home and a cur-

rency squeeze on export earnings. The move also reflects the wish of Mr Morihiro Hosokawa, who became prime minister last week and chaired yesterday's meeting, to tilt the balance of economic power in

Japan from producer to consumer. His seven-party administration was elected on a platform of political reform, but Mr Masayoshi Takemura, its chief spokesman, acknowledged yesterday that the state of the under by these daily issues instead".

Mr Hosokawa later met Mr Gaishi Hiraiwa, chairman of Keidanren, the largest business federation, and agreed the yen had gone further than economic fundamentals justi-

The government appeared not yet to have decided whether the measures put in train yesterday, which it said would be ready by September should include a fiscal stimulus. Mr Takemura said only that ministers would seek to ensure that two packages of public works spending and tax cuts, unveiled in the past year by the previous Liberal Democratic government and totalling Y23,900bn (£157bn), had their desired

By contrast, the electric power federation said its plan to cut consumers' bills would put just Y150bn into the economy.

Mr Hirohisa Pujii. finance minister, endorsed the view expressed on Wednesday by Mr Yasushi Mieno. governor of the Bank of Japan, that no further cut in the central bank's official discount rate from its present 25 per cent was yet needed. Mr Takemura admitted that there were "wide-ranging viewpoints" at

Ms Manae Kubota, director general of the economic planning

agency, said the EPA would not withdraw a declaration made in June that the economy had bottomed out, although acknowledging "new unfavourable factors". These included the dampening effects on consumer spending of a cool summer. as well as the impact on international competitiveness of the yea's further rise.

Mr Fujii, citing the same factors, said they made the outlook "even more austere". The best way to deal with it was by passing on its benefits to consumers, he added. The yen fell against the dollar after the meeting, closing in Tokyo at Y101.98 after trading as high as Y101.10. It was down Y0.51 on the day.

Ms Manae Kubota: "New

Israel writhes under the goad of Hizbollah

Armed conflict risks overtaking diplomatic peace efforts, writes Julian Ozanne in Jerusalem

SRAEL'S problems in southern Lebanon refuse to go away. Just as the Jewish state was congratulating itself on last month's devastating seven-day offensive against Lebanese civilians, intended to curb attacks by the pro-Iranian Hizbollah militia, an increase in regional violence is back on

The death of at least seven Israeli soldiers in southern Lebanon yesterday in Hizbol-lah attacks, followed by immediate retaliatory strikes by Israeli aircraft, has underlined the continuing fragility of the

It has also raised the prospect of armed conflict overtaking diplomatic peace efforts and re-opened the fault lines between Israelis who argue for a more intensive peace drive and those calling for tougher military measures

Once again violence in southern Lebanon is driving

Mr Yitzhak Rabin, Israel's prime minister, to weigh up (for the second time in a month) whether to pursue the diplomatic track or risk scuttling peace talks by more serious Suspicions that Syria, the main power-broker in Lebanon and the arms conduit to Hizbollah, tacitly allowed yesterday's attacks have also dented recent Israeli hopes of a real change in relations with Damascus. Israelis point out that vesterday's attacks came after Syria reprimanded the Lebanese government for deploying troops in southern Lebanon - a move which could have restricted Hizbollah activ-

For 15 years, Israel, in defi-ance of UN resolutions, has been trying to "purge" Lebanon of hostile Arab guerrillas. Today that goal is as elusive as it was when Israeli soldiers first crossed in substantial force into Lebanese territory in 1978, and later, in 1982, marched all the way to Beirut. Indeed, many Israeli military experts believe the country is now facing its most effective

enemy in Hizbollah, which

took over resistance to Israel

after most Palestinian guerrillas were forced to flee Lebanon during the 1982 Israeli inva-

This year alone there have been more than 600 attacks on the self-styled Israeli "security zone" in southern Lebanon. Yesterday's incident brought the casualties for 1993 to at least 16 soldiers killed and 29 wounded. Furthermore, Israeli military analysts say the highly mobile Hizbollah is much better armed this year. with Iranian supplied Sagger anti-tank missiles and Strela shoulder-mounted anti-aircraft missiles. With the assistance of Iranian officers, it is also better trained.

The Israeli public has come to expect revenge attacks and the pressures for serious military action is especially intense given that the government has been telling the public that last month's offensive, in which 130 Lebanese were killed, was a decisive blow. Most fear being sucked into against Hizbollah.

Mr Rabin, a former army chief who embodies the belief that diplomacy must be backed by force, will also come under intense lobbying from military hardliners and Israeli hawks led by Mr Ariel Sharon, the former defence minister responsible for the disastrous

r Sharon has called for an expansion of for an expansion by the security zone by the creation of a "supplementary zone" between the Litani and Awali rivers where Israeli troops and their Lebanese proxies would have freedom of action without maintaining a military presence. "Villages in the zone which have concealed terrorists for years should no longer be left standing," he wrote recently.

Few Israelis back Mr Sharon's military adventurism.

another Lebanese quagmire like the 1982-85 campaign, where 654 Israeli soldiers died and thousands were wounded. But many also believe that Israeli aerial and artillery retaliation leave the underlying problems unsolved. Some hardliners, therefore, see an

answer to the problems in sus-pending peace talks with Syria. More Israeli retaliation is futile. We should tell Syria to go to hell," said Brig Gen (Res) Aharon Levran, former deputy head of military intelligence. "Hizbollah is a whip in Syrian hands to hurt Israel and we should not talk peace with them any more. The problem is that this government wants

peace at any price. They want to put their names in the annals of history and they don't give a damm about the true and cruel realities." However, a majority of the

government and the public still

able to indulge in. Star TV, 64

bensive Middle East peace deal will solve Israel's problems in southern Lebanon. "We must prevent purselves being tempted into deeper military involvement in Lebanon or we will have casualties like this every day," said Mr Ran Cohen, an MP from the left-wing Meretz party. "Military action will not stop the violence; only a peace agreement will stop it. This is the

only way." Attacks by Hizbollah, combined with suspicions of Syria, weaken the voices of reason and moderation in Israel and threaten wider conflict. But the lesson of Israel's actions in Lebanon in the 1970s and 1980s is apparent to all but the most diehard Israelis: that violence

is no substitute for genuine negotiation. Israelis who are seriously committed to peace hope the same message is understood in Syria. Last strike

Turkey wants to open Iraq oil pipe

By John Murray Brown

TURKEY is to urge the UN to lift sanctions on Iraq's oil export pipeline, in the first sign of a shift in Ankara's policy towards Baghdad.

Mr Vulkan Vural, senior adviser to Prime Minister Tansu Ciller, said yesterday reopening the Iraqi pipeline was the foreign policy priority. and would be the centre of discussion when Mrs Ciller goes to Washington next month.
Although Turkey insists it is

not considering unilateral action on lifting sanctions, Mrs Ciller's government has adopted a more conciliatory approach, in contrast to President Suleyman Demirel, who made oblique criticism of the government this week.

"Have sanctions removed Saddam Hussein or have they led to the suffering of the Iraqi people?" asked Mr Vural.

A recent report from the Food and Agricultural Organisation estimated Iraq's food import needs at around \$2.5bn (£1.7bn), and warned that prefamine conditions now pre-However. Turkey is equally

anxious that the current crisis should not jeopardise its long-term economic relations with Iraq, which before the Gulf war was its second largest trade partner. There is also concern at the deteriorating state of the pipeline, which has been shut since August 1990, when under resolution 661. Turkey informed the Iraqis it was suspending loadings at Yumurtalik, Turkey's Mediterranean oil terminal. The two pipelines have a

capacity of around 76m tonnes a year, and link with Iraq's Kirkuk oil fields. Turkey is losing an estimated \$750,000 a day as a result of the closure. More than that, the sanctions have devastated the border trade with Iraq that is vital to Turkey's impoverished south east.

"The members of the Security Council should understand that it is unfair to make Turkey suffer for this," Mr Vural

Turkey is launching "extensive discussions" with its allies, he said, and would present its proposals when the UN Security council met on Iraq on September 20.

US jets raid north Iraq missile site

New currency for Turkmenistan

The former Soviet republic of Turkmenistan yesterday announced it would issue a national currency at par to the dollar on November 1, Reuter reports from Moscow.

President Saparmurad Niyazov. of the Central Asian republic, which is the world's third biggest gas producer, said Russian roubles would be gradually replaced at an exchange rate of 1,000 roubles to each unit of the new currency, the

Mr Niyazov, quoted by the Russian Interfax news agency. did not say how the government would back the manat at this rate, or how much Turk-menistan had in foreign currency reserves.

Mr Niyazov promised that the minimum monthly wage would be 150 manats and average pay the equivalent of \$370 to \$400 after the exit from the rouble zone takes effect.

UN agrees new aid for Angola

The United Nations yesterday agreed fresh aid for Angola, as the government reported that people were starving in the besieged city of Cuito, Reuter reports from Luanda. The UN World Food Programme said it would mount a six-month \$56.7m (£38m) emergency operation for nearly 2m people in

Angola. The WFP had suspended flights to many cities for several weeks, including Cuito. because of attacks on its aircraft by Unita rebels, but a WFP spokeswoman said aid flights had resumed this week and the agency was increasing

Indian TV launches a real carry-on Producers' fight for air time descends into farce, writes Shiraz Sidhva

HE launch of five new television channels last Sunday - Independence Day - gave Indians a freedom long denied them by Doordarshan, the country's stateowned broadcaster.

It was responding belatedly to the challenge of Star Television, the Hong Kong-based satellite broadcaster which has attracted a buge audience in India with its five channels: entertainment in English and Hindi, an Asian version of the MTV music channel, sport and BBC World Service Television. However, the new offerings from Doordarshan, an

unwieldy, bureaucratic organi-sation which previously had only two terrestrial channels, did not begin auspiciously. Those fortunate enough to bave an additional satellite dish jeered the menu of old-

Indian films and dated progremmes from the archives. In line with the government's programme to open up the economy, the launch of the satellite network using India's new Insat-2B satellite had been intended to coincide with produced material. But Doordarshan's attempt to offer slots to producers on a first-comefirst-served basis has

Fearing they would be elbowed out by a rush of more aggressive bidders, seasoned producers, such as Mr Prannoy Roy of New Delhi Television and Mr Ishwari Bajpai of Octave Communications, deputed employees to queue outside Doordarshan's commercial office on Delhi's Tol-

Production company employees queue for days for slots on the new satellite TV service

stoy Marg on June 23, nearly two weeks before what was then the applications deadline. The queue became longer by the day as more than 300 people braved the monsoon rain. Producers say their men have been offered up to Rs50,000 (about £1,100) to relinquish

their places. Those left out took the matdescended into farce. ter to the courts. Bennett Coleman, owners of Times Television and the Times of India group of publications, chal-lenged the queue's validity. An interim district court judgment ordered police to dismantle it. allowing it to be re-formed two hours before the opening of the

The quene refused to disperse. Mr Roy went to the Delhi High Court, which appointed a registrar to verify the truth. Prominent film and television personalities, such as Bombay film producers Ramanand Sagar and Saeed Myrpa, and television magazine producers Madhu Trehan and Karan Thapar, have

turned the sidewalk into a tourist attraction. Two parallel queues have formed, one of which includes representatives from newspapers including the Indian Express, Times of India, and Hindustan Times. The battle, waged with equal ferocity in the courtrooms as in the col-

umns of the newspapers. remains unresolved.

Play it again and again, Uncle Sam

Nikki Tait finds a controversial and litigious market in second-hand compact discs

HE SIGN in the window is discreet and handwritten: CDs for as little at \$2.99 (£1.97). But the savings to be garnered inside this downtown Manhattan record shop in New York are anything

Products at \$2.99 may be rare but used compact discs in the \$6.\$10 range are plentiful. For example, Next Exit, Grover Washington's 1992 album, is being sold for \$8.99. The same CD, purchased new in Tower Records, one of the biggest mainstream record stores in the area, costs \$14.99. Shops like this have become

the focus of a crackling debate in the US, leading in the past month to lawsuits and heated accusations.

On one side are retailers and consumers, interested in being able to buy and sell recordings at the best price. On the other are some of the largest US record labels and well-known recording artists. They are concerned that sales of used CDs will cut into new purchases, and that royalty flows will be reduced. (Royalties are usually levied only when an album is

The volume of business in these sharply discounted, second-hand CDs is reckoned to be small. The Recording Industry Association of America, a Washington-based trade group, says total sales of CDs rose by 22.3 per cent to 407.5m units last year, or over \$5bn in value. Used CDs are estimated to account for only 1-2 per cent of this.

But the second-hand market's growth potential could be considerable. Many music retailers would like to exploit it. A second-hand CD is unlikely to be noticeably inferior in quality to a brand-new product - unlike a vinyl record, or even a cassette tape. Mr Russ Bach, president of Thorn-EMI's CEMA Distribution arm in California, recently forecast that, "if left unattended, the used CD business will grow to about 20 per cent of unit volume by 1998".

Small, independent music retailers have dealt in used CDs for some time. But the stakes were raised last winter when Wherehouse Entertain-ment, a US west coast chain, moved into the market. Wherehouse operates 339 outlets and was the first retailer of any size to defy the distributors'

The wrath of some of the biggest companies descended

The wrath of some of the industry's biggest companies -such as CEMA, Sony and Time Warner - descended. They withdrew adverstising and promotional support for all retail-ers dealing in second-hand

Wherehouse has fought back in the law courts. Last month, it launched a suit against four of the higgest record distribution companies - CEMA, Sony Music Distribution, UNI Distri-bution (part of MCA, now owned by Japan's Matsushita) and Warner Elekira Atlantic. In its complaint, the retailer alleges that prices of new CDs were being maintained "at artificially high levels", and that the four distributors had "com-

bined... unreasonably to restrain trade... in used CDs."
It points out that the same distributors operate "record clubs" which advertise and sell CDs at a substantial discount to shop prices. Wherehouse also argues that its own second-hand CD sales are an effort to stay competitive with these record clubs. Distributors, it says, are worried that the secondary market in CDs will threaten clubs' viability.

Wherehouse's legal action has been followed by the Inde-pendent Music Retailers' Assoclation - about 150-200 "mom and pop" music stores formed to fight the distributors over

chip reliance

on Japanese

Commerce

second-hand CD sales. Like the Wherehouse suit, IMRA's class action is filed in Los Angeles courts. It alleges price-fixing and unfair trade practices. Mr Don Rosenberg, one of IMRA's founders and owner of the 15-outlet chain Record Exchange, says there is no law against selling second-hand CDs. He also notes that the royalty issue has not stopped second-hand trading in other

Mr Rosenberg claims, more controversially, that the sale of second-hand CDs does not depress new CD business, and points to his own stores' expe-rience as evidence. Here, big distributors beg to differ.
There is no such thing as a small sideline when you are taking royalties from artists, producers, songwriter, publishers, musicians and artist managers, and taking margin away from the record company, claimed Mr Bach in Billboard

gazine last month. "If used CDs hit the main record channels of America and become widely accepted by consumers, and if CEMA supports retailers selling used CDs, then we will be cutting off our own future."

While the lawsuits grind on the Federal Trade Commission is also understood to be looking at the issue. In line with its usual practice, though, the government anti-trust agency declines to confirm any

specific investigation. Not all distributors think like the retailers named in the Wherehouse suit. Retailers say that PolyGram, for example, has a different policy, arising from the notion that the industry must learn to live with sales of used CDs. In London, PolyGram refused to comment

Judging by the number of people in the downtown Manhattan store, there is no doubt where consumers' sympathies lie "Customers love tt." savs Wherehouse, "As long as we're involved in a legal business and the distributors are involved in illegal restraint, the lawsuits will continue".

Amazon tribal 'massacre'

By Christina Lamb in Rio de Janeiro

THE Brazilian police yesterday began investigating a reported massacre of up to 19 Yanomami tribal people - the second such incident in two

It is alleged to have been carried out by garinipeiros (itinerant goldminers), and the killmes have set off new fears for the Amazon's most populous indigenous tribe.

Between 14 and 19 Yanomami men, women and chil-dren were reported as decapitated by machetes at the remote settlement of Haximu in the northern state of Roraima, according to officials of the National Indian Foundation (Funal). In a similar incident in July,

five or six Yanomami were murdered in the same region. The motive for the tribal killings is unknown but there has long been tension between the garimpeiros and the Yanomami, whose lands encompass what are thought to be some of the world's richest mineral

Two years ago, after international pressure, the government declared a 9.4m hectare reserve to protect the estimated 9,000 remaining Yanomami and expelled the goldminers, who were bringing violence, disease and pollution

Brazilians curb wage adjustments

By Christina Lamb in Rio de Janeiro

BRAZIL'S economics team was yesterday celebrating its most impressive victory in the federal Congress to date.

The congress voted by 318:144 late on Wednesday night to pass government legislation granting monthly wage adjustments of 10 percentage points below the

monthly inflation rate.

begun two months ago when the Congress approved monthly wage adjustments keeping fully abreast of inflation.

The horrifled Finance Ministry esti-mated then that such full adjustment would cost the government the equivalent of an extra \$11bn a year on pensions and

The change on Wednesday night was the result of frantic lobbying by govern-ment members. In a final bid for help, Mr

Winston Fritsch, chief economic policy maker, presented Congress members with figures to show that inflation would top 50 per cent a month in December if the full adjustment were retained.

A jubilant Mr Fernando Henrique Cardoso, finance minister, appealed for patience yesterday: "We won't do anything crazy such as shock plans, price freezes, dollarisation or prefixing of

NEWS: WORLD TRADE

Delays in Taiwan Aerospace EC and Turkey in US seeks less joint venture, concedes BAe

By Daniel Green

BRITISH Aerospace conceded yesterday that talks on finalising the arrangements for a £250m joint venture with Taiwan Aerospace Corporation (TAC) were "taking longer

than we had anticipated". BAe, which three weeks ago said it regarded the deal as a certainty, was responding to reports that Mr Yang Shihchien, the Taiwanese vice eco-nomics minister, had said the deal could still collapse.

Mr Yang has been closely involved in the establishment of the venture and blamed differences over the financing of

the joint venture, called Avro. BAe said that this was the main subject of the talks still to be resolved.

BAe shares fell 14p to 454p on the news because the deal is labour costs.

loans to Avro.

central to BAe's drive to return to profitability. It would mean that manufacturing of the RJ range of regional jets would be partly carried on in Taiwan, which is close to the fast-growing markets of east Asia and which offers lower The stumbling block in the

talks is thought to centre on the question of collateral for Several banks both own stakes in Avro and are lending it money. But Taiwan banking law prohibits a bank from extending unsecured financing to a venture in which it holds

more than 3 per cent. Behind this obstacle lies concern among some Taiwan investors that the project might not make money. One of the reasons BAe needs a partner with strong manufacturing capability and access to markets is that its regional aircraft business has lost money for several years.

TAC, 29 per cent owned by the government, and British Aerospace signed an agreement in January 1993 to form a 50-50 venture making the RJ family of regional passenger iets, which would be assembled in Taiwan and the UK.

Mr Yang last month confirmed that the government would increase its direct equity holding in TAC to 39 per cent. This holding will be through two bodies: a government development fund, which will lift its stake in TAC from 24 per cent to 29 per cent, and the

state-run Chiao Tung Bank,

which will raise its stake from

5 to 10 per cent. The China Development Corp, owned by the ruling Kuomintang party will also take a

law harmony talks

By John Murray Brown

TIRKEY and the European Community are negotiating a framework timetable for the harmonisation of legislation, to pave the way for full cus-

toms union in January 1995. Turkish and EC trade officials have less than two months to agree a legislative agenda to bring Turkish commercial and trade law in line with the EC, before it is presented to the Turkish-EC Association Council meeting on October 4.

The move is the final stage on the road to customs union which is seen by Turkey as a step towards full EC member-

Philip Gawith on the revised offer to be presented to Gatt

HEN South Africa started on the road of political reform in 1990, this was as much a function of the crippling economic cost of apartheid as it was a reflection of the moral and political bankruptev of that

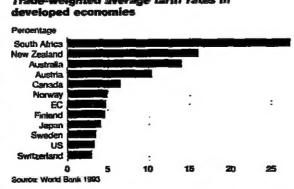

Since then, the country's faltering political fortunes have hogged the limelight. Later this month, however, South Africa will present a revised trade liberalisation offer to the General Agreement on Tariffs and Trade (Gatt), which forms part of a revision of trade policy as fundamental as the political reform under way. Mr Stef Naude, director gen-

eral of the Department of Trade and Industry, comments: "Without a doubt, this is the biggest reform of trade policy ever undertaken in this coun-

The aim of the reform is simple: the transformation of the existing industrial base, fed for decades on a diet of political isolation, import substitution and strategic self-sufficiency, into an internationally compet itive, export-led manufacturing

The Gatt offer is but the first of many initiatives which include reform of export incentives, investigation of export processing zones, more efficient anti-dumping legislation, a trade agreement with the EC

Trade-weighted average tariff rates in

and the future of the South African Customs Union. Pursued against the background of a weak economy, unemployment running at over 40 per cent and fundamental political transition it is a Herculean labour.

No longer can government unilaterally decree policy changes. Democracy, transparency and consultation are the new watchwords. When it comes to economic policy, the imprimatur of the National Economic Forum, the tripartite body where business, labour government are represented, must be sought, At least in the area of trade

policy, there is fairly broad

consensus among these three groups as to the way forward. Nobody would argue with the premise, contained in the gov-ernment's recently published Normative Economic Model. that "Much of the country's future economic prosperity will be determined by its ability to play a bigger role in interna tional trade in industrial

This clearly requires conformity to Gatt, whose signatories all benefit from 'most favoured nation" status and "national treatment" - the first ensuring that any tariff cut offered by one country to a second must automatically be extended to all other trading partners, and

South Africa: Estimates of Effective Protection (%) Food. Beverages and Tobacco Textiles, Apparel, & Leather Wood & Wood Products Paper & Paper Products 13.7 43.6 21.7 13.3 18.9 19.8 11.2 18.2 10.9 17.8 Basic Metal

the second guaranteeing that an exporter is treated just as a local company is treated. There is no way South Africa can fully reintegrate into the global economy out-side Gatt," said Mr Stef Naude. Conformity to Gatt is not the only reason for lowering tariff barriers. It is also necessary to remove the anti-export bias in South Africa whereby protection makes the local market more profitable than exports. It also raises input costs for local exporters, making them uncompetitive compared to

exporters elsewhere who can obtain inputs at world prices.

of South Africa's trade policy

A recent World Bank study

Manufacturing

found that it was not overly protective, "but far too fluid and complex, and biased against exports." Compared to developing countries, the pro-tection level is fairly average. According to NEM, South Africa's tariff barrier (weighted by import values) stands at 21 per cent, though this rises to 27 per cent when account is taken of special import surcharges which survive for fiscal rather than protection purposes South Africa's revised Gatt offer will thus have two main features: first, it will involve a

a dramatic rationalisation of

the tariff structure which is

of protection in the country as formula duties often resulted in an increased overall level of protection. The Gatt offer - particularly the lowering of import tariffs -should not be seen in isolation. All parties agree that it will have to be accompanied by supply-side support measures to assist local industry to improve its competitiveness. With unemployment already at alarmingly high levels, the social and political costs of one-third reduction in average tariff rates. Second, it includes simply dropping tariff barriers, without other policies intro-

THE FALL in car sales incontinental Europe has thrown UK production into reverse after 18 months of almost uninterrupted growth to the high-

est levels for nearly 20 years. Short-time working has already occurred in parts of the UK car industry and there was also mounting concern yesterday over a further sharp deterioration of production in the already depressed commercial vehicles sector.

Statistics showing a 49.68 per

output last month were described as "extremely serious" by the UK's Society of Motor Manufacturers and

They are considered by the industry to reflect the patchiness of economic recovery in the UK as well as falling export demand because of the widespread recession elsewhere in

Total car output in July was down only marginally, by 242 per cent to 115.648 compared with 118,514 in the same month last year, and for the first seven months remained 6.63 per cent ahead of the 1992 period at 858,617 compared with 805.261.

But production for export fell by 16 per cent in July, to 33,578 from 39,977 in the same month It was the first significant

fall this year and has loft the industry worried that it can no longer escape the effects of a drop of around one-fifth in continental car sales since the

start of this year. "As far as car production is concerned, we are now seeing the influence we forecast of the sharp fall in sales in virtually every market throughout con-tinental Europe," said Mr Roger King, the SMMT's public affairs director.

"Overall production levels are clearly at risk in the face of shrinking exports," he added. Continuing growth in UK new car sales, the only main European car market undergo-

ing a recovery, nevertheless is expected to prevent any deep downturn in UK car output. New domestic car sales in

the first seven months were 9.1 per cent higher than a year ago, and most industry estimates are that sales will reach 1.75m-1.5m this year, compared with 1.59m in 1992.

Production for the rest of this year would have to fall by more than one-third of 1992 levels not to reach last year's total of 1.29m. Most industry forecasters still expect the final outcome to be around 1.4m. which would be the highest since 1975.

Ford said "there is absolutely no substance" to reports

duce a four-day week at Dagen ham, where it makes Fiestas.

Peugeot Talbot has suspended production of its UK market mainstay, the 405, at its Ryton plant near Coventry and is reducing output from 1,900 to 1.600 cars a week of only one model, the 306. Some 300 jobs are being cut.

General Motors' Vauxhall subsidiery has closed its Cavalier plant at Luton, Bedfordshire, for this week and will

calling on the government to introduce a funding system requiring students to pay towards their buition because a lack of money is denying places to thousands of young In an outspoken statement,

the Committee of Vice-chancel-lors and Principals said that "thousands of young people are being denied a university education" because "the government cannot find the money to fund the extra places needed to satisfy demand.

CPC (UK), the US food group, is to move production of its Knorr brand of soups and cubes from Paisley, near Glasgow, to its more modern French and Italian plants to reduce costs.

As many as 345 out of the 449 jobs at CPC's Paisley operations are to be lost.

The company intends to expand production of the Knorr product range at Dupprigheim in France and San-guieth in Italy. Paisley will continue to produce Hellmann's mayonnaise.

Anti-fraud scheme planned Barcode scanners are to be

mobilised as a high-tech veapon against benefit fraud which costs the government an estimated £300m a year. The latest anti-fraud campaign, codenamed Alert, is a Office and the Department of Social Security's benefit agency that will cost £150m to install nationally.

Lending shows modest growth

Modestly strong bank and building society lending last month was consistent with an improvement in consumers' willingness to take on new

debt, economists said. Bank of England figures showed a seasonally adjusted \$2.8bn monthly rise in M4 lending - bank and building society lending to the private and corporate sectors.

Spending on tourism rises

Despite the recession the British spent more than £25bn on tourism to all destinations in 1992, an increase of 7 per cent in real terms over 1991.

The growth came from visitors travelling to destinations outside the UK, according to figures published by the joint English. Northern Ireland, Scottish and Welsh tourist boards. Non-UK tourism spending by British travellers rose in real terms from £12.62bn in 1991 to £14.41bn

Ulster group wins order

A Northern Ireland textile company has won a £1.8m order to supply traditional Arab beadgear to a distribution company serving Saudi Arabia, Kuwait, Dubai and Bahrain, Lintrend, based at Larne, has adapted a technology it developed for producing wrinkle-free linen, to cotton fabrics, and is to use it to make wash-and-wear cotton yashmaghs, obuttres and thobes respectively coloured headgear, plain white headgear and full-length white gowns.

Oil potential

More than 80 new North Sea oil and gas fleids could be developed over the next 20 years, according to Grampian Regional Council's annual review of the industry. It says Britain should see a second peak of oil production in about

Initial radio contracts

rival groups

won by

A TRANSATLANTIC battle to build a £1bn-plus battlefield radio system for the armed services entered a new stage last night after the Ministry of Defence awarded initial project development contracts to two

The contracts, worth about 225m each, have been given to a consortium led by Siemens Plessey Systems, which is part-nered with Racal; and a rival group led by ITT of the US, whose team includes Canada's Northern Telecom and BAe-SEMA, jointly owned by British Aerospace and SEMA

A third consortium, led by GEC Marconi and including Thomson CSF of France, has been dropped from the race, confirming defence industry

speculation The Ministry of Defence said proposals from Siemens and ITT proved to be more attractive, but would not go into

Racal's share price rose 1p to close at 245p yesterday in a falling market, while GEC's closed 2p lower at 345p.

The battle to build the Bowman communications system has attracted virtually all the world's big defence communi-cations groups. At stake is not only the final production contract - worth more than £1bn and due to be awarded in 1997 but the prospect of spin-off orders to other armed services

Bowman will be the UK's future combat radio system. covering everything from hand-held radios used by soldiers in the field to strates radio systems at brigade head-

It is planned to replace the Clansman family of radios used by the Army, the Royal Marines and the Royal Air

eliand

Force regiment in 1999. Clansman was introduced in the 1970s and is a voice only system. Bowman is a secure voice and data system, necessary for running many modern weapon systems. It will be more secure than Clansman, as it uses electronic "frequency-

hopping" to prevent jamming. The Ministry of Defence had been considering replacing Clansman for some years, and last May invited companies to tender for Bowman.

This prompted the creation of three consortiums - "Yeoman" for Siemens and Racal, "Crossbow" for the ITT team. and "Arrowhead" for the GEC Marconi group - because the job was seen as too complex for any one company alone.

The two winners will now

enter a three-year "project definition" (PDI) stage, funded the Ministry and industry. Mr Jonathan Aitken, minister for defence procurement, said this phase "would provide a major incentive for the British defence industry." ITT expressed pleasure at

winning a development con-tract, and said if Crossbow won the UK content of the eventual production contract would be

Unions seek coal summit after pit collapse

By David Goodhart, Labour Editor

All THREE main coal industry unions yesterday called for an "industry summit" on roof bolting after the collapse of a roof killed three men at Bilsthorpe colliery, Nottingham-shire, central England.

British Coal strongly rejected both the claim that roof bolts were a safety hazard and the broader criticism made by the National Union of Mineworkers (NUM) and some oppo-sition Labour MP's that safety was being sacrificed in the dash to improve productivity. Mr John Longden, the Brit-ish Coal Nottinghamshire Area director, said: "It is quite wrong to assume at this stage that roof bolting was at fault

The roof fall was so massive that no support system could have held it." He was supported by Mr John Meads, head of the British Association of Colliery Management, who lost one member in the accident, who said that "if roof bolting is

done properly it is safer than

other forms of support". He also rejected the more general criticism that safety was being sacrificed. "This is just political scare-mongaring, the accident trend has been down, not up, in the past few years." Last year saw just three fatalities at British Coal the lowest number on record Nevertheless the inquiry into what happened at Bilsthorpe, the most serious accident for

several years, will concentrate

The roof support system used at Bilsthorpe, scene of Wednesday's accident - relies on steel bolts coated with adhesive resin and rammed into the rock above the coal. The picture shows a rock bolted roof at Asfordby pit in Leicestershire. Picture: Colin Beere

on roof bolting and is bound to reawaken the doubts that many people have had about the system.

Although the NUM and Nacods, the supervisory union, have opposed bolting at national level for many years, the breakaway Union of Democratic Mineworkers (UDM) has

Yesterday, however, Mr Mick Stephens, the UDM general secretary in Nottinghamshire. said: "We have always had some doubts and naturally

those doubts have now grown. Bolts, which bind the rock together to create a beam effect, began to replace steel arches in many British mines in 1988. Now virtually all of the 30 British Coal pits use the

mine and throughout the industry there is now at least one hundred kilometres of roof-bolted ceiling.

Critics, such as Mr David Feikart, a former NUM official, make three main points. First, bolting was developed in the US and Australia where pits are generally less deep than in the UK and have more uniform

bolting appears not to give the same warning noises as a creaking steel arch. Third, peo ple are not properly trained to understand how roof-bolting

Mr Feikart believes severa recent accidents can all be attributed to roof bolting or a combination of bolts and conventional supports.

Private data illegally used by many companies

MORE than 100 000 businesses. and other data users are illegally handling information on private individuals, according to a report by the National Audit Office, Britain's public

spending watchdog.
The report, which reveals widespread ignorance about the existence and role of the Data Protection Act 1984, calls for better policing system to ensure full compliance with

the law. The data protection registrar, who administers the Act, has told the NAO that only about 150,000 organisations have registered under the legislation. The registrar admits there is no "satisfactory or reli-able" method of establishing the numbers who should register, his most recent estimate of 250,000 is thought to be a con-

Under the Act, data users cannot use or disclose information other than for strictly defined purposes. Individuals have right of access to the information, which can be amended or erased if inaccu-

Failure by qualifying data users to register under the Act is a criminal offence. that, although some of them may be registered, one in three small companies and nearly one in six large companies are unaware of their statutory obligation to do so.

One in eight small companies know nothing at all about the Act

According to the NAO, there is "little investigative effort" aimed at ensuring registration takes place, with most atten-tion paid by the registrar to ensuring the renewal of registration on expiry.

Even so, the report says many data users are failing to re-register, while attempts to monitor compliance with good practice among registered data users are limited and are usually invoked only in response to complaints from the public. The NAO says that the data protection registrar must step up efforts to increase registra-

tions and improve and strengthen protection of the public. Controls over registered companies to enure good practice should also be improved while a new campaign to publicise the powers of the Act should also be launched. The report, however, acknowledges legal and financial constraints limiting the registrar from pursuing its

plans £50m expansion in Scotland By James Buxton,

Motorola

Scottish Correspondent

MOTOROLA, electronics group, is to spend 250m expanding its semi-conductor plant at East Kilbride near Glasgow in order to meet what it calls "exceptional demand" for its products.

The expansion will mean the creation of 180 jobs, taking the workforce to more than 2,000. It follows the completion of a £40m expansion project which was announced just over a year ago.

The new project, which involves installing new equip-ment and building extra cleanroom facilities, will enable Motorola to expand its capacity to make 6-inch waters for cus tomer-specific integrated cir-

expanding to accelerate pro-duction of digital signal processing chips, to meet a "surge" in European demand. The 400,000 sq ft plant's total production capacity will increase by 20 to 25 per cent. Some of the extra demand is for semiconductors for use in telecommunications equipment such as mobile telephones, especially from China and Eastern Europe. There is also

strong demand from the per

sonal computer and workstat-

ion markets, and from the mar-

ket for automotive products.

according to a survey of travel costs published today, writes Philip Rawstorne. Geneva. Taxis are expensive, A listed rate of £223 for a but car hire charges are single room in a four-star hotel in the city compares

among the lowest. British businessmen face a with £127 in Dublin and £123 bewildering array of varying travel costs across the conti-

nent, says Visa. The cost of a secretary in Amsterdam is five times greater than in Milan. Parts has the cheapest taxis

many companies are attempt ing to control costs by formulating a coherent travel policy. But if a company pays £120 for a hotel room in Dubllin and is then charged £220 for a simiits travel and entertainment lar room in Brussels, forward costs, says Mr John Chaplin, budgeting and cost control can

in Milan. The survey, by Visa, the credit card organisation, found that London offers some business travel bargains. The bill for a day's secretarial service is less than a third of the fee charged in

but the dearest breakfasts; in Oslo businessmen you can make a 30 minute local telephone call for the same price as a cup of coffee. This variation in prices cre-

ates difficulties for any com-

pany attempting to rationalise

Visa vice-president for market

development in Europe. "In these competitive times

ot a headache? Can't sleep? Drink too much? Feel depressed? Got high blood pressure?

One solution for victims of stress could be to sue your employer, according to employment lawyers Nicholas Rochez and Mark Scoggins of Davies Arnold Cooper, the commercia law firm. They say it is likely that a British company will be sued for stress in the next five

In a recent report* they argue that stress cases will follow the path of other injuries at work. They say that laws which were drafted to prevent accidents can easily be turned to include mental effects of stress. Employers who have taken no steps to identify and reduce stress at work may well find themselves having

Companies will doubtless argue that to extend the law to cover stress would put an unrealistic burden on them. After all, people who do stressful work know that the pressure is part of the job, and are usually paid enough to compensate for it, or

so the argument goes.

Lawyers point out though that similar claims were made about asbestosis, coal miners' lung and noise-induced deafness. Cumulative trauma claims will evolve the same way, the law firm argues. If they are right, companies should act now to avoid getting themselves into legal hot water later.

Insurers should take note too. At the moment companies are covered against claims causing "bodily injury or disease". But it is possible that a UK court could rule that these policies also include mental injury, as has happened in New York.

But even if stress never reaches court rooms, companies which take a positive stand on the problem and attempt to do something about it, will have more direct spin-offs in terms of lower absenteeism and a happier workforce.

*"Stress out, cash in" available from Davies Arnold Cooper, 6-3 Bouverie Street, London EC4Y 8DD, 071 936 2222

Lucy Kellaway

maker, began production in Britain only in January. But this pioneer of lean production systems, which is widely recognised as setting a world stan-dard in efficient manufacture, is already having a dramatic impact on the management practices of more than 150 UK and continental

Since the beginning of this year Toyota's first car for Europe, the Carina E, has been emerging at an ever faster rate from the assembly line at the company's £800m-plant at Burnaston, Derbyshire.

As with Nissan's Sunderland facand Honda's at Swindon, the line is being supplied not by the once-feared influx of Japanese component companies - which has almost totally failed to materialise - but by mainly indigenous British and continental companies.

They are widely varied in their size and activities; from British Steel's Llanwern plant in south Wales, supplying coated steel strip. to small concerns providing the 10,000-plus individual parts which make up a modern car.

Last month a Department of Employment-commissioned study suggested the work practices and culture needed to meet Japanese cost and quality targets are resented by those suppliers' work

But there is no visible sign of that at Advanced Engineering Systems (AES), at Tipton, west Midlands.

AES, a supplier of machined castings and other parts to Toyota, Honda and Rover, provides one of the most vivid examples of the cul-tural adjustments a British supplier, with its roots stretching deep into the old, adversarial traditions of the UK industry, has had to make en route to its goal of becoming a world-class supplier.

A year ago AES was part of Beans Industries, a former British Leyland subsidiary which, among other things, was churning out reconditioned engines for the Unipart group. Unipart bought 80 per cent of AES from Beans, with an option to acquire the remainder shortly, purely because the company had contracts to supply seven compo-

Unipart Industries - the group's components manufacturing arm -had already learned much about quality from Honda. In a benchmarking study of 17 Japanese and UK components firms carried out last year by Dan Jones - co-author of The Machine That Changed the World - and Andersen Consulting, it was the only UK company to match the best Japanese companies on quality. But the study showed it was unable to ally quality with Jap-

anese productivity. What better

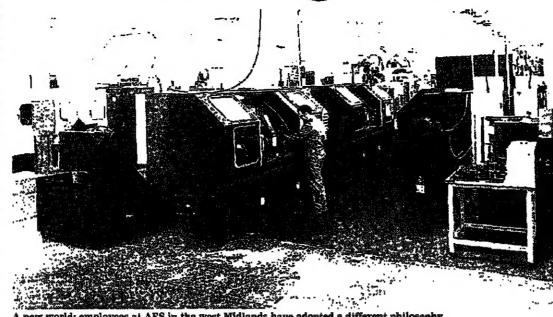

way to try to close the gap than to

supply to one of the most efficient

AES remains a small company,

John Griffiths describes how Toyota's working practices transformed one of its UK car components suppliers

Driving out the old regime

A new world: employees at AES in the west Midlands have adopted a different philosophy

of all Japan's vehicle makers? Despite his previous experience of working with Honda even Frank Burns, AES' managing director, was shaken by Toyota's reaction when asked for its approval of the Unipart

We said we wanted to acquire the business and why - and did they have any objections? They said 'we don't mind but please hire these 20 people' and gave us a list of individual names. We did, of course and that gave us an early insight into the incredible detail with which Toyota tackles everything it does."

Burns and David Nicholas, managing director of the parent Unipart Industries, had no problem persuading Beans employees to co-operate. and were able to offer the inducements of improved staff status and other elements of the Unipart pack-

"They all wanted to join the 'new world', despite there being no recognition for unions," recalls Burns. (Unipart derecognised all unions two years ago, although there is no ban on membership.)

employing 40 now and an expected 50 by the end of this year. It is divided into two main areas, one working for Honda, the other for all future business. Toyota. The Honda area, which has been running for a year, is well advanced, refining the team work-

working for Honda and Toyota are Training is top priority - to achieve quality and to address the productivity issues highlighted by the benchmarking study. Fifty per cent of team members can perform every operation on the 13-machine Honda sector: 60 per cent can perform 80 per cent of the tasks and

ing systems brought from Premier

Exhausts, another Unipart subsid-

iary, as the combined experiences of

the proportions are climbing That the training bill is currently one half of wage costs also illustrates one of the key operating influences of Toyota still alien to a vast swathe of UK industry. AES invested in all the necessary systems and capacity for the Toyota contract months before production began. Eighty per cent of the con-

tract's cost base was built into the opening phase of manufacture - a proportion likely to be the norm for

"It means", says Burns, "that we have the right machines, quality standards, manning levels, training etc so that costs fall rapidly as production gets under way. The classic western approach is minimal initial investment, rectifying mistakes and outting in more investment as production builds."

Three months ago, Burns went to Japan to take part in Toyota's latest production system course. He found himself looking anew at greas where he had thought he already had a lot of the answers. He is teaching the course to AES' employees and later the whole group. The insights about waste, he

freely admits, left him initially incredulous - notably the proposi tion that up to 85 per cent of employees could not be working at any one time.

"They said that around the factory you could normally find 5 per cent of people visibly not working. But then a further 25 per cent could be waiting, even if briefly, for deliveries or for a machine to finish its cycle. Then you could have a further 30 per cent building inventory Toyota regards that as not really working because there is no immediate contribution to the manufac turing operation. Last, they figure that up to 25 per cent can be work-ing to method and requirement -but the method itself is not efficient, involving wasteful move-

ments for example.

"I got back; we checked, and found those numbers weren't far off. The problem is that UK managers tend to focus on the 5 per cent visibly not working and possibly those waiting - and are totally unaware about the rest."

The benefits arising from Toyo-ta's unrelenting attention to detail has led AES to adopt U-shaped production cells, in which one operator can move easily from one machine to another, controlling a sequence of processes, rather than operating just one machine.

Initially, each machine required an operator to press two centrally mounted buttons and watch the process begin. A visiting Japane engineer suggested replacing the buttons with Toyota's flap-type switch mounted at one end of the machine that the operator could hit with the flat of his hand at the start of his tour of the machines.

Burns acknowledges it sounds trivial, "But they are an integral part of Toyota Production System (TPS). And in saving one second they equate to 64 man weeks on the seven lines. We reckon we can save 2-2.5 per cent of the labour bill a year - that's the entire training bill for some companies".

The switches illustrate the different philosophy required for TPS. "The natural, British management response when the suggestion came about moving buttons was '£25,000 - just for moving buttons!' And on that ground, in the past, it would never have been done.

The Japanese visitor produced 185 kaizen (continuous improvement) suggestions. And AES' teams have come up with half as more again.

The application of TPS principles is already showing in productivity. On the Honda flywheels line, four men were producing 750 flywheels a week on two shifts. Introduction of the *U-cells* and related improvements, plus a third man lifted output to 1,000 a week. The third man has now been redeployed but output remains at 1,000 a week.

Premier has also introduced the Toyota U-cell system, with reported productivity gains of 30-40 per cent. Perhaps warning other European components groups about the cost and quality benefits deriving from such close links with the Japanese, one leading European vehicle producer is switching to Premier as its exhaust systems supplier.

A source of best practice

The best companies in Europe have already achieved a 10-12 per cent reduction in their material costs, according to a survey on strategic sourcing by the consulting firm Booz. Allen & Hamilton.

The survey, conducted among 238 companies in the automotive, chemicals, consumer goods, electrical and electronics, heavy equipment and industrial products sectors, shows that the majority of businesses are now managing to contain material price inflation to between zero and 5 per cent a

Purchased materials represent at least 40 per cent of turnover for more than two-thirds of the mies in the sample; in some cases the figure was as high as

80 per cent Among the characteristics of those businesses which have done most to reduce costs and increase quality are: the commitment of top management to the purchasing process, the involvement of different departments in decision making and the separation of sourcing strategy from day-to-day execution.

The research, among companie in Britain, France, Germany, Italy, Spain and the Netherlands, confirms that the traditional arm's length" supplier relationship is declining in favour of greater interaction.

Sixty per cent of those interviewed now insist on a regular presence at their suppliers. compared with 40 per cent five years ago. That trend is expected to continue over the next five years, so that the occasional visitors to suppliers will only represent about 25 per cent. Companies are reducing their

supplier base at more than 3 per cent a year - a figure which Booz says is likely to double. The majority of the worst performing companies still use individual purchase orders, while the best performers are moving to "lifetime" agreements or

multi-annual contracts. The best also achieve more with fewer resources. In many cases the smaller the purchasing department the more impressive the performance in terms of material costs, material quality and inventory turnover.

BUSINESSES FOR SALE

Touche Ross

King Taudevin & Gregson Group (In Administrative Receivership)

The Joint Administrative Receivers, G. J. Watts and N. J. Dargan, offer for sale the business and assets of the above Group.

The King Taudevin & Gregson Group undertakes major contracts for the building and installation of glass furnaces throughout the world.

The Group has the capability to undertake design, supervision and contract management of new furnaces together with furnace maintenance for the glass, cement and petro-chemical industries. The main features are:

- Group turnover approximately £13 million.
- Substantial contracts. Very experienced and technical workforce.
- Modern long leasehold office and workshop accommodation occupying 43,000 sq. ft.
- Ample car parking.

For further information please contact Grahame Watts or John Cowburn at the address below.

Abbey House, 74 Mosley Street, Manchester M60 2AT Tel: 061 228 3456. Fax: 061 236 0720. terboried by the institute of Chartered Accountains in England and Weier to carry on brownings Business

Kirby's Engineers Limited (In Administrative Receivership)

The Joint Administrative Receivers, J. B. Atkinson and A. P. Peters, offer for sale the business and assets of the above company.

- Long established manufacturers of machinery for sheet plants
- (corrugated board converters). ■ Turnover in last financial year £2.5m.
- Substantial EC exports.
- Approximately 40,000 sq. ft. of leasehold property. Own machine shop capability.
- Substantial order book.

Interested parties should contact Joe Atkinson, the Joint Administrative Receiver, or Richard Hemmings at the address below.

Colmore Gate, 2 Colmore Row, Birmingham B3 2BN. Tel: 021 200 2211. Fax: 021 236 1513.

SMALL TRAVEL AGENCY FOR SALE Price £10,000 acceptable in instalments

This is a well equipped travel agency office and has a lot of scope for a working proprietor or indeed a husband and write team.

It has been approved for ABTA and IATA so the premises are suitable It is in a good area and has considerable potential. Turnover has been approximately £700,000 per arrum and is currently £240,000.

IN THE MATTER OF THE

ORDER TO MIOW CAUSE WITY AN ORDER SECULD NUT BE ENTERED AUTHORIZING AND APPROVING LOAN PURCLASE AND SALE AGREGMENT, PURCHASE AND SALE

THIS MATTER having come before the Court upon the application of Samuel F. Fortunato, New Jersey Commissioner of Insurance and Rehabilizator of Mistall Benefit Life Insurance Company (hereafter "Rethabilizator"), through his attorneys Robert J. Del Tufo, Attorney General of New Jersey (by Edward J. Daober, Executive Assistant Artorney General) and Special Counsel to the Rehabilizator, Cole, Schotz, Bernstein, Meisel & Roman, P.A. and Codwalader, Wickershum & Tuff for entry of an Orster to State Counsel Uter & Cole, Schotz, December 1982. Meisel & Forman, P.A. and Cadwalader, Wickersham & Tall for entry of an Order to Show Cance Why An Order Should Not Se Entered Authorizing and Approving Loan Purchase and Sale Agreement, Purchase and Sale Agreement and Settlement Agreement for Mutual Benefit's Williams Island real extate project; and the Rehabilitator having filled this application along with the Certification of John A. Kostinen dated August 10, 1991, and all exhibits thereo; and the Rehabilitator having reposted a bearing date for approval of the Loan Purchase and Sale Agreement and related agreements; and the Court having read and considered the annexed Certification of John A. Kostinen and all exhibits thereo; and it appearing that it is in the best interest of Mutual Benefit's estate to schedule a hearing date on the application having been properly filed without notice pursuant to R. 4:67-2(a) because no temporary relief is sought, and the Court finding that entry of the Order to Show Cause is warranted, and for good cause shows:

If its on this 13th day of Accessed, 1993.

IT IS on this 13th day of August, 1993 ORDERED AS FOLLOWS:

 All parties on the monested Schedule A shall throw cause before the Honora Philip S. Carchman, P.J. Ch., Superior Court of New Jersey, Chancery Division Mercer County, 210 South Broad Street, 5th Floor, Treaton, New Jersey 08625 September 23, 1993 at 9:00 am or as acon thereafter as counsel may be beard why: (a) An Order should not be entered approving the Loun Purchase and Sale Agreement, Purchase and Sale Agreement and Settlement Agreement; and (b) Authorizing other and further relief as the Court may deem necessary and proper,

(b) Annoruzing other and intriner relief as the Court may deem necessary and proper;
(2) Any person or entity seeking to respond to this Order to Show Cause by filing answering certifications or affidavits and briefs with this Court shall do so no later than September 10, 1993. Such answering papers shall be filed directly with The Honorable Paul G. Levy, P.J.Ch., Superior Court - Mercer County, 210 South Bouel Street, Sth Floor, CN 977, Trenton, New Jersey 08625, accompanied by a filing fee to the Clerk of the Superior Court in the amount of S80. Any person may file a verified application to the Court pursuant to R-1:13-2 to seek a waiver of the Court filing fee by reason of powerty. Responding papers on behalf of any corporation should be filed by a New Jersey attorney, but motions for appearances and har vice may be entertained under R. 1:21-2;

(3) All answering papers filed pursuant to paragraph (2) above shall be simultaneously served upon counsel for the Rehabilitator by delivering one set of papers to Sharon M. Hallaman, Deputy Attorney General, Richard J. Hughes Justice Complex, CN 117, Thenton, New Jersey 08625 and one set of papers to Gregory II. Petrick, Esq., Calwaisder, Wickenstein & Tuft, 100 Malden Lane, New York, New York 10038, Any persons seeking access to responses made by others should connect Frances Pleano, Legal Assistant at (201) 489-3000, who will make the papers filed available for inspection at the offices of Cole, Schotz, Bernstein, Meisel & Forman, P.A., Court Plaza North, 25 Main Street, P.O. Box 800, Unckensack, New Jersey 07602-0800.

(4) The Rehabilizator shall reply to the answering papers received by him no later than September 17, 1993, and shall serve that reply upon all counsel or persons who responded pursuant to paragraph (2).

responded pursuant to paragraph (2).

(5) On or before August 20, 1993, the Rehabilitator shall serve a copy of this Order together with all supporting Affidavits without exhibits, by flest class mail to all parties listed on Schedule A, and shall publish a copy of the Order to Show Cause in the Newark Star Ledger. The Wall Street fournal. The New York Times. The Times of Treaton. The Courier Post and Financial Times, such publication to be arranged by Special Counsel to the Rehabilitator. Copies of the Settlement Agreement, and related agreements, and all Certifications and supporting papers as filled with the Court, shall also be available for inspection at Cole Schotz's office at a reasonably convenient time

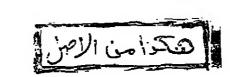

(6) Any person falling to raise timely objections to this Order to Show Cause shall be forever barred from raising such objections and that in the absence of such objections forever barred from raising such objections and that in the absence of si the Court may grant the rollief requested without further notice or hearing

Sharper Image on the box To the price of a small second-hand car or a luxury cruise, Leica Camera can sell you a pair of binoculars which contains such an array of electronic and other advanced technology that it can work out distance and direction as well as display a sharp image. The German camera and optical

1

WE'RE living in a pixel world, believes Willy Johnson, chief executive of Durant, a company better know in Japan than in Johnson's home town of Lymington, on the south coast of

Pixels, picture elements which form the images on miniature flat-screen television sets and portable computers, are Durant's business. Or more precisely, Durant is in the business of "depixellation"

getting rid of them.

The "pixel problem", as Johnson calls it, is that liquid crystal screens produce stunning pictures but are tiny. Manufacturers have been unable to produce larger flat screens because the quality control needed is exorbitantly expensive to attain. Just one malfunctioning pixel and the whole picture is ruined - and a 16.5-inch screen, for example, would need more than 1.2m pixels.

The most obvious other solution would be to blow up the picture, but then each pixel becomes clearly visible, destroying the picture quality. And this is where Durant's technology comes in.

Several Japanese games and computer makers are now testing Durant's Microsharp technology, which is essentially a series of holographic lenses. Superimposed over the liquid crystal screen, the lenses spread the light smitted by each pixel so that they merge into a continuous picture, with the light emitted from adjacent ones.

These graded refractive index (Grin) lenses are produced by exposing a sheet of photopolymer film, made by Du Pont, to ultra-violet light. Microsharp has taken eight years to develop and Johnson is confident the company has secured watertight international patents. Durant is on the point of signing an agreement with a US company for

manufacture of the lenses. After that, the possibilities for Microsharp could be endless, believes Johnson Television pictures could be displayed on large screens or projected onto walls. Helmets for virtual reality could incorporate high-quality images displayed on two screens inside the helmet. Microsharp could even be used to produce a more efficient generation of solar-powered . electricity generators.

Della Bradshaw Tons when Henri Cartier-Bresson,

表 电空气控制

company has deliberately made its new product - called the Geovid as simple to use as possible. Apart from a small wheel to adjust the eyepieces, there are only two con-trols: one button to read the distance, another for the built-in com-

pass.
"We wanted to keep the electronics in the background," says Thorics in the background, manager sten Kortemeier, product manager for binoculars. "We don't want to sell mainly to technology freaks. We want to stress the uses."

Despite its DM6,500 (£2,576) retail price (UK cost is about \$3,000), this year's production run is already sold out to yacht crews, balloonists, mountaineers, foresters, hunters, surveyors, rescue services and other specialised interest groups. For a renowned camera maker

such as Leica, the Geovid is an musual departure. Not only does it draw on technology from other parts of the Leicz group, owned by Swiss industrialist Stephan Schmi-dheiny, it is made in Switzerland by the sensor division, rather than at Leica's headquarters north of Frankfurt near Wetzlar.

The camera side, however, provided the technology for the sophisticated lenses, which have wide prisms – porro prisms – for better light transmission, even in fading twilight. "We want to become stronger in sporting outler better light could be a supported to be the support of the source of the ger in sporting optics [binoculars]."
says Warner Simon, chief executive
of Leica. "The Geovid is part of that strategy."

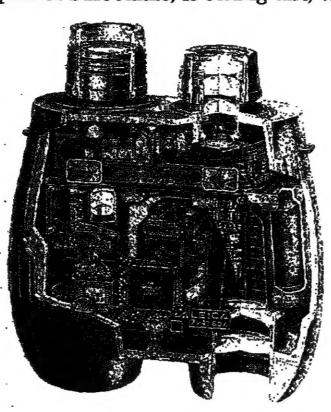

The new binoculars use infra-red laser beams to measure distance, with a microcomputer making calculations to the nearest metre up to 1,000m or more. A digital magnetic compass works out the angle of direction, even when the binoculars are tilted. The user simply presses one of the two buttons twice, once to fix a red aiming light on the target and again to display the mea-

Yet however successful the Geovid proves to be, binocular sales will continue to be dwarfed by sales of the company's classic and robust cameras and lenses, projectors and enlargers, together accounting for 80 per cent of business. Last year, Leica Camera's turnover rose by 3 per cent to DM214m.

·The company's reputation is based on its camera work, with advances in lens, mechanical and electronic technology matched by a typically German dedication to con-

New focus for camera maker

Leica's latest and unlikely product, a sophisticated pair of binoculars, is selling fast, writes Andrew Fisher

A different image: Leica's binoculars appeal to special interest groups

the French photographer, was presented with a new Leica camera on his 75th birthday in 1983, he declined the offer of a new lens, says Simon. "He took out the lens he had owned since 1964, fitted it into the 1983 Leica with a neat plop, and said 'Voilà, oa c'est Leica'."

There are other intriguing Leica anecdotes. A few years ago, perched precariously on a Nepalese rockface to take pictures of wild honey gatherers, Eric Valli, a French photographer, dropped his Leica lens. When he found it, the lens was still usable in spite of a fall of 80 metres, with no optical damage and only a slight centring error.

Leica's reputation is bolstered by such tales. But, as Simon stresses, it takes more than stories to protect the company's position as a producer of quality, consumer products. Leica's spending of a high 4 per cent of turnover on research and development underlines this point. "We're not in our niche because of 'the myth of the past'," Simon adds. "A myth lasts perhaps five years, but quality has to be achieved anew each day."

The first Leica camera was shown in 1925 at the Leipzig trade fair. although Oskar Barnack, its inventor, made the prototype before the first world war. The camera was made by the Leitz microscope company, the word Leica deriving from Leitz camera.

Since then, Leica has developed a unique position as a maker of products which meet the most demanding standards and are priced accordingly. Along the way, the company has had to cope with the almost total dominance of Japanese compa-

nies in the photographic sector. Its main German rivals such as Rollei, Zeiss Ikon. Voigtländer and Agfa have either left the camera scene or occupy much smaller segments.

In common with Hasselblad of Sweden, which makes medium format cameras - totally different from Leica's 35mm products - the German company occupies its own corner in the world camera market. Leica's speciality is the M6 range-finder camera – a descendant of Barnack's original camera – which combines high-speed lenses with highly accurate focusing and an almost noiseless shutter release.

In the single lens reflex market, where Japanese companies such as Nikon, Minolta, Canon, Pentax, and Olympus predominate. Leica has developed its R-series, the latest R7 automatic version costing DM3,900 (£1,795 in the UK); lenses are extra, from DM1,180 to DM32,000.

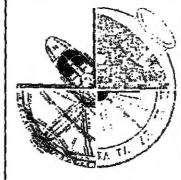

Simon says Leica has weathered the worldwide recession well, but admits it can no longer raise prices as it would like. Its move five years ago to a new building in Solms, near Wetzlar, has belped it hold down production costs. It also offsets some of the high expense of doing business in Germany by carrying out pre-assembly and other work, such as small binocular manufacture, at its plant in Portugal.

Leica's main lens work is kept in-house. It has spent DM1.2m on a computer-controlled lens manufac-turing line in Solms, cutting the time taken to grind, polish, coat and mount its complex lenses from 12 to three weeks and lifting productivity by 20 per cent.

Final camera assembly takes 26 hours; the rangefinder alone for the M6 camera has 104 parts. Thus, says Burkard Kiesel, vice-president for development and operations, further efficiency gains will be elusive. even with the most advanced design and production software.

"It's hard to see what further savings we can make without losing any features on our products," says Kiesel. Leica's profitability will depend on customers' continuing willingness to pay heavily for top quality products. The innovatory Geovid will be the latest test of the company's high-priced appeal.

New glass shatters car-jackers' plans

A shatter-proof glass, developed for the windows of jet airliners, could soon protect the domestic where the windows of a stationary vehicle are smashed by a thief intent on removing

Developed by Pilkington Aerospace, the glass has a plastic inner lining bonded to it. The plastic, part of the polyurethane family, is "self-healing" so that if scratched it returns to its original form. It would take a thief up to 50 strong blows to break through the new glass. The plastic lining also prevents shards falling into the car if the glass

Pilkington believes the technology will be used first in VIP and police cars, as it would dd several hundred pounds to the cost of a new car. Pilkington: 021 451 3901.

HealthBlend packs a purrrfect diet

You are what what you eat, they say. The maxim could be as true for pets as it is for their owners. HealthBlend is described by manufacturer Hill's Pet Nutrition as the first "healthy" pet food. to be sold exclusively through veterinary surgeries. Hill's say the scientifically-balanced diet of calories, protein and phosphorous can prevent liver and kidney disease, obesity and even hypertension. There are two feline versions and three for dogs - including a special recipe for the "Canine Geriatric". Hill's: US, 913 354 8523.

travel, the US division of the Japanese games company has developed an in-flight version of its popular 16-bit Nintendo Entertainment System.

The Gateway System offers passengers an LCD television monitor to choose between 10 games, four to six movies, and a range of information and shopping services. The central controller is built into the cabin

management system. In conjunction with the LodgeNet Entertainment Corporation, Nintendo has adapted the system for use in botels and ships. Nintendo: US. 206 882 2040.

Secret boost for welding process

A welding technique, developed by the Paton Institute, in Kiev, promises to increase Tig (tungsten inert gas) welding productivity in the west by a factor of 10.

The process involves painting the metal parts to be welded with a non-toxic paint which constricts the arc inside the metal during the welding. While stainless steel or titanium welds of 2-3mm are common outside the Ukraine, the Paton Institute regularly welds metals 10mm thick, using

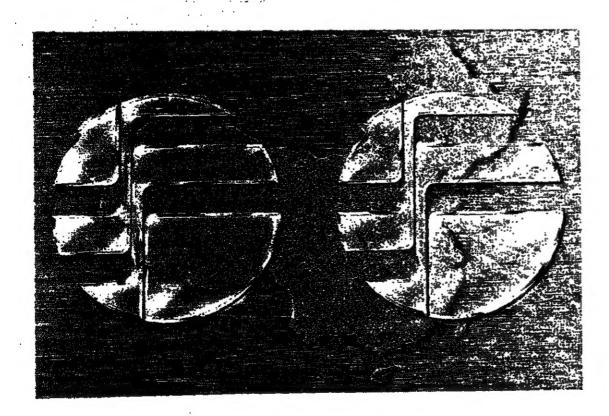

the same amount of gas. The institute, which is represented by the Welding Institute in Cambridge, is keeping the chemical formulation a closely guarded secret. Paton Institute: Ukraine, 44 227 4353. Welding Institute: UK, 0223

Coconuts crack tool coating

The coconut could prove to be one of the industrial diamond's best friends.

Researchers in Germany have developed a novel way to diamond-coat tools and components based on the hydrogasification of charcoal. The best results have been obtained with charcoal from coconut shells. Unlike conventional

hydrogasification processes, the method developed at the Frauhofer-Institute for Surface Engineering and Thin Films uses a closed circuit, preventing the escape of gas. The process is therefore kinder to the. environment. Frauhofer-Institute: Germany, 40 5472 1860.

The heat is still on

THE PROPERTY MARKET

bbey National's costly exit from the estate Despite a recent revival, pressure agency business with the sale this week of remains intense on surveyors, savs Vanessa Houlder its Cornerstone chain illustrates the depressed value of residential property agencies. Commercial property agents: rising value This is in contrast to commer-

operty and the reduced availability of loan finance for property," it said.

Some other pockets of business such as valuation, management and rate assessments, are proving robust. But property advisers are still struggling with agency work - the bread and butter of most businesses. Agents say that an upturn in enquiries has not translated into a take-up of space. Although retail property is begining to stabilise, few agents expect a general upturn

in rents before next year. Rent review work is also sharply down as a result of the slump in rental values. Taken as a whole, the value of the property services market has fallen by more than 6 per cent to £843.3m over the past year, according to the Chartered Surveyors Survey, published by the Economic Development

Briefing, a research group. The survey found that agency and financial services suffered a decline in revenue of more than 25 per cent over the past year. Only professional services such as rate assessments, valuations and legal and planning produced increased revenue. The practices which have

with valuation, management and rating businesses; the hardest hit have been those which depend on income from lettings and deals. Yet many practices remain in severe difficulties; there have many instances of cash

fared best have been those

being squeezed," says Mr Clive Lewis, president of the Royal Institution of Chartered Sur-

mergers and more job losses.

he recent spate of mergers has caused some consolidation in what is still a highly fragmented sector. The top three surveying practices, DTZ Debenham Thorpe, Chesterton and Jones Lang Wootton, each have a market share of more than 5 per cent, according to the Chartered Surveyors Sur-

vey.
"It must be likely that with too many firms of surveyors chasing a contracting traditional market for fees, more ergers will follow, with more hardship for individual employees," says Mr Lewis.

Anecdotal evidence suggests that the shake-out of staff has begun to ease. In any event, demand for new recruits is likely to remain subdued until there is more convincing evidence of a market upturn.
"It is still pretty bleak," says

Ms Vivienne Packer, an executive search consultant at Alexander Hughes. She notes, however, that there is demand for some specialisms such as facilities management, which are are expanding in an effort to offer a more complete ser-

Nonetheless, the industry

has shown little evidence of having benefitted from the shake-out and capacity cuts. As existing partnerships have shed staff, many of those displaced have formed their own practices. This has boosted competition and kept fees down to barely profitable levels. Until there is a convincing recovery in the property market, the pressure will remain intense on all but the bestplaced practices

On August 19 1963 Noel Jervis walked through the door of Courtaulds to start breadth and credibility of their his first day's work with the company as an apprentice accountant. Diligence clearly pays off. Yesterday 30 years to the day, Jervis, who will be

Upheaval at Abbey National

The departure of Stewart Gowans, 38, the man responsi-ble for refurbishing Abbey National's public image, has precipitated an unusual amount of upheaval in Abbey National's public relations

department.
After seven years as head of corporate affairs at Abbey National, Gowans has set up his own consultancy - Meridian Corporate Communications. Along with partner Trevor Gardiner, he has taken offices in Leicester Square. Gowans, who had indicated some time ago that he intended to move on quit in May and Paul Barber and Paul Burgen, two other members of Abber's pr team, have left within the last month.

Abbey National has decided

to replace Gowans with an to replace Gowans with an insider. Jane Ageros, 29, (below) a Cambridge classics graduate, joined Abbey in 1989, after working as a pr consultant with Broad Street Associates, the firm which handled Abbey's conversion to a public company and flotation. Leena Nagrecha has been appointed joint secretary of Abbey National Treasury Services in place of Ray Magan.

NOTICE PUBLISHED BY THE SECRETARY OF STATE UNDER SUBSECTION 8(5) OF THE TELECOMMUNICATIONS ACT 1984 The Secretary of State hereby gives notice as follows.

- He proposes to grant a licence under the Telecommunications Act 1984 ("the Act") to Telstra (UK) Limited ("the Licensee") to run telecommunication systems throughout the United Kingdom. The licence will be for a
- The principal effect of the licence will be to enable the Licensee to install and run tele the principal effect of the incence will be to enable the Licensee to install and run feecommunication systems throughout the United Kingdom. The Licensee will be able to provide a wide range of services but excluding mobile radio services and certain international services. The licensee authorises connection to a wide range of other systems including earth orbiting apparatus allowing the provision of some types of international satellite service. On securing a share of 25% or more of the market in respect of particular services in an area specified by the Director General of Telecommunications, the Licensee may be obliged to make available those immication services to all who reasonably request them within that area.
- The licence will be subject to conditions such that section 8 of the Act will apply to it, thereby making each of the systems run under the licence eligible for designation as a public telecommunication system under section 9 of the Act. It is the intention of the Secretary of State to designate each of the Licensee's systems as a public telecommunication system.
- The Secretary of State proposes to grant the licence in response to an application from the Licensee for such a licence because he considers that it will help to satisfy demands in the United Kingdom for the provision of services of the type authorised, will promote the interests of consumers in respect of the quality and variety of such services, and will maintain and promote effective competition between those engaged in the provision of
- Representations or objections may be made in respect of the proposed licence. They should be made in writing by 8 October 1993 and addressed to the undersigned at the Department of Trade and Industry. Telecommunications and Posts Division, Room 2.84, 151 Buckingham Palace Road, London, SW1W 9SS. Type of Business

Reich's 'The Cave' reaches London

n quick time *The Care* has proceeded from Vienna (premiere in May) via Berlin and Amsterdam to a six-day stint at the London South Bank centre. Paris, Brussels and New York are set to follow. The music-theatre-cum-documentary epic by Steve Reich (music) and Beryl Korot (video images) is receiving a high-class launching. Reich's status, and the fact that this is the latest, largest and most ambitious of his multi-medium compositions, would seem to demand no less.

医医疗性 医克里德斯氏氏征医疗性 化二次二二

As Andrew Clements reported on this page in July, after the Amsterdam Festival showing. The Care is a three-part, three-hour melange in which excerpted interviews are interleaved with visual images and musical episodes inspired by the presence and the actual words of the interviewees. The purpose is to contrast Jewish, Arab and American attitudes to a crucial piece of

Holy Land religious history – the relationship of Abraham, Sarah, Hagar, Ishmael and Isaac – in a way to pinpoint conflicts, dilemmas and misunderstandings both ancient and modern. Act 1 is the Israeli act, Act 2 the Palestinian; in Act 3, which focuses on the much more detached responses of Americans, threads of summing-up are drawn together.

As witnessed at the opening Festival Hall performance on Wednesday, the installation gleams and glitters impressively - a large metal set-up enclosing five video screens amid walkways and stations for singers and players, a structure. simultaneously practical and poetic. The package is expertly glossy, the presentation faultlessly crisp and confident. The technological aspects of the three-part unfolding, the linkage of "live" musical sounds and statements and screened pictorial and verbal information, are

achieved with considerable dexter-

For a while the fascination with "how do they do it?" keeps concentration from flagging. Thereafter nothing can disguise the banality of the experience, the fidgety, flattened-out, repetitious quality of juxtaposed statement and counterstatement, the stupefyingly predictable patterns of Korot's image-creating devices. Amplification of all the sounds crushes the dynamic range to a uniform loudness, restricting the expressive range of the "live musicians in wearying parallel. In interview Reich has made

much of the way his musical lines pick up and underscore the inflections of all the speakers, essaying comparisons with Janacek's celebrated method of creating musical cells out of "speech rhythms" that in no way work to his advantage The systemic patterns of Reich's musical lines, which could well bear repetition on their own, become nightmarishly tedious when linked to words far less capable of supporting similar repetition. Quite soon into Act 1, as a phrase such as "Almost a pale figure" issued from the speakers for what seemed the millionth time, I wanted to scream 'Yes, yes, we get the point, now for heaven's sake get a move on!"

in sum, I though this a project boldly imagined but, in terms of basic material, numbingly dull, insubstantial and longwinded in the execution. If, as has already been loudly proclaimed, this is "serious art for the MTV generation" and "a glimpse of what opera might be like in the 21st century", then all I can say (with Samuel Goldwyn) is: include me out.

Max Loppert

Royal Festival Hall. London SEI: daily performances until Monday

Michael Glover on Jean-Michel Basquiat

is trajectory was that of a shooting star. Discovered on the streets of New York City by an art critic before he reached the age of 20, where he was scrawling graffiti (signed: SOMA) on the walls of Soho and Greenwich Village; quickly taken up by dealers and galery curators alike; followed by an estonishing, though fitful, flow of work that ended abruptly at the age of 27, when he died of heroin addiction like two of his heroes, the musician Jimmy Hendrix and the singer Janice Joplin.

That is the life-story of Jean-Michel Basquiat, quintessential New York painter of the 1980s, who recently enjoyed a major retrospective at the Whitney and is currently having a second large show, in Europe this time, at the Museum of Contemporary Art in Lausanne.

Basquiat, Puerto Rican on his mother's side, Haitian on his father's, was both more and less than the legend of his life. Though born in Brooklyn, his childhood was not a deprived one. Though his art blazes with anarchy, he was not the wild, untutored boy that his early sponsors sometimes pronounced him - and perhaps even hoped he might be. He drew from childhood onwards and his mother nurtured passion for painting and drawing by taking him regularly to the major museums and galleries of New York City. The work itself is full of painterly references.

The Lausanne show charts his progress year by year, though that

go to the loo. He pulls out his penis

Iggy Pop 25 years on

If Iggy has learnt anything in 25 and hops round the stage like a

ears on stage it is how to exploit naughty child who does not want to

In a sense, there was no progress was all too burried, too explosive, too frenetic. What his paintings and recordings record, in canvases that teem with signs and symbols, words combining street slogans and menu listings, images of African masks, cartoon heroes and much else, are the violent disharmonies of his own inner and outer worlds - that trick he had, for example, of scribbling a statement across a painting and then immediately crossing it out.

Basquiat has been many things to many critics. Because he painted images of Lester Young and Charlie Parker, and himself played the clarinet and the synthesiser, he is said to be predominantly a jazz artist and his paintings and drawings the visual equivalents of jazz improvisation. Because his mature work grew out of a graffiti-based art and he once took it into his head to list the per capita incomes of the states of America down the middle of one of his canvases, he is said to be a political artist. Because he used so much language in his work and juxtaposed his words with such unpredictably humorous results, he was according to yet another, a concrete poet of the first order.

Two things are certainly true. In the words of one admirer. "he lived his life like a fire: he went out with the coals still hot." And he had a marvellously insolent way - like the young Bob Dylan - of seeing off some of the parasites who surrounded him: interviewer: "Do you have any Haitian primitives at home?" Basquiat: "What, you mean

lizison provide a sparser, even - in the case of "China Girl" - melodic contrast, without sacrificing the

The show ends with a chaotic encore; more stage diving, more trouser dropping. Beer glasses start to fly, one particularly large fan tries to wrestle his way on stage. And Iggy drags rock music back into the primordial ooze with a basic version of "Louie Louie", the most basic of rock and roll songs. He has squared the circle, proved that the basics of rock music have hardly changed in 30 years. Here is the raw stuff from which life forms as diverse as Deep Purple, the Sex Pistols and Nirvana evolved. Scientists should take samples of Iggy's DNA for the benefit of later generation.

speare's difficult late verse. The scene in which Pericles recognises his lost daughter Marina forms a wonderful, tender moment, as she sings the old king out of madness and back into the world. This gathers Lear and Leontes in an instant: "Oh you gods. Your present kind-ness makes my past miseries sports.

As Pericles, Philip Bowen ages gracefully and mirrors the challenges he meets, whether in the assertive Cleon (Colin Mace) at

1970s. Not all of them are immedi-

ately recognisable and the diction

Shakespeare wrote Pericles (1607-8) with a little help from his friends, the novelists George Wilkins and Laurence Twine. Dr Johnson ignored it, and Ben Jonson called it "a mouldy tale" albeit in one of his own freshest plays. The play looks like a dry run, or rather a wet run given the engulfing sea images, for The Tempest or The Winter's Tale. As Pericles sails the eastern Mediterranean, the play becomes another Odyssey, full of shipwrecks, chance encounters.

fatal meetings and warm reunions.

John Retallack directs with great tact and intelligence. He has sensibly cut the text. He draws out the play's mysteriousness and recognises Shakespeare's debt to music an agency for the supernatural It comes over as magic realism theatre, compered by the ghostly figure of John Gower (played by Leader Hawkins), called up to arrange the action and introduce each scene.

However, the set detracts from the illusion created by the words. It runs round three sides of the stage. the bottom half a covered walkway backed by ropes banging like dry ing fettucint, but the top half unused and redundant. The lighting (Raymond Cross) is so apt and sensitive that the set becomes superfluous, the more so because it never contributes dramatically and because a narrator is on band to massage the imagination.

The overall effect, however, is beguiling. The sea storms are excellent, with two sets of parallel poles representing the wave crests, bearing up and spewing out the swimmers, and the music (Karl James)

an unobtrusive delight. But the costumes could be better: the women in Pentapolis look to be wearing curtains suspended from their elbows and wrists.

Most of the cast negotiate Shake-

Tharsus, or the elegant Simonides wife Thaisa (Ginny Holder).

immensely enjoyable.

The production opens somberly, the cast circling in plain, dark costumes. It begins a beautiful unravelling of this tangled farce. Just as an actor playing a drunk must do everything possible to strive for sobriety, so good farce should tether itself to seriousness. Like many pleasures, farce involves anticipation and delay; the end of the play should be the end of satisfaction, as

motley and red-nose school of slapstick Errors. Each individual makes

the best of what is available, and treats every instance of mistaken identity not as a mistake but as the

world as it is.

The serious approach also allows the characters to step into soliloquy, as Antipholus of Syracuse, newly arrived in Ephesus to find his twin brother, muses on his state: "! to the world am like a drop of water / That in the ocean seeks another drop." The aside which Dromio indulges on the charms of the cook also fits into place as a piece of whimsy in a serious situation: "She's the kitchen wench and all grease ... if she lives till doomsday, she'll burn a week longer than the whole world."

The fine judgment falters in only one dreadful scene, where a quack comes to cure Antipholus of Ephesus and wastes the scene by camping around with bells and whistles A few illegible doctor's notes would have been much funnier. Again, the set seems incidental to the action: the costumes here are fine enough and the acting strong enough to sustain something more minimal and risky.

The acting fizzes and bubbles. The two Antipholuses (Grant Parsons and Philip Bowen are uniformly alike each other, even to the extent of deating their twin ser vants, the two Dromios Anthony Howes and Clive Duncan). This bemused quartet is battered around the stage by Adriana, the termagant wife to Antipholus of Ephesus, played with gattling-gun speed by Susan Colverd. She sends insults, blows or pleasantries with equal vigour and is well supported by the other women. Luciana her willowy sister (Catherine Prendergast, mantilla resembles an whose extended vegetable steamer) and the local courtesan slinkily played by Ginny Holder.

The productions tour to: Arundel (Aug 31-Sept 4). Bury St Edmunds (Sept 13-18), Bracknell (Sept 20-15), Crawley (Sept 29-Oct 2); Osaka (Oct 6-11), Tokyo (Oct 13-17), Stirling (Oct 26-30), Taunton (Nov 2-6). Watford (Nov 9-13), Swindon (Nov 16-20). Winchester (Nov23-27), and Harlow (Nov 3-Dec 4)

A new era at the English National Opera begins next Thursday with the first performance under the incoming management team of Dennis Marks and Sian Edwards. But much of their initial programme is taken over from their predecessors: the opening two weeks, for example, are given over to revivals of Simon Boccanegra (with Gregory Yurisich in the title role) and Street Scene (with Josephine Barstow), while David Pountney and Mark Elder - pillars of the old regime - feature prominently

in the course of the season. The first new production is La boheme on September 15, staged by Steven Pirnlott and conducted by Edwards, with a cast led by Roberta Alexander, Wagner returns to the ENO for the first time in eight years with a new production of Lohengrin (Nov 20), conducted by Elder, produced by Tim Albery and designed by Hildegard Bechtler,

with a cast led by Edmund Barham. The season's other new productions are Smetana's The Two Widows produced by Pountney, starring Marie McLaughlin (Dec 20), Der Rosenkavalier conducted by Yakov Kreizberg and staged by Jonathan Miller, with a cast led by Anne Evans and John Tomlinson (Feb 2), the world premiere of Judith Weir's Blonde Eckbert (April 20) and Cosi fan tutte with Vivian Tierney (May

Madama Butterfly opens the Royal Opera season on September 11 (with Diana Soviero and Neil Shicoff), followed by L'Italiana in Algeri starring Marilyn Home and Ruggero Raimondi (Sep 18). The first new production is Die Meistersinger on Oct 8, conducted by Bernard Haitink and staged by Graham Vick, with a cast led by John Tomlinson, Thomas Allen and Nancy Gustafson. The season comprises 20 operas, seven of them in productions new to Covent Garden. These include Massenet's Chérubin conducted by Gennadi Rozhdestvensky (Feb 14), Giordano's Fedora with Mirella Freni and José Carreras (May 9) and Aida conducted by Edward Downes and staged by Elijah Moshinsky (June 16). Among the revivals are Eugene Onegin (Oct 21), Tosca (Dec 4) and Gawain (April 14).

gling after three years of heavy losses, once had high hopes that the government would help them return to health. But now they realise they will have to find their

A much-heralded report from a government commission on airline competitiveness was not even off the presses before important recommendations started to fall by the wayside.

Some of the more ambitious suggestions are widely viewed in Washington as having only a slim chance of passing Congress - notably the proposal that foreign companies should be allowed to raise their voting stakes in US airlines to 49 per cent from 25 per cent. In the past, Both British Airways and KLM, the Dutch national carrier, have had plans to take large stakes in loss-making US airlines frustrated by this

The commission also recommended exempting airlines from the new transportation fuel tax included in President Bill Clinton's budget. But in the search for revenues to wrap up a deal that would get the budget through Congress, the exemption was trimmed back to two years only.

In many ways, the commission, set up in April, has come along too late. Its recommendations have had no influence on the budget debate.

Above all, most big carriers have already taken significant measures to restore profitability, by downgrading some expensive "hub" airports, and cutting domestic networks to concentrate on profitable new sources of revenue from providing logistical and consultancy services to other airlines.

It is as well that they have done so, for the commission concluded that the airline industry's problems were not so much the result of structural dysfunctions that could or should be remedied by government as of the airlines' own

The report notes that much of the decline in profitability has occurred in short-haul markets because of competition from low-cost airlines.

"Average yield declines in these markets are not indicative of irrational pricing behaviour, but of the fact that a large proportion of domestic traffic flies in markets where these low-cost airlines operate. While this development has depressed the yields and profitability of higher-cost airlines in the short term, it is evidence of

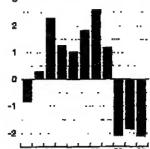

Airlines must fly solo

The US government will not rescue the industry. says George Graham

a dynamic competitive process," the report concludes, This process has by no means worked itself out. Southwest Airlines, the one leading carrier that has remained profitable, is expanding to the north-east, and is currently engaged in a fare war with USAir which has seen prices for a Baltimore-Cleveland ticket drop as low as

The report also points the finger squarely at management

errors. "The industry itself, primarily by taking on excessive debt, must bear its fair share of the burden for its current state." the commission writes, citing the 1992 summer fare war, and a pattern of ill-timed expansions, as well as the creation of too many connecting

Nevertheless, the report does identify some areas where government could take measures to help the industry.

In the tax area, the commission concludes that the federal government places a large and disproportionate burden on the airline industry, which should "no longer be viewed as revenue generating machines for the government".

Besides the recommended two-year exemption from the transportation fuel tax, the report argues for rolling back the ticket taxes levied on airlines, However, the current reluctance of Congress to pass anything which reduces government revenues makes this proposal seem unlikely to generate much support. Scepticism over congressional reaction is shared by the International Air Transport Association, which represents most of the world's airlines.

More radically, the commission proposes a complete restructuring of the Federal Aviation Authority as an independent corporation, which would remain under government control but would have its own budget sale from mids by Congress and would be able to issue bonds to finance capital improvements. Such improvements are badly

needed, the commission says. It also advocates a satellite hased navigation and control system which could save the airline industry \$5bn a year through reduced delays and improved routing.

The prospects for effective modernisation are not encour-aging. The authority is behind schedule and billions over budget on its 1982 modernisation plan. The commission recommends a public-private consortium to develop and implement improved technology.

In the international arena. the commission argues for a complete redrawing of the patchwork of bilateral air traffic agreements that governs world aviation, urging an effort to reach liberal multilateral agreements. The US is in the middle of renegotiating a bilateral accord with the UK and is about to start talks with

A multilateral air agreement is viewed by most industry observers as a distant pipedream. The advantages of such an accord would accrue disproportionately to the US. But it is unlikely to be agreed at all as long as Congress remains reluctant to permit foreigners to own bigger shares in US air-

In the end, the cure is in the

hands of the carriers and their

ability to take advantage of a slowly improving economic clilearned...in the future they will be more conservative." says Mr Clifford Winston, an economist at the Brookings Institution, a Washington think tank. Additional reporting by Lisa Bransten and Daniel Green

ritain's A-level exami nation results, which yesterday showed more pupils passing and at better grades than ever before, have intensified a funding crisis at universities. Ironically, this success will almost certainly mean other students having to pay at least part of their tuition bill in the future.

Universities have made more offers of places than they can afford. No student who has fulfilled the conditions set will be turned away this year, but universities will reject more candidates than usual who have only narrowly missed their target results. Unless more money can be found, next year they will reduce the number of places on offer.

The latest dilemma for universities comes after a war of attrition with the government over funding that has lasted since the early 1980s. Ministers are eager for more students to enter higher education, but have not addressed the other side of the equation: how the extra places are to be paid for. Mr John Patten, education secretary, who should return to his desk on Monday after a period of illness, knows that to put fresh burdens on middleclass parents would add to the government's political woes.

Political decisions taken in apparent haste have not helped. The problems created by the A-level results follow a cut in government funding for classroom-based (mainly arts) subjects announced December, when most offers for places for the 1993-94 academic year had been made.

Adding to the pressures applications for the academic year about to begin have increased by between 6 and 7 per cent. And yesterday's results show that the propor tion of A-levels passed with one of the top three grades usually required by universities - rose by 1.6 per cent.

Something must now give The most likely result is that those universities that have to accept more students than they can afford this year will cut back the offers they make next year by several thousand.

Such forces lie behind the report today of the Committee of Vice-Chancellors and Principals on alternatives for raising extra finance for higher education from students themselves. Without extra funds from somewhere, the committee warns, the ideal of mass higher education, as envisaged by the Lord Robbins' committee of inquiry report in 1963, would have to be abandoned. University heads will debate the vari-

Out of pocket for making the grade

John Authers says good A-level results may mean students paying more for university education

ous forms of taxes on graduates and announce a favoured alternative at the end of a meeting of the vice-chancellors committee on September 23.

For the government, the prospect of raising an extra tax, even if it affects only one section of the population, is not appealing - particularly one that is likely to hit more affluent families the hardest. In 1984, faced with a revolt

by backbench Tory MPs and by many middle-class parents, the Thatcher government executed a climbdown over the then education secretary Sir Keith Joseph's proposal that students should pay towards their tuition. With a smaller parliamentary majority. Mr John Major will be reluctant to risk a repeat of that episode. So the "awkward game of

tennis", as one vice-chancellor puts it, between the government and universities, over who should take responsibility for a decision on raising funds from students, has continued. An earlier shot came in May vice-chancellors

when vice-chancellors requested an extra £3.2bn for capital spending on top of sums already announced for 1993-94 They claimed £1.35bn of capital funding was needed just for backlog maintenance to buildings. It also asked for £581m for capital spending on teaching, and 55,000 more student beds over the next three years, at a cost of £818m.

With the public sector borrowing requirement already approaching £50bn the request was unrealistic, as the committee knew. But the intention was to publicise the amount that universities needed, and to make it clear that the money would have to come from elsewhere if necessary.

in June, Professor John Ashworth, head of the London School of Economics, unveiled a plan to make LSE students pay top-up tuition fees, with means-tested bursaries for those with difficulty paying.

To the government, his announcement opened up the possibility of universities shouldering the opprobrium for introducing fees. Mr Tim

From Prof Steve H Hanke.

Sir. Your editorial. "An

entente that remains elusive" (August 12), concludes that the

French and Anglo-Saxon views

about currency speculation are

in sharp contrast with each

another. The French treat spec-

ulative activity as immoral whereas Anglo-Saxon countries

consider it a legitimate and

integral part of the free-market

process.
The ink had not yet dried on your editorial before Mr

Edouard Balladur, France's

prime minister, confirmed your

thesis. Indeed, on the evening

of August 12 Mr Balladur casti-

gated speculators and called

for reforms to clamp down on

them President François Mit-

terrand joined the French cho-

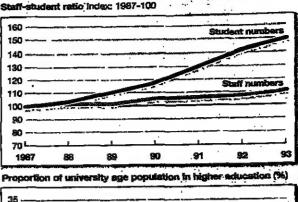

rus the next day when he said:

"I find it insane and immoral that speculation, using billions

of dollars, can have its way

against states representing their people's interests and

91 92 93 94 95 96

Boswell, higher education minister, refused to block Prof Ashworth's plan, although he denied he would encourage it. In the end, the ruling academic board of the LSE voted against the proposals.

Today the vice-chancellors' committee has taken the debate further by suggesting four methods of raising mone from students, which would all delay payment until the students have graduated and are earning salaries. The idea is that the income of a pupil's family should have no impact on their decision to apply and that graduates who choose not to seek higher paid lobs should

not be disadvantaged The options are:

 A graduate tax. Graduates would pay a higher rate of income tax then non-graduates throughout their working lives. Graduates could start paying the extra tax once their level. All funds raised from the tax would be earmarked for universities

 A tuition fee paid through a loan. Repayments would be made via higher income tax payments, as with a graduate tax, so those with lower incomes would take longer to repay. London Economics, the consultancy which produced

the report, suggests funds could be provided by either the Treasury or private banks, with the government guaran teeing against defaulting. A similar system has recently been introduced without great controversy in Australia. A fee for students' living

costs again paid with a loan, repayment of which, made after graduation, would be linked to the tax system. Under this scheme, students would decide the size of the loan they wished to take out.

· Top-up tuition fees, again with a loan linked to the tax system. Institutions could exercise an option to set fees higher than those provided for by the public finances. This could add a controversial extra dimension to competition between universities.

Although the report does not make a definite choice, it appears, on criteria such as cost, flexibility and acceptability, to favour the Australianstyle system of tuition fees paid via state-subsidised loans. The graduate tax would raise the most revenue and be the cheapest to administer, but London Economics says it is the option likely to be opposed most by students.

All the schemes, with the exception of the graduate tax, would require significant government subsidies, in the form of cheap loans.

University principals are pressing for an early government response to the report. They point to the expansion in student numbers over the past four years, resulting from a deliberate government policy of promoting higher education and until this year, increasing Treasury subsidies for tuition fees. In England, the number of students has risen by 46 per cent to 753,000 in the past four years, according to the Higher Education Funding Council equivalent to creating 20 new large universities the size of those at Leeds and Manchester.

Faced with the public finance squeeze, the government wants expansion to slow down. Hence its decision to cut mition fees this year. The distress felt by this week's A-level candidates has revealed the crudeness of the government's control mechanis

With the publication of today's report, the ball is back in the government's court. Itmust make a decision soon if the benefits of Britain's swift expansion are not to be lost. Speculation an inevitable result of ERM

ter in the most recent socialist government, reacted to the events of September 1992 with remarks that were destined to gain him a prominent place in the foreign exchange annals. He said: "I will fight, we will fight, France and Germany will fight this speculation, which is based on no economic fundamentals. During the French Revolution such speculators were known as 'agioteurs' and then were beheaded."

Alas, whenever their curren-

cies are weak, politicians on the Continent embrace primitive ideas about speculation and concomitant conspiracy theories. This is an old and venerable tradition. For example, towards the end of the 16th towns in northern Germany, then on the decline, accused the Merchant Adventurers, English businessmen specialising in imports, of immoral speculation against league's currency.
Using speculators as scape-

goats is just a pathetic ruse to cover up bad government policies. If politicians were consist ent they would not only criticise speculators when currencies were weak but would also sing their praises when currencies were strong. That, of course, would be absurd. Government policies. not speculators, cause currency values to fluctuate. Spec ulators are just the messengers

who deliver the news. In the interest of elevating understanding about exchange rate regimes the French politi-cians should eat some humble pie, eschew their planned summer reading and delve into serious economic literature. A recommended point of departure is "Achilles hoels in monetary standards", in the American Economic Review, March 1940. That classic article by Professor Frank D Graham describes why pegged but adjustable exchange rate regimes, such as the exchange rate mechanism, open the floodgates of disruptive, almost riskless, speculation because sure things never lack enthuslastic takers. . including banks that are shrewdly

Until the ERM is abandoned to the proverbial dustbin of history we will see the same scenario repeated over and

Chemicals industry improving its record From Mr John C L Cox.

Sir, The UK chemicals industry is one of Britain's most successful manufacturing sectors and one of the most frequently criticised on environmental issues. Yet it is almost certainly the sector most publicly committed to improving its environmental performance

Since 1989 the industry has adopted the international Responsible Care voluntary programme for performance improvement in health, safety and environment matters. My association represents most of the UK industry and membership is conditional upon participation in the Responsible Care programme. We have just pub-

lished, as a first for UK industry, a three-year range of Responsible Care performance data for the industry. We intend to publish more. Deepening recession may have caused environmental

priorities to wane elsewhere but not in the chemicals industry: Despite the recession the sector has continued to spend an increasing percentage of its total capital outlay on environmental protection. Indeed, in 1992 the industry made capital and operating expanditure totalling £1bn on environment protection. Less than 55 per cent of that was required in order to comply with legisla-

There are a range of prob-lems associated with developing and implementing environmental legislation at European Community and UK government level, both for the lawmakers and for industry. The chemicals industry continues to work with legislators to help create a civilised policy on the environment. We are making much progress towards an accord on what is desirable and workable. John C L Cox, director-general, Chemical Industries Associa-Kings Buildings,

Smith Square, London SW1P 3JJ

Spare a thought for European non-smokers From Mr Onésimo

Alvarez-Moro.

Dr M Singer should spare a thought for us European nonsmokers who will not be returning to a country where smoking has been made almost unconstitutional (Letters, August 18 and 19).

If a substantial majority of European residents are nonsmokers, as statistics suggest, then the European tourist industry has a much bigger market to think about than Dr

Singer suggests. Unfortunately, things move slowly and, while we are delighted to welcome Dr Singer back to our shores, US tourist dollars will probably not cause the changes

required.
The real changes to protect non-smokers will happen when that silent majority stands up and complains. Otherwise we will have to continue to rely on vocal US tourists and the one or two of us who are labelled as cranks.

Far from being an American pleasure, as Dr R M Davis suggests, smoking can be described as the true Montezuma's revenge, given all the death and destruction it has

But come back to Europe soon, Dr Singer, European nonsmokers need all the help we can get Onésimo Alvarez-Moro,

Germany's challenge

THE THIRD year of unification has, says the latest OECD report on Germany, brought "mixed results". So, indeed, it has It has brought a deep recession, for one thing and declining inflation, for another. Fortunately, German economic policy should soon weigh less heavily on its neighbours, even if its own struggle with unification will remain long and ardu-

The immediate economic effect of unification on the east German economy was collapse: in 1991 east German real gross domestic prod-uct fell by 31 per cent. For west Germany and its neighbours, however, it was expansionary. With German demand rising still faster than did output, its current account swung from a huge surplus of 5 per cent of GDP in 1989 to a deficit of 1% per cent in 1962, to the delight of its European

neighbours.
The delight was not to last. The inflationary effects of unification were a red rag to the Bundesbank, already provoked by Mr Kohl's casual treatment at the time of the monetary unification. Monetary policy was bound to tighten, particularly in response to the wage push of 1991 and 1992. But the Bundesbank is finding it particularly difficult to lower inflation this time, largely because inflationary pressure has emanated from the public sector, private services and housing and construc-tion, while inflation in the internationally exposed sectors is

already less than 2 per cent. However difficult lowering inflation may prove, nothing will stop the Bundesbank from trying. Given the tight monetary policy, the dwindling away of the fiscal stimulus and the length of the preceding expansion, it is hardly surprising that the German economy shrank at an annual rate of 1.5 per cent in the second helf of 100 I. cent in the second half of 1992. In addition, says the OECD, it will shrink by 3.2 per cent in the first half of 1993, with a weak recovery

expected only next year. When the Germany economy catches a cold, its ERM-tied neigh-

GOOD CORPORATE HOVESTAINE

requires much more than a man-

agement board which is studded

with successful independent direc-

tors. The latest and in some ways

one of the most striking examples

is to be seen in the story of East-man Kodak, a world-class com-

pany which over the past 20 years

or so seems almost to have gone

out of its way to dissipate its

resources. Now the price is being

paid. Earlier this month, its chair-

man resigned; this week, the com-

pany announced that a further

10,000 jobs are to go by the end of

Kodak's culture is straightlaced

and serious minded. Around its

boardroom table sit the likes of

mer chairman of the New York Stock Exchange, John Phelan, and

Dr Karlbeinz Kaska, recently of

Siemens, its core business, silver

halide photography, has continued

to expand over the years, and its

research efforts have been produc-

bours are certain to sneeze. What has aggravated the disturbance has been the instability in German policies and economic performance. This at least should soon end. From the smoke of the past few years should emerge a Germany with massive, but manage able, structural problems.

The economy of eastern Germany is in ruins. The share of manufacturing in eastern Germany's value-added, for example is down to 14 per cent, while the transfer-supported level of demand is almost double the total value-added. Eastern Germany needs a growth miracle. With hourly wages in 1992 65 per cent of the west German level, but output per worker at only 40 per cent, it is unlikely to enjoy one. This will leave western Germany with a huge transfer burden. Transfers are about 5 per cent of west Ger-man GDP this year and are likely

to remain that high for years. Nevertheless, the OECD believes the fiscal position is containable. The ratio of gross public debt to GDP should not much exceed 60 per cent by 2000, even with trend growth of only 2 per cent a year. Meanwhile, the Bundesbank is likely to ensure modest inflation, but reduce short term interest rates substantially quite soon With an external deficit, as west German savings continue to flow eastward, this should mean a weak exchange rate (both nominal and real).

The first consequence of German unification was economic expansion. The second was con-traction. The third, likely to last rather longer than the first two, should be recovery. Meanwhile, Germany's neighbours should enjoy greater competitiveness against the rest of the world, combined with reasonably stable exchange rates against the D-Mark and considerably lower short-term interest rates. Germany is only at the beginning of its long voyage towards economic and social inte gration. But with hick, both it and the rest of Europe will soon see

the ways in which a corporation

could go wrong in recent decades.

There was complacency in the

face of new competition from

instant photography and from

Japan, followed by debacie when its move into Polaroid's territory

brought losses and heavy fines for

petent infringements. There was the failure to exploit technological

leads in areas like reprographics

and publishing systems: inevita-bly, there was the enormously costly aquisition of a business

These grim experiences have

forced Kodak to reappraise its

activities, and as a result it now

appears to be regaining ground in

some of its long-established busi-ness lines. But its story shows

how feeble the business establish

ment can be when its own cage

about which it knew nothing.

a size where plainly you can't know Of course, he concedes, there is a risk that the culture will reject him.
"If I behave stupidly, yes. There are dead certain ways of getting up people's noses, like not listening and Focus at Kodak pretending you know more than

> But his ignorance of banking, he argues, is not complete. Twe been interested in banking and credit all my life. I've always been seen in the textiles industry as a City man. The frony is that now I'm here at Barclays, everyone says 'what the hell are you doing here? You're a manufacturer'. Perhaps I'm just a split personality."

> He also claims another qualification, if a slightly indirect one. High street banking is a form of retailing. Nearly a third of Courtaulds Textiles' sales go to Marks and Spencer, the formidably successful retail chain. "I've been working very closely with Marks and Spencer for 10 years," Mr Taylor says. "What I've learned about from Marks is the way it thinks of its customers, and the way it sees the world

through their eyes. I sense the banks are starting to do the same." Mr Taylor might also with justice argue that the jump from Courtanlds Textiles to Barclays is no bigger than the jump from the Lex Column to Courtaulds. But there is one striking difference. When he went to Courtaulds. Mr Taylor went

chuted in above them?

Age difference apart, the two men are rather similar, thoughtful and intellectual in approach, courteous in demeanour. Sir Christopher was undisputed master of Courtaulds. and could allow the young Taylor to blossom under his tuition. Indeed, Mr Taylor's move to Barclays has been materially assisted by Sir Christopher's willingness to step back into his shoes. "There's been tremendous co-operation between the two companies," Barclays' chairman remarked yesterday, "with Christopher Hogg at the heart

At Barclays, by contrast, Mr Taylor may be entering a more hostile support of Mr Buxton, the chairman, whose position recently has come under fire. If Mr Buxton's position were as unchallengeable as Sir Christopher's, he would not have needed Mr Taylor in the first

s it is, Mr Taylor faces three main challenges. The first is whether he will be able to work amicably and effectively with the other senior executives. The second is whether he will be able to improve the quality of management, both within its traditional banking operations, and its BZW investment bank. The last is whether he will to agree the correct strategic decisions with Mr Buxton over the next five years.

The challenge of fitting into the bank's senior management structure is considerable. Apart from Mr Buxton and Sir Peter Middleton, the deputy chairman, Mr Taylor will be trying to work with the chief executives of the three divisions: banking, BZW and the technology-related service businesses. The relationship with Sir Peter has been the subject of most speculation, since he is the one senior executive who will not report directly to Mr

Mr Taylor is at pains to downplay such talk, pointing out that Sir Peter has already offered to hand over his main area of executive responsibility within the bank as a whole, its management of risk, "When I saw Peter last week, he said be wanted to hand it over and I said 'not yet please'." he says. He also argues that the formal structure is less important than the working relationship that will

Mr Buxton makes a similar point.

There are areas of terror. The main one is that there's a huge organisation here and I don't know what goes on inside it'

"We actually wrote the job descrip-tions for myself and the chief executive down when we started the search, but When it comes to the crunch, you cross the lines of whose job something is all the time," he said. Yet some observers believe the potential for Mr Buxton to seek guidance on strategy from either Sir

Splitting the roles: Taylor (left), chief executive, and Buxton, chairman

Peter or Mr Taylor when difficult banking divisions. questions arise could be a source of

tension. Mr Taylor's relationship with the heads of the operating divisions is crucial to his second challenge of improving management. The fact that he will be in charge of sea-soned - and older - bank executives may have played some part in Mr Buxton's preference for someone from outside banking rather than a directly comparable executive. He says that the bank had to find someone who would command

instant respect "I veered towards having a nonbanker, but someone with really good management experience that could be seen in his track record." he says. Yet the complexity of Barclays means that Mr Taylor will have to come to grips with more than one different business. At the same time, he will have to avoid offending executives such as Mr David Band and Mr Alastair Robinson, the heads of the BZW and

OBSERVER

Mr Taylor displays the most excitament when talking about the task of raising the standards of customer service. "It is stupendously difficult, maybe the most difficult challenge of the job," he says. He

The crucial difficulty of judging his performance at Barclays will be that banks are inherently cyclical businesses

arrives as the bank is experimenting with new ways of delivering services such as telephone banking, and concern among senior managers that this could be upset by a new chief executive.

He also faces the problem that some staff could regard his record as hatchet man at Courtaulds Tex-

tiles askance. There is also the question of whether he will interfere counter-productively. He is cautious on this. "It may be that the banking division is already doing everything that could be done. I

would be surprised," he says.
The task of managing BZW is entirely different, since the investment bank comprises many tal-ented but temperamental dealers and advisers. Mr Taylor argues that no British bank has yet discovered the full secret of managing a securities operation. "These are relatively new kinds of organisation, and there's no template for them," he says. "Some people think there's a magic ingredient called management which can be added. I am sure management has a role, but I am not sure what it is. I am looking forward to finding out."

Others are less sanguine. A senior executive at another bank says the new chief executive will have a difficult task working with Sir Peter Middleton, made worse by the fact that Sir Peter has an executive niche at BZW. Internal tensions, he claims, are being caused at Barclays by the fact that some old banking operations, including the treasury division, have been put under BZW control. "It is getting a bigger and bigger problem," he says. "It is the tail wagging the dog."

These are questions which Mr Taylor will face immediately, and the answers may emerge quickly, But the crucial difficulty of judging his performance at Barclays will be that banks are inherently cyclical businesses. The bank is in the middle of an upswing in earnings which will probably last until 1996 as the bad debt problems from loans made in the late 1980s recede and operating performance picks up.

r Taylor accepts that he can hardly claim much credit for what happens way that someone coming in like me will affect profits over the next 18 months," he admits. Yet there is little doubt that Barclays faces large strategic questions that will determine how well its profits are sustained. Lloyds' decision to divest poorly-performing business in the 1980s helped protect it in recession.

Mr Buxton agrees with this. "There are one or two strategic decisions every 10 years that can make a big difference," he says. Barclays made a big error in the late 1980s by expanding property lending. But he says that the bank made strategic errors in growing unwisely from the 1960s and 1970s onward. "Our UK bank has produced some pretty high returns, but they were wasted in some places

overseas," he says.
Yet the division of labour mapped out between Mr Buxton and Mr Taylor lays primary responsibility for strategy with the chairman. Mr Buxton says Mr Taylor will play a far larger role. "Strategy will be very actively worked out between us. It is not something a chairman can decide by sitting in his office, writing it on a sheet of paper and handing it out to the chief executive

to implement," he insists. So Mr Taylor faces a curious mixture of tasks over various time-scales. It will keep him busy for a while: but not, one assumes, for ever. It is a curious instance of his methodical approach that he had already decided to move on from his executive role at Courtaulds Textiles before he was even approached by Barclays. At the outset, he had given himself seven years for the job, and his time there was coming to an end. So how long does he give himself at Barclays?

Ten years, he says. "One of the nice things about not being ridiculously old is being able to come to a place like this and say I've got lenty of time. Personally, that is How much time the market will give me is another question."

And then what? Chairman of Barclays? Ruler of the world? "Come back and ask me in the year 2004". he says. And in any case, the date is not to be taken too literally. "Ten years," says the ex-Mandarin scholar, "is Chinese for a very long

Yet its catalogue of strategic tiemanly years ago. Barclays' man

IF A Hollywood casting director were asked to find someone to play the stereotypically reassuring banker, he would probably go for a man with an air of avuncular probity and enough white hair to compensate for the lack of a university education. Mr Martin Taylor, who is about to abandon his role as chairman and chief executive of Courtaulds Textiles for the chief executive's job at Barclays, could hardly be more different.

At a youthful 41, he suffers from a sharp intelligence, an Eton and Balliol pedigree and an early career in journalism, which is close to being a fatal handicap in commercial life in Britain, if not elsewhere. He also differs in another crucial respect from his future colleagues: he has run a quoted British company in an internationally competitive sector of industry with notable success.

If executives have crossed the line from industry into hanking fairly infrequently, it is because the job of the deposit-taking and lending banker has traditionally been regarded as a specialist task. But as banking has moved from a cartelised, highly regulated business towards a more competitive, profit-maximising ethos, the skills of the industrialist have become increasingly relevant, notably in areas such as costing and financial control. The industrialist's skills are even more relevant when, as in Mr Taylor's case, he comes from a mature industry that has already confronted uncomfortable decisions. In banking the broad strategic choices are follow.

by now well understood, but there are plenty of difficult nettles that have yet to be grasped.

Equally striking is the way in which the prudential culture of commercial banking has been groded by the increased pressure for profits. The vast sums lost in Latin America and in property provide overwhelming evidence to that effect; and that alone would suggest that the old view of industrialists, as being too red in tooth and claw to be put in charge of fiduciary deposits, is anachronis tic. Nowadays it is the bankers

who inspire less confidence. Yet it is important that those who do cross the fence from industry should grasp why it is that banking remains fundamentally different. For a start, the cost of any given misjudgment is magni-fied by the enormous leverage in bank balance sheets: a small wedge of capital supports a huge edifice of assets and liabilities. Another peculiarity of banking that exerts pressure in an equal and opposite direction is that big clearing banks will never be allowed to go bust. It follows that the chief executive of a clearing bank is, in effect, in a role of public trust and should recognise an implicit duty to the taxpayer in

the way he runs the business. In the final analysis, then, the test for Mr Taylor is as much a matter of judgment as of managerial expertise. He has to resist the temptation to outgrow the competition for the sake of it. The gravitas and grey hair will no doubt

Not enough rights left

■ Traditionally, August is a rum month for reshuffle speculation at Westminster with MPs off on

their hols. But this time it's rife and the rumour-mongers are showing a particularly keen interest in the medical bulletins of education secretary John Patten and the DTI boss Michael Heseltine.

Should either of these cabinet big-wigs be declared unfit to continue, the argument runs, the prime minister would have an opening to finish off what he started in May when he sacked chancellor Norman Lamont.

The keenest speculators are the Tory party's disaffected right. They are dismayed by the monopoly of "wets" in the main economic departments (Kenneth Clarke, David Hunt and Heseltine himself). But the right's problem remains the dearth of credible alternatives. Baroness Blatch would be an obvious successor to Patten. She is not one of them, and nor is Stephen Dorrell, the financial secretary and Peter Walker protegé. The right's only real star is the cerebral John Redwood but he has

only just been given Wales. The assumption is that Hezza will not return to duty until the Tory party conference in October but John Patten is expected back at his desk on Monday. His first

public performance will give the speculators a chance to judge whether he really is fit for action.

Itstimeusaurus

■ The day after Abbey National admitted defeat and agreed to sell its chain of 347 estate agents for less than a tenth of what it paid for them, a reader received the following invitation from the estate agency arm of the Woolwich: "Don't let any old dinosaur try and sell your home... use the most available. If it isn't Woolwich, it's extinct!"

Northern grit

■ The arrival of Martin Taylor at the top of Barclays Bank is good news for Burnley. Apart from Charles Townley, the antique marble collector, James Stevenson, the Hollywood actor, and General Scarlet of the Crimea war, the Lancashire mill town has up to now been noted mainly for breeding footballing talent, most of which was exported to keep Burnley Football Club alive.

Despite Taylor's old Etonian education (he won a scholarship) and accent, he is a Burnley lad at beart. His brother is a well-known local solicitor and the local newspaper has dubbed him the "Burnley-born genius".

"He is so energetic it is tiring

Hor

even to talk to him. He talks like he lives. Fast!" says the Burnley Express, which also revealed the little known fact that Taylor has been known to talk to himself. Who knows - the local chamber of commerce might even name a park bench after him.

Usherettes?

■ The House of Lords is advertising for a Yeoman Usher of the Black Rod to help the Gentleman Usher of the Black Rod and Serjeant at Arms keep their lordships in order.

Someone with proven management skills and some experience of information

technology is being sought. No problem with that except for the fact that the advert states that the House of Lords is an Equal Opportunities Employer. Since when has equality of opportunity had anything to do with getting a job in the Lords?

Discounted

■ "Take the train to Windsor for an unforgettable day out" gushes NetWork SouthEast's latest lavishly-illustrated poster. Among the attractions on the poster, promoting cheap fares, is a cut-away drawing of Windsor Castle which clearly depicts St George's Hall "primarily used for banquets" and the Waterloo Chamber which "the Royal Family use for their Christmas pantomime

Bit odd, since both these imposing state rooms were all but destroyed in last year's fire. British Rail would be providing the country with a better service if it encouraged trippers to visit Buckingham Palace which has been specially opened to raise money to repair Windsor Castle.

Windsor Palace?

■ So ex-RHM boss Stanley Metcalfe, who made his name in millin' and bakin', is adding hotel-keepin' to his portfolio. A blunt Yorkshireman, the new non-executive chairman of Queens

Moat Houses is not keen on talking to the press but he clearly has his fans at Morgan Grenfell, the merchant bank which has taken

a lead role in advising QMH.

Andrew Coppel, QMH's new chief executive, is a one-time Morgan man, and RHM was a Morgan client before the food group was taken over by Tomkins at the end of last year. Given that QMH owes £1bn to 65 banks, it might have been thought that the job of chairman would go to a banker. However, when Morgan drew up its shortlist, Metcalfe's name was on top. Old colleagues at RHM are wondering whether one of his first moves will he to take RHM's redundant headquarters in Windsor off Tomkins' hands. It would make

Smoke-free

■ The recent correspondence on smoking has reminded a colleague of a North Sea ferry crossing he made a few years ago. The cabin, which was shared by six strangers, displayed a sign explaining that smoking was allowed "by consensus".

In the middle of the night five sleepers were awoken by the sixth occupant, a burly soldier going home on leave, who asked if it was all right for him to smoke. Yes, it was agreed after some eye rubbing, he could smoke. "Oh good," he said, "anyone got a cig?"

Losses lead to shake-up at the top

Ford's German chief may sue over transfer

By Kevin Done, Motor Industry Correspondent,

FORD, the US carmaker, became embroiled in public conflict yesterday with one of its top executives in Germany, in the latest shake-up of its European man-

Mr John Hardiman, dismissed this week from his position as chairman of the management board of Ford-Werke, is considering taking legal action for breach

Ford of Europe announced on Wednesday that Mr Hardiman would return to the US to Ford's international automotive operations. He was to be replaced immediately by Mr Albert Caspers, Ford of Europe manufacturing director, who was to add the chairmanship of the German subsidiary to his existing role.

Mr Hardiman announced vesterday through his lawyer that he was considering legal action against Ford. One option was to seek a temporary injunction against the dismissal to force his

Ford of Europe claimed on Wednesday that Mr Hardiman's move was part of normal management changes, but it became embroiled in public conflict yesterday as Mr Hardiman sought to fight the shake-up by Mr Jacques Nasser, who took over as chairman of Ford of Europe at the

beginning of the year.

Ford of Europe is fighting to overcome its third year of heavy losses and is in the process of drastic restructuring including the cutting of around 10,000 jobs across its European operations. Ford has run up heavy losses in particular in the UK and in Germany, where Ford-Worke suf-fered a net loss of DM469m

(\$272.60m) last year, Mr Ulrich Weber, Mr Hardiman's lawyer, claimed in Cologne yesterday that Mr Hardiman's dismissal was not valid."Mr Hardiman's contract runs to the end of April 1995, and under German law such a contract can only be ended for gross misconduct, which nobody is claiming." Mr Hardiman had a written contract with Ford-Werke not with Ford of Europe or with Ford of the US.

Mr Weber said that the first that Mr Hardiman had heard of his impending dismissal was from German newspaper reports

"We want to reach a reasonable settlement with Ford, but the other side must move. We have a strong legal position but we would prefer an out-of court settlement. We are not seeking fantasy sums but a settlement under his contract."

Talks between the two sides may be held next week, said Mr Weber. No offer of a firm position in the US had been made to Mr Hardiman, he said.

Mr Hardiman, 59, has worked for Ford in Europe for more than 30 years. He became chief executive of Ford-Werke, Ford's German subsidiary, in 1989, and had been parts director for Ford of Europe and chief executive of Ford Italy and Ford Portugal.

Mr Weber said that Mr Hardiman had been given no reason for his dismissal. "It has been speculated that with all the movements in Wolfsburg (Volkswagen headquarters) Ford must react with new faces."

US trade deficit soars 44% as imports hit record levels

By Reuter in Washington

THE US trade deficit soared 44 per cent to \$12.06bn in June, the highest monthly shortfall in nearly six years, the Commerce Department said yesterday.

Imports rose 5.1 per cent from May to a record \$49.71bn, while exports fell 3.3 per cent to \$37.65bn. The resulting deficit was well above the \$8.6bn expected expecand the biggest since the \$12.56bn gap reported for October 1987.

The US deficit with Japan climbed to \$4.33bn from \$3.75bn in May. President Bill Clinton's administration wants Japan to keep stimulating its economy to bring its trade into better balance by importing more. US trade with western Europe also deteriorated imports climbed \$431m to

to show a deficit of \$1.70bn in June from a small surplus of \$332m in May.

The Commerce Department slightly revised its estimate for May's total US trade deficit to \$8.38bn from a previously announced \$8.37bn. Exports of US-made industrial supplies fell by \$826m to \$8.85bn in June, while exports of consumer goods fell by \$202m to \$4.3bn.

One of the few bright spots in exports was stronger sales of civilian aircraft, which rose in value by \$521m to \$2.19bn. Boeing's foreign deliveries were reported to have increased to 32 aircraft in June from 18 in May. rose sharply and pushed the US

But imports of many goods

further into the red on trade. Car

\$8.59bn, while imported consumer goods grew in value by \$629m to \$11.3bn. The dollar rose against the yen yesterday, but has been steadily losing value. Continuation of this trend is expected to slow imports from Japan as they will become more

expensive in the US. The US economy has shown signs of slow revival, with a rise in industrial production in July after two monthly declines. But consumer confidence is shaky. especially with higher taxes on the way. Trade has become a weak spot because overseas markets remain soft, especially in Europe, so exports are unlikely to provide a big push for the slow recovery.

US chip reliance, Page 4 was made.

Disney to step up output of animated films

By Tim Start in London

WALT DISNEY, the US entertainment group, yesterday announced a big expansion of its animated film production after the box office success of Aladdin its latest feature, which has grossed more than \$212m in North America.

The company, which last month reported a \$30.9m quarterly loss on its investment in the Euro Disney theme park near Paris, said it intended to produce two feature-length animated films a year at studios in California and Florida.

Mr Max Howard, vice-president of Walt Disney Animation in Florida, said the decision rep resented "a move back into filmmaking". Although the company expected to make further losses on Euro Disney in the fourth quarter, Mr Howard denied that expansion of film production was prompted by the need to offset losses at the theme park.

"We're just maximising every part of our business," he said. *Rxpectations at Euro Disney have been too short-term. We've built a city there with a huge infrastructure. The returns will be in the future."

Speaking in London, where he is leading a recruitment drive for animators to work on new productions, Mr Howard said the films would be funded by revenue from Aladdin - due to be released in Europe later this year - and Beauty and the Beast, which has earned more than \$147m in the US.

Walt Disney is seeking artists in the UK and continental Europe because of a shortage of US animators. Production will take place in Glendale, California and Orlando, Florida. The company is also working on The Lion King and plans to release Fantasia Continued.

Disney expects to complete a new studio in Burbank, California, by late 1994. There are no plans, however, to reopen Walt Disney Animation UK - the London studio where the Touchsto film Who Framed Roger Rabbit?

THE LEX COLUMN

Better off at Barclays

Leaping out of knickers and into bank manager's trousers in one fluent movement is a difficult and potentially lor can manage it on his way from Courtaulds Textiles to Barclays, his track record will seem all the more impressive. Certainly, Barclays' new chief executive faces a formidable challenge. His most immediate concern must be that the pair of trousers he is heading for appear to be occupied already. It is commonly assumed that Mr Andrew Buxton's executive role will steadily wither, transforming him into a more conventional non-executive chairman. Mr Buxton, how-

ever, may have other ideas. To the extent that the two men strike up a harmonious working relationship, that may not matter too much. In truth, few chairman in such large companies act in a purely nonexecutive capacity. Yet the test of such relationships and structures comes when they are put under strain. Mr Buxton will have to show uncommon flexibility of mind when Mr Taylor wants to sacrifice some of the sacred cows which the chalrman has lived with for decades, especially as the process will not start until next year, by which time earnings will have improved further, the rights-issues-to-dividend-cut flasco will be a fading memory and complacency will be creeping back. The position of other board members will then be crucial, and some of them have recently shown disturbing signs of pursuing

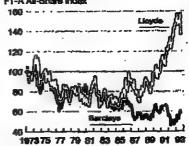

their own agendas.

Perhaps the most difficult challenge facing Mr Taylor is transforming the culture of Barclays' retail branch network at a time when banks have bro-ken their implicit lifetime employment nact with employees, and, judging by Barclays' margins, customers are being soaked for past management mistakes. If he can crack that issue Mr Taylor really will deserve his phenomenal reputation.

France

Useful though its jobs package will be, the French government is not stimulating the economy as fast as investors would like. True, the reduction in payroll taxes, at a cost to the government of some FFr105bn (\$17.82bn) over five years, will provide some impetus. But the more important, if politically explosive, issue of the high minimum wage has been skirted. Since the minimum wage has recently risen faster than average manufacturing wages,

FT-SE Index: 3065.5 (-8.1) Share prices relative to the FT-A All-Share Index

French workers have been priced out of jobs. Yet the rise in French unemployment to 11.6 per cent, may stem less from labour market rigidities than a sheer lack of demand. Here, the government is constrained from doing much because of budgetary pressures, But its continuing reluctance to cut interest rates hardly helps,

Still, investors appear remarkably sanguine, despite the government's refusal to move faster on interest rate cuts. Both equity and bond markets appear convinced that the economy will recover even if they remain uncertain about the timing. Moreover, the rise in the Paris bourse has lagged the fall in bond yields over the year. There may well be more headroom for equities once short-term rates fall. The huge quantities of cash held in French money market funds will then have nowhere else to go.

Willis Corroon

On an optimistic view of the insurance cycle, Willis Corroon is now more geared to the upturn than its rival Sedgwick. Following the acquisition of Noble Lowndes this week, around 25 per cent of the latter's revenue comes from benefits consulting – a business more likely to show steady growth than spectacular cyclical recovery. While Willis also has ambitions in consuiting, its operations are proportion-ately smaller. On that basis Willis might now deserve the higher rating. Despite yesterday's encouraging fig-

ures, though, it is too early to argue that all insurance markets have turned. The large rise in first-half profits was due to early insurance renewals. That hints at an equal measure of disappointment to come in the second half. Adjusting for this and the benefit of exchange rates, growth in insurance broking revenue was modest. The creditable underlying decline in expenses also owes something to his-tory. Having acquired the US broker Corroon & Black in 1990, Willis still has room to cut costs. When that process comes to an end upward preon expenses will be more difficult to resist. Underwriting losses are a reminder that brokers have been no more successful at the business of

insurance than insurers themselves. These factors will barely dent the earnings recovery if US insurance premiums stage the kind of recovery seen in the mid-1980s. But with no sign of US rates hardening other than in specialist areas, that looks a distant hope. A price earnings ratio more than 20 times this years forecast earnings demands something more substantial

Any company which swallows a \$500m restructuring charge and continues to shed jobs at the rate of 1,000 a month may be presumed to be in a spot of trouble. But in Asea Brown Boveri's instance, quite the reverse may be the case. Although heavy capital goods markets have remained sickly throughout the western world, ABB continues to make progress. Flat pre-tax profits of \$497m at the halfyear represents a fine achievement when currency swings are taken into account. The restructuring charge will pull costs forward and depress profits for the year. But it will have little effect on ABB's ability to fund the dividend. Shareholders are therefore right not to blink.

Longer term, the restructuring programme will enable ABB to shift production from high to low cost sites. This will enhance cost competitiveness and help ABB win new business in the promising markets of eastern Europe and the Far East. ABB is also making striking efforts to reduce manufacturing lead times and improve capital and labour productivity. More leaden-footed rivals, such as Siemens can only stand and gawp.

That said, neither the Swedish or Swiss markets have been neglectful of the respective charms of Asea or Brown Boveri. Both shares have eeem ingly powered ahead of the anticipated upturn in the capital goods cycle. Yet those prepared to wait abould reap full henefit when sales volumes and margins swing higher.

January 1. He becomes the youngest chief executive of a British commercial bank. Barclays did not disclose how much it would pay Mr Taylor.

He will be employed for two years initially and then on a rolling one-year contract. Courtaulds Textiles appointed Mr Noel Jervis, director responsible for labrics, as managing director. Sir Christopher Hogg. Mr Taylor's predecessor and now

a non-executive director, will

resume the chair in January.

Israel retaliates after bomb attack

Damascus, which has thousands of troops stationed in the Bekaa valley, and which Israel blames for allowing the Hizbollah attack. Israeli and Lebanese security officials issued conflicting accounts on the attack, israel said seven soldiers had been killed and two wounded from the Golani brigade in a single bomb blast. The Lebanese version claimed that Hizbollah had

exploded three bombs and fired

machine guns against an Israeli

foot patrol near the village of

Shinin, killing eight soldiers and wounding four.
The Hizbollah raid was the Continued from Page 1

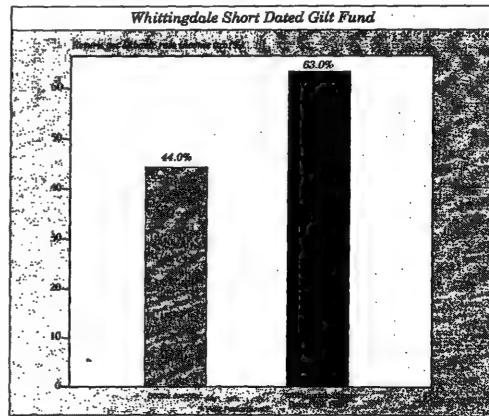

most deadly since a 1988 suicide car bomb attack and it brought Israeli casualties in the zone this year to at least 16 dead and 29

Yesterday's resurgence of violence came less than three weeks after a US-brokered ceasetire ended a devastating seven-day Israeli air and artillery bombardment of villages in southern Lebanon. The Israeli offensive, aimed at curbing Hizbollah rocket

600 wounded and 1,500 homes destroyed.

For years. Syria has allowed Hizbollah to mount attacks on israeli forces inside Lebanon. Israel believes that Syria could prevent these attacks. It had hoped that the ceasefire agree-ment laid the ground for improved relations with Damascus and progress in peace talks which centre on an Israeli with-drawal from the Golan Heights in return for full peace with Syria. Those hopes may have been dashed by yesterday's attack.

ABB to shed a further 7,000 staff

ASEA Brown Boveri, the world's largest power engineering group, has reported flat pre-tax profits of \$497m for the first half and indicated that it sees little improvement for the rest of the year.

"Short-term growth prospects in western Europe have not improved in North America, the beginning of an economic recovery has so far had only a marginal impact on ABB's range of products," the Swiss-Swedish

In view of the depressed state of demand in Europe and North America, the group said it would accelerate its rationalisation programme, eliminating a further 7,000 jobs by the end of the year. New provisions of \$500m would

be made against 1993 earnings.
Since the spring of 1990, the group has eliminated 40,000 jobs. However, its total employment has risen from 213,000 at the end of last year to 218,000 because of

ABB said that a number of production and engineering plants in Europe and North America had been identified for closure or cuts but gave no details. A spokesman said the cuts would be made broadly across the group's divisions, with the exception of the power distribution

New orders were down 12 per cent to \$15bn in the first half and the intake rate worsened in the second quarter.

The level of new orders for power plants and transportation equipment held up close to the previous year's levels, but those for other divisions dropped signif-icantly, notably in the industrial plant sector, where they plunged 25 per cent to \$2.24bn.

Group revenues were off 5 per cent in the first half to \$13.1bn.

Barnevik: pre-tax profits would be the same as last year's

Excluding currency effects, however, they rose 2 per cent.

Operating earnings advanced 4

per cent to \$937m, thanks to higher earnings in the power plant and financial services seg-Profits before non-recurring items and taxes eased 2 per cent

to \$518m, but excluding currency effects were up 10 per cent. Capital spending was cut to \$332m in the first half from \$373m in the same period of last

Investment declined in Europe where capacity reductions were needed, but continued to increase in eastern Europe and Asia, which the group has identified for strategic expansion.

ABB said order intake had begun to pick up in the second half and confirmed a forecast made by Mr Percy Barnevik, its chief executive, in March. Mr Barnevik said then that pre-tax profits for the full year, before non-recurring items, would be at about the same level as last

Ericsson set to double profits as orders surge

By Christopher Brown-Humes In Stockholm

ERICSSON, the Swedish telecommunications group, expects profits at least to double in 1993 following a dramatic recovery in first-half net income to SKr1.28bn (\$152m) from

The first-half result nearly equalled the SKr1.30bn profit which it recorded for the whole of last year and was made on the back of strong increases in orders and sales. All business areas increased income, the company

Orders for the period jumped 27 per cent to SKr34bn while sales rose 35 per cent to SKr27.4bn. About half of the increase in both figures was due to the depreciation of the Swedish krona. So far the group's income has only been marginally affected by the currency depreciation because of its

hedging policy. The group now has an order backlog of SKr46bn, up 33 per cent from mid-year 1992, after increasing its order intake for the last seven quarters. The most spectacular growth

has come from the group's radio

communications division. This includes mobile telephones.

which for the first time has over-

taken public telecommunications

to become the group's biggest revenue earner. Radio communications saw sales rise 75 per cent to SKr10.65bn in the first half, while public communications sales increased 15 per cent to

"Deliveries of mobile telephones have never been as high as the level achieved during the first six months of 1993," Erics-

son stated. The group's largest market is Italy, which accounted for 12 per cent of sales, followed by the US, Sweden, Great Britain and China. China is the group's fastest grow-ing market. Deliveries of public ecoms equipment there have

doubled in a year. Mr Lars Ramqvist, chief execu-tive, said the company's extensive investment in technology provided the basis for continuing growth and justified the confi-

dent profits forecast. Analysts suggested the predic-tion was still cautious, given the likely impact of the krona's depreciation on income in the latter part of the year. Mr Gunnar Andersson, analyst at Svenska Handelsbanken, said he anticipates full year profits of SKr3.4bn

The company's B shares closed SKr2 lower at SKr376, still more than double the SKr186 level at which it started the year.

Mannesmann falls into big losses

MANNESMANN, the engineering group which has been a favourite with investors during the recent rally in the German stock market, yesterday reported a group net loss of DM467m (\$271.5m) for the first six months of the year a huge swing from a profit of DM15m in the first half of 1992. The result was worse than

expected and the share price dropped DMS.30 to close at DM333.20.

all divisions, hit by the combined effects of recession in Germany, the impact of a stronger D-Mark

Tationalisation measures. The group said that first-half losses were worst in its car com-

ponents division and in its pipes and tubes activities, the group's traditional core business. In both cases, trading losses were compounded by restructuring costs. In addition weak sales and prices hit the machinery and industrial plant division. Total group turnover rose frac-

tionally from DM12.82bn to DM12.87bn in the six months. while orders dropped 6 per cent to DM11.1bn. The group predicted that turnover for the full year would reach the same level as

still amounts to SKr22.5bn, or 7.4

per cent of total lending.

Even the two big Norwegian banks, the first in the region to

enter crisis, reported largely

unchanged credit loss levels at

the half-way stage. DnB actually saw a slight increase in non-per-

forming loans. In Finland, where the struc-

tural economic problems are greater than in either Sweden or

Norway, Kansallis-Osake-Pankki.

the country's leading commercial

bank, and Unitas expect to cut

their losses this year. At KOP,

credit losses increased to

FM933m (\$160m) in the first four

months, against FM728m, and

non-performing loans grew to FM8.2bn from FM7.1bn at the end

ish banking sector but the crisis is not yet over," says Mr Roar

Nilson, chief financial analyst

with Arctos Securities in Hel-

sinki. "Credit losses in the public

sector, among personal custom-

tated companies can be expected

LVI change next year. in

any banking recovery, there is

back in profit until 1996.

forming loans begin to fall

The worst is past in the Finn-

of 1993.

Declaring that there was little evidence of improvement in business conditions, Mannesmann

It said that rationalisation which had not affected the interim figures - would permanently lower the group's break-even point without reducing the number of products on offer. In the year to June, the number of employees in the group had fallen from 142,827 to

In a letter to shareholders Mr Werner Dieter, chief executive, expressed great confidence about

phone system, the first private network in Germany.

Development has cost the company DM4.5bn to date but Mannesmann said that the project was set to start making profits early next year. It already had nearly 300,000 subscribers, ahead of expectations.

Mannesman shares have outperformed the rising German stock market by 13 per cent since the beginning of June, reflecting investors' view of the group as a cyclical stock, with the added attraction of contribution. Mannesmann Mobilfunk, the mobile

Christopher Brown-Humes and Karen Fossli on the rise of a sector

A burst of light for banks in Nordic gloom

udging by the extraordinary rise in Nordic banking shares this year, the market has decided the sector's financial

Euphoria based on the belief that Nordic banks are firmly on the road to recovery has lifted shares from the lows to which they sank last year. Bank shares have risen 270 per cent in Sweden, 185 per cent in Finland and 165 per cent in Norway.

Much of the buying has had a speculative flavour, yet recent developments have borne out the speculators' most fervent hopes. • Skandinaviska Enskilda Banken, the region's largest commercial bank, withdrew its request for state support this week after a return to profit in the second quarter and a

SKr5.3bn (\$670m) rights issue. Yesterday Unitas, the Finnish banking group, said it too was launching a rights issue on the back of improved performance. Norway's two biggest banks, Den norske Bank (DnB) and Christiania Bank, reported a

return to profit in the first half, with DnB saying it will not need a NKr600m (SS2m) state guarana dramatic improvement in earnings, rather than from a drying up of the credit losses - or debt

write-offs - which have ravaged the sector. SR Banken's figures demonstrate this: its operating income before loan losses was up 58 per cent in the first half at The most important factor has

been interest rates which now lie at their lowest levels for at least 10 years in all three countries. This has enabled the banks to

widen their margins, boosting net interest income. It has also prompted rallies in bond and share markets, enhancing the trading contribution. Banks have helped themselves

by restructuring. DnB, for example, claims to have cut costs by 40 per cent over five years, leading its president Mr Finn Hvistendahl to claim this week that he knew of "no other large bank which can point to similar cost effectiveness" One worry is that some of the

gains reported in the first half will prove to be of a one-off nature. This applies particularly to share, bond and foreign exchange income.

But a bigger cause of concern is the high level of credit losses. Even though lower interest rates should reduce the bruden on customers, most banks are being extremely cautious about predicting anything more than a modest drop in loan losses in 1993. SE Banken, for instance, has

warned that credit losses this year could reach SKr11bn, only slightly less than last year's SKr11.2bn. Its non-performing

Glaxo awaits patent ruling

By Daniel Green in London

A DECISION in the lawsuit over the world's biggest selling drug. Zantac, may not be made until the end of the year, the drug's maker, Glazo, said yesterday. US District Court Judge Terr-

ence Boyle, presiding in Eliza-beth City, North Carolina, has retired to consider the evidence from 16 expert witnesses brought by Glaxo and Novopharm, a Canadian maker of generic

Sales of Zantac, an ulcer treatment, are worth about \$3.5bn (£2.3bn) a year. If Novopharm won the case, it would be able to sell a generic version of Zantac from 1995. Mr Ian Smith, a drug sector analyst at broker Lehman Brothers in London, estimates that Glaxo would then lose \$700m

of revenue in the first year alone. The case was brought by Glaxo after Novopharm sought govern-ment permission to make generic Zantac. Novopharm is challenging one of Glazo's two main patents on ranitidine hydrochlo-ride, the active ingredient in Zantac. It is arguing that a specific crystalline form of the drug. Form 2, is not sufficiently inno-

vative to warrant a patent. Novopharm says the two versions are chemically the same, but Glaxo says Form 1 has never been sold and Zantac is based on Form 2. A less specific patent for ranitidine hydrochloride runs out in 1995, but Form 2 is protected

Over the past eight days Judge Boyle has heard eight witnesses

from each company presenting legal and chemical arguments

on the originality of Form 2 The outcome of this case is likely to affect another being brought against Glaxo by a Cana dian generics maker called Gen-pharm. That case is due to be heard in May 1994. These companies are strug-gling over the future of a money-

spinning drug at the peak of its earning power. Sales over the next few years are likely to fall and government pressure on the pricing of drugs generally remains high, especially in the world's biggest market, the US.

Zantac's arch-rival Tagamet, made by UK company Smith-Kline Beecham, comes off patent next year. Generic drug manufacturers are poised to launch a cutprice version. Zantac is also being challenged by a newer drug from Swedish company Astra. By Alice Rawathorn in Paris

PARIBAS, one of France's leading banking groups, plans to forge closer links between Banque Paribas and Crédit du Nord, its retail banking networks, through a commercial co-operation agreement.

The agreement, which comes at a time when France's banks are trying to cut costs in order to counter the recession, involves the two networks collaborating in areas such as the sale of products to their cus-tomers, particularly to their corporate clients, and also in the development of information technology.

Mr Andre Levy-Lang, chairman of the Paribas group, has been seeking synergles for some time between the two networks. He has however ruled out the possibility of a merger in order to retain separate identities for Banque Paribas. Credit du Nord and Com-

Seeking synergies: André Levy-Lang, Parihas chairman

specialist finance unit. Banque Paribas is one of the largest players in the French investment banking scene, with a network of 40 branches dealing mainly with corporate accounts and wealthy private

work with 540 branches. Paribas said yesterday that

the new agreement would only affect the 'behind the scenes' aspects of Paribas and Crédit du Nord. It said that the two networks had for the past three years been working more closely together. The agreement would formalise their collaboration.

The news of the new agree ment reflects the intense financial pressure on France's retail banks, which have been badly affected by the impact of the recession on demand for credit and on the group's smaller corporate clients.

Paribas aims to sustain its recovery after returning to the black with a net profit of FFr886m in 1992 following its first loss in 1991.

Mr Levy-Lang earlier this summer said conditions were still tough, but that the group muster another increase in profits for 1993.

New chairman at Queens Moat

By Maggle Urry in London

MR STANLEY Metcalfe. former chairman and chief executive of Ranks Hovis McDougall, the UK foods group, is to become non-executive chairman of Queens Moat Houses after the hotel group's annual meeting next Thursday.

Mr John Bairstow. QMH's founder, resigned as chairman yesterday. QMH is continuing talks with its 65 banks over refinancing debts of £1bn (\$1.5bn). Losses for 1992 have yet to be reported. Mr Bairstow will not receive

any compensation for leaving, trial experience and familiar

in common with nine other directors of the group who have resigned since its shares were suspended in March. He stepped down to the post of non-executive chairman last month, and said then he would

resign once a new chairman

was found. Mr Bairstow will not have to attend the annual meeting. It will be chaired by Mr Andrew Coppell, who was made chief executive last month after being brought in as a consul-

Unitas unveils plan for capital injections

By Christopher Brown-Humes

UNITAS. Finland's second-largest banking group, yesterday unveiled plans to strengthen its capital base by raising nearly FM1.5bn (\$258m) in new equity, and up to a further \$150m of preference capital from international markets.

It said the funds would enable it to withstand two more years of losses, and give it the capacity to expand lending when the Finnish economy rocovered.

"If we are successful, we have every reason to believe that we will not fall into stat hands," said Mr Markku Pohjola, the bank's senior

The Finnish government said vesterday it had agreed in principle to guarantee new preference capital issues by both the Union Bank of Fin-land (part of Unitas) and Kansallis-Osake-Pankki, Finland's leading commercial bank. The KOP guarantee covers an issue of up to FM1.8bn and the UBF guarantee an issue of up to FMIbn.

Unitas says it aims to raise FM1.16bn through a one-forthree rights issue at FM10 per share, and a further FM300m through an issue open to both shareholders and non-share-

The timing of the offers has been aided by evidence of recovery in the wider Nordic banking sector. This has helped Unitas' share price rise by more than 50 per cent, to FM20 in the last three

The group is being cautious about its prospects, saying it may not show a clear profit until 1996. However, it believes its 1993 loss will be lower than last year's FM2.7bn deficit, helped by a levelling off of credit losses and nonperforming loans. In the first seven months of the year, its loss fell to FD1923m from

FM1.02bn. The bank's capital adequacy ratio at the end of July stood at 11.1 per cent. However, it will rise to more than 13 per cent If its fund-raising plans

August 1993

Company failures seen to fall 15%

THE NUMBER of UK company failures will be 15 per cent lower this year than last, according to figures released yesterday by Trade Indemnity. the trade credit insurance com-

pany.

Next year's total will be a further 5 per cent below this year's, according to the company's estimates.

The estimates are based on reports from its 4,500 clients. In the first six months of this year, business failures were down 19 per cent on the same period of 1992.

Mr Vic Jacob, managing director, said: "It's nice to have some bright comments. All of the major trends are in the

right direction. I think it is almost three and a half years since we have been able to take a more positive view."

Trade Indemnity had not had to make any adjustments to underwriting provisions because of the fewer claims and failures. The first-half results, which

were released yesterday, showed gross claims from continuing operations down by a fifth to £51.4m.(\$76.6m) Mr Jacob warned however

that turnover was still static or

even declining at many compa-

That sobering fact was high-lighted in Trade Indemnity's premium growth - which tends to rise with company turnover - of only 2.3 per cent

to £71.3m. "So far our policyholders are not reporting increased expectations of turn-

over," he said. Mr Jacob also said that a film provision, which was released because of the improving economic position in the UK, had been offset by increased provisions of the same amount to allow for worsening trade conditions in

the rest of Europe. Net premiums written were unchanged at £26.4m and net claims fell to £24m (from 227.6m).

There were exceptional costs of £917,000 from the voluntary redundancy of about 40 staff earlier this year.

The company also showed a tax credit of £2.1m, from its

total unused tax losses from past underwriting of more than

Historically, the rate of company failures continues to rise for 18 months after the beginning of economic recovery partly as a result of over-trad

invite interested parties to participate in an international public tender for the sale of existing shares and the subscription of newly issued shares of

EMPRESA ELECTRICA DEL NORTE GRANDE S.A. ("EDELNOR")

Edelnor is an electricity generation company located in the north of Chile. It has a total generating capacity of approximately 96 Mw. In addition the company purchases 101 Mw from third parties, which it then distributes to its customers. It owns three thermo electric generating stations and one hydro electric generating station. It also owns six substations and 921 kilometres of transmission lines. A 150 MW thermo electric generating station is currently under construction in Mejillones, Chile.

CORFO has decided to reduce its ownership in Edelnor to no more than 49 per cent of all subscribed and paid shares. This tender involves a quantity of shares that will meet this objective.

The bidding rules will be available for sale at Teatinos 220, 5th Floor, Santiago, Chile from 25th August 1993. Each set of the bidding rules costs Ch\$1,000,000 (approximately US\$2,500). Offers will only be accepted from parties who have previously acquired the bidding rules and pre-qualified according to the rules.

Hutchison Whampoa back in black with HK\$2.52bn

By Simon Davies in Hong Kong

HUTCHISON Whampoa, Hong Kong's largest conglomerate, yesterday announced a strong turnround in interim earnings, with net profit of HK\$2.52bn (US\$325.2m) for the six months to June, compared with a loss of HK\$76m in the same period

The greatest impetus for the increase was the performance of 49 per cent-owned Canadian oil and gas company Husky, which suffered substantial losses during 1992 and forced a provision of HK\$1.42bn at the interim stage. Mr Li Ka-shing, chairman, said Husky contrib-uted a profit in the first half of

The group's core businesses also performed atrongly. Turnover rose to HK\$11.52bn and operating profit was up

The company also benefited

The results exceeded stock

22 per cent to HK\$2.47bn. Hong Kong International Terminals, the 61 per centowned port operator, saw a 22 per cent increase in container throughput during the period, and profits were boosted by lower interest and depreciation charges. Hutchison's port operations in Zhuhai, in China's Pearl River delta, and Felixstowe, in the UK, also

reported profit increases. There were strong contributions from property sales, particularly from the group's 50 per cent-owned South Horizons development.

The group's telecommunications ambitions continued to sap earnings. Mr Li said: "Losses incurred by the group's overseas telecommunications interests have offset to a large extent the profits generated by the group's successful telecommunications

businesses in Hong Kong." The company is expected to make provisions of around HK\$600m against its lossmaking Rabbit CT2 telepoint business in the UK during the second half of the year. However, this will be offset by an extraordinary profit of HK\$1.5bn from Hutchison's recent sale of 32 per cent of its stake in Star Television.

Mr Li said Hutchison would continue to expand into China, despite the current austerity programme. "The group is well-positioned to participate in suitable property, power plant, container terminal and retail projects in China, which reflect the group's expertise in its existing core businesses, he said.

Hang Seng Bank disappoints

By Simon Davies

of HK\$2.35bn

HANG SENG Bank, the Hong Kong banking subsidiary of HSBC, disappointed market expectations yesterday by announcing a 17.5 per cent rise in first-half net profit to HK\$2.75bn (US\$354.8m), up from HK\$2.36bn in 1992.

The figures included a HK\$258.9m exceptional profit from the sale of Wing On

Bank. Excluding this one off profit, net earnings grew by only 6 per cent. However, the bank would not say whether the figures included any provision against its exposure to Olym-

New Issue

4

pia and York, the troubled Canadian property company.

HSBC Holdings operates the largest retail banking presence in Hong Kong, and owns 61.5

per cent of Hang Seng. Hang Seng's earnings were significantly below analysts' forecasts, but they reflect slower loan growth in Hong Kong and increasing competi-

tion for deposits.
One analyst said: "It has been bankers' heaven in Hong Kong for the past two years. We are finally returning to a more normal banking environment." Last year, net interest margins reached peak levels. Hang Seng Bank has a negative outlook for earnings in the near-term future, as a result of its forecast of a slow economic recovery in the US and Europe, and the impact on Hong Kong

of China's austerity measures.
"The impact under this scenario would likely be felt towards the latter part of the year and possibly in 1994, leading to further slackening in exports, investment and domestic spending," the company said in its official state-

US Treasuries reach new highs on surprise trade data

By Patrick Harverson in New York and Sara Webb in London

AN UNEXPECTEDLY wide June trade deficit and strong demand for longer-dated securities pushed US Treasury prices to new highs yesterday morning.

GOVERNMENT BONDS

By midday, the benchmark 30-year government bond was up 34 at 100%, yielding 6.224 per cent. At the short end of the market, the two-year note was in firmer at 100%, to yield 3.912

Technical factors, including a shortage of 30-year bonds which was squeezing prices higher, continued to sustain the long end of the market. Bonds were also aided by strong demand from investors seeking longer duration on their portfolios.

The day's economic news, a widening in the merchandise trade deficit for June to \$12.1bn. up from \$8.4bn. was also bullish for market

The deficit, the widest since October 1987, was primarily the result of a sharp fall in exports, and indicated that the economy continues to

Analysts said the deficit data suggested that second quarter real gross domestic product growth would have to be revised downward.

■ JAPANESE government bonds were sold off sharply in London trading as the yen slid against the US dollar. dampening any hopes of a cut in Japanese interest The Japanese government

bond market closed lower in Tokyo, and then continued to tumble in London trading.
The yield on the benchmark No 145, which started the day at 4.095 per cent in Tokyo, closed at 4.125 per

of an easing evaporated in the course of yesterday as ven weakened against the the US currency and many investors decided to take

There had already been rumours that a big Middle Eastern investor was selling Japanese government bonds. which depressed the market, but dealers said the selling pressure became more intense as the US Federal Reserve bought dollars against the

■ ATTENTION in the European government bond markets focused largely on Germany and Bundesbank's much-awaited announcement of the M3 money supply figures. German M3 money supply grew at an annualised rate of 7.5 per cent in July, against 7.0 per cent in June.

Although the July figure was well outside the Bundesbank's stated target range of 45 to 6.5 per cent, it was below market expectations and the bund market initially greeted the news with a sigh of relief. Economists had forecast a high M3 money supply figure

for July on the grounds that it would be distorted by the recent intervention, related to the crisis in the European exchange rate mechanism at the end of July.

the market However, the market subsequently sold off when the Bundesbank said that the

effects of intervention would having traded to a 97.34 high. appear in next month's money supply figures instead. ■ UK government bonds fell As a result, the market's up to % of a point at the long

end as investors took profits after the market's substantial hopes of an interest rate cut at the Bundesbank council meeting next Thursday were severely dampened. The Liffe bund futures contract slipped from

rally. Dealers said the market is still mulling over comments made by Mr Michael Portillo on Wednesday, which appeared to rule out the chance of an end at around 97.17 yesterday, imminent cut in the base rate.

Bulis to be made more attractive by Bundesbank

By David Waller in Frankfurt

THE Bundesbank yesterday announced reforms to the bidding arrangements for Bulis short-term money market instruments introduced earlier this year in an attempt to soak up excess liquidity created by the relaxation of minimum reserve requirements for bank lending.
The reforms are designed to

make the new instruments more effective in mopping up liquidity outside the banking sector. The German central bank, which yesterday launched a new DM8.5bn tranche of "Bulis", said it was dissatisfied because the bulk of

the DM24bn of Bulis issued so far had been taken up by banks and foreign institutions. Under the reforms, nonbanks - a category which embraces industrial corporations as well as insurance companies - will be able to bid for the new securities direct through the Landeszentralbanken, the Bundesbank's regional branch network. They will no longer be obliged to buy the

securities through banks. The minimum denomination is being raised from DM100,000. to DM500,000. Mr Johann Wilhelm Gaddum, a Bundesbank director, explained that this was designed to make the

instruments more attractive to

non-banks which had held back out of fear of competing with private investors.

He said that only 10 per cent of the Bulis issued so far bad ended up in the non-bank sector, while foreign investors including central banks - held just over 50 per cent and the banking community the rest. This was disappointing because a central reason for introducing the Bulis was to give the Bundesbank a degree of direct control over liquidity

outside the banking sector. "The aim is to strengthen Bulis as an instrument of monetary policy," Mr Gaddum said. This reflects the central bank's concerns about growth in money supply growth, regarded as a determinant of future inflation.

Economists said the move could strengthen German money-markets, which are under-developed by the standards of other financial centres as the availability of short-term money-market instruments is lim-

The new Bulls will be issued in two tranches with maturities of three and six months, replacing Bulis maturing on September 3. The terms will set by the tender. The Bundesbank said it intends to replace all Bulis maturing from December onwards with regular six-month maturities.

Borrowers move early to beat the September rush

By Antonia Sharpe

THE international bond market was active yesterday as borrowers sought to beat the traditional rush for funds at the start of September.

INTERNATIONAL BONDS

Syndicate managers said they expected further offerings in the coming week since many borrowers were asking banks to bid for mandates. "The markets are in great shape and investor demand is good." said one syndicate man-

Yesterday's offerings came in a variety of currencles. The Bank for Dutch Municipalities raised Flibn in two equal tranches, one with a sevenyear maturity which appealed more to international investors, and the other with a 15-

year maturity which was aimed at the domestic market. Lead manager ABN Amro Bank said that the Issuer had chosen those maturities because the 10-year area of the vield curve was out of favour with investors.

Foreign borrowers are not expected to tap the Dutch market in the near future because of the lack of opportunities to swap the proceeds into other

SNCF, the French state railway, established a new benchmark in the French bond market with its FFr3bn, 20-year issue. An official at the lead manager. Société Générale. said investor demand for longdated bonds enabled SNCF to achieve favourable terms. The issue's relatively tight

pricing was offset by the generous discount. Many French long-dated bonds are trading at a substantial premium. SNCF's bonds, which have a coupon of 6% per cent, were priced to yield 18 basis points above the 81/4 per cent French government OAT bond due December 2012. When the bonds were freed to trade, the spread tightened slightly.

Another large issue was launched in the sterling market as Woolwich Building Society raised £200m through an offering of five-year Eurobonds. The five-year area is seen to be the cheapest part of the yield curve for borrowers.

CSFB, the lead manager, said there was a lot of demand for the bonds outside the UK. The bonds were priced to yield 65 basis points over the 7% per cent UK government bond due 1998. When the bonds were freed to trade they were quoted at 99.47, below their re-offer price of 99.57, reflecting the weaker UK market.

Sweden raised L200bn through an issue of 10-year Eurobonds, encouraged by the

Novel D-Mark warrants on Portuguese bonds set

By Theory Corrigers

BANKERS Trust yesterday launched the first offering of warrants on Portuguese government bonds hedged into

The 2m warrants were targeted primarily at German, Swiss and French-based investors. Despite strong demand for high-yielding European bonds, many investors have been deterred from buying Portuguese paper because of the foreign exchange risk. The structure of the warrants, known as "quanto" warrants, means that there is no expo-

LIFFE EQUITY OPTIONS

sure to the escudo, since the warrants are hedged into D-Marks at a rate of Esto2.12. Many investors are also wary of the Portuguese bond

market's illiquidity, having suffered heavy losses in last summer's currency turbulence. Warrants allow investors to participate in the market at a limited cost.

The call warrants cust DM3.75 each and give holders the right to buy the 11's per cent OT (Portuguese government bond) due April 2000 at a set price of 109.95. The warrents can be exercised only on one day, May 19 1994.

Willis Corroon grows 17% to £63m

By Andrew Jack

A STATE OF THE STATE OF

WILLIS CORROON, one of the UK's largest insurance brokers, yesterday reported pre-tax profits up 17 per cent from 254.1m to 263.1m in the six months ending

Turnover grew by 12 per cent to £371.2m (£331.2m), including £367.8m from continuing operations.

Mr Peter Stevens, head of corporate communications, said: "This is a year when we were not going to do exciting things with the outside world but to consolidate.

"We have had a big merger and sorting out, and we have been able to take good underlying growth in revenues which we ought to be able to main-

Exchange rate movements added £4.6m to profits. Underlying brokerage and fee revenue grew by 2 per cent from the previous first half. Underlying expenses fell by 1 per

On continuing operations, operating expenses rose 12 per cent to £313.9m and underwriting claims rose to £13.1m

broking activities rose 14 per cent to £365m and from underwriting activities by 14 per cent to £28.2m

The company said premiums remained low in the US, although there were signs of hardening rates for property

A £5.8m loss on Sovereign Marine and General, the UK underwriting business which was closed in 1991, was offset by £900,000 released from provisions made to cover run-off from the business over 20

That compared with a loss Revenue from continuing on Sovereign of £2.7m in the previous quarter and a profit of £100,000 for the six months to June last year.

The dividend was halved to 3.3p in line with the board's decision to increase its cash

The directors approved second and third quarter divi-dends of 1.65p, with the alternative of a scrip dividend. Mr Stevens said the company had a net cash inflow of £18m, compared with an outflow of £32m last year.

Although the UK still

accounts for most of Voda-fone's income, the company

has significant stakes in Cellu-

lar franchises in Hong Kong,

Germany, South Africa, Aus-

tralia, Greece, Sweden and Denmark. Half of its projected

£300m capital investment this

year is devoted to overseas

The company has bids pend-

"We had quite a cash squeeze in 1992 and it was felt prudent to reduce the diviHe added that while the lower dividend was easily covered at the time of the interim results, the bulk of the company's revenues came

M&W in stores deal with

Paper Chain

M&W, the food retailer and wholesaler, has exchanged contracts to buy eight neighbourhood convenience stores from Paper Chain (East Anglia). It is selling on two of the stores to Betta Superette.

The purchase price for the eight stores is £941,000, plus stock at valuation payable in cash. The sale of the two stores will raise £271,000 plus stock at valuation. So the net consideration amounts to

The six stores that M&W is retaining are in Essex, Cambridgeshire, Hertfordshire and Middlesex. They are not expected to contribute to profits for the year to October 2 1993. But after that they are expected to put in £152,000.

ing in Egypt and Hungary, and sary time and effort to the UK plans further expansion in companies which are still the western Europe and the Asiabackbone of our business."

A TURNROUND in the computer services business, which benefited from an acquisition, enabled Kode International to more than double its profits in the half year ended

At the pre-tax level profit worked through at £710,000 (£330,000), on turnover ahead from £9.64m to £12.3m.

DCM Services, the computer services operation, turned in a profit of £123,000 (losses of £453.000) in the face of "unusually difficult" market conditions, with intense price competition on maintenance contracts. However, continued success was achieved in non-

tomers. However, Kam was able to win orders from new customers and there had been an

upturn in activity from existing sources. Earnings in the half year came to 4.3p (2.5p) per share

Computer lift for Kode

maintenance. The printed circuit board companies exceeded budgeted profit, but were down on 1992 because of the expected reduced husiness from one of Kam Circuits' principal cus-

and the interim dividend raised from 1.5p to

Sotheby's optimistic despite cut in dividend

SOTHEBY'S Holdings, the auction house, has cut its quarterly dividend from 15 cents to 6 cents per share, but remains optimistic about future earnings.

expansion in second quarter net income, had indicated at its annual meeting in June that it might cut its dividend. Mr Michael Ainslie, president and chief executive, said the reduction "reflects the implementation by the board of the previously articulated position that the company would not maintain a dividend payout in excess of earnings." Last year Sotheby's earnings dropped 69 per cent to 7 cents per share, but it paid a divi-

Yorkshire Elec plans expansion into Finland

dend of 60 cents which was

covered by profits from the sale of inventory and the

reduction of its loan portfolio.

Yorkshire Electricity is to be the first regional electricity company to expand its core businesses of distribution and supply outside the UK.

It announced yesterday that it was in discussions with the city of Turku, Finland, about possible acquisition of its electricity distribution and district beating busi-

Mr Tony Coleman, group finance director, said he thought Yorkshire was "about six weeks from a final deci-sion" by the municipal authorities of Turku which has about 50,000 customers.

He described the deal under negotiation as "low-risk and sticking to our core skilia".

It would be "pretty armslength", he added, involving mainly "experience and expertise" after the cash contribu-

Hillsdown disposes of abattoir to Goodman

By Maggie Urry

HILLSDOWN Holdings, the food group, has sold another abattour as part of its programme of reducing its involvement in the red meat slaughtering industry.

The sale, for an undisclosed sum, is within the provisions the group set up in 1992 to cover such sales. Hillsdown shares rose 5p to 171p.

The buyer of the abattoir, which is at Torrington in Devon and employs 189 people, is a member of the Goodman International Group, the Irishowned beef processing group which in 1990 sought protection from its creditors.

A sharp deterioration in profits from its meat business, in an industry suffering chronic overcapacity, persuaded Hills-

down to announce in March an accelerated reduction in its activities in this area.

Hillsdown took a £92.3m pro-vision in its 1992 accounts covering this and other problems. The Torrington abattoir pro-

cesses 5,000 lambs, 3,000 pigs and 800 cattle a week, mainly selling to supermarkets and for export. In April, Hillsdown sold an abattoir, which processed 4,000 lambs and 800 cattle a week, for £2.5m. The Torrington abattoir, part

of Hillsdown's North Devon Meat subsidiary, is EC approved. New EC regulations on abattoirs were introduced in January this year, but those abattoirs which have not met the new standards can continue to operate for three years, sustaining the over-ca-pacity problem in the industry.

NEWS DIGEST

Palmerston seeks new capital

PALMERSTON Holdings, the lossmaking property group, yesterday announced it was in talks with its bankers with a view to agreeing a financial restructuring by way of a company voluntary arrangement.

The directors believe that, as a result of a revaluation of the company's assets, there is a shortfall in shareholders' funds of about £24m.

They said it was essential for the company's future that there was an injection of new equity share capital. Talks were underway with a new potential investor which, together with a CVA, might lead to a resolution of its prob-

Refinancing for Phoenix Timber

Phoenix Timber yesterday launched a refinancing following trading problems, the breaching of its banking covenants and the need for substantial provisions to be announced with its results for the year to March.

lt will make a 5-for-8 rights Issue at 8p a share to raise

£1.44m, underwritten by Co-operation Retirement Benefit Fund, an existing shareholder. CRBF will end up with between 14.8 per cent and 55.2 per cent of the ordinary share capital after the rights issue. It will also subscribe a total of £1.44m in loan notes subject to

shareholder clawback. If the refinancing is successful Phoenix' banks have agreed to extend banking facilities to the end of this year.

F&C Utilities offer attracts over £72m

The £50m offer for subscription for Foreign & Colonial Special Utilities Investment Trust was almost three times over sub-

In the public offer period applications were received for 28.8m income shares, 3.95m capital shares and 16.2m package units, representing £35m. Applications in the placing and public offer totalled £72.6m.

Applications for up to and including £6,000 worth have been balloted to meet 50 per cent of income shares. 87.5 per cent of capital shares and 75 per cent of package units.

Applications for more than £6,000 worth will be scaled back. They will receive 15.4 per cent of income shares, 79.4 per cent of capital, and 22.6 per cent of package units. Dealings start on August 23.

ACCOUNTANCY APPOINTMENTS

Financial Adviser & **Internal Auditor**

Saudi Arabia

£high, tax free

An important trading group based in Jeddah, market leader in its sector, seeks a qualified and experienced British person to help the Directors manage the Group's linance & administration to the highest professional standards. The Group's main operations are in Saudi Arabia and extend to various overseas countries.

Key responsibilities

ensuring meticulous performance of transactions in International trade and financial markets leading internal audit throughout the Group.

Essential qualifications

good degree and/or professional qualification in business administration, financial management or similar, professions in use of PC for financial analysis and projections, and text processing. at least five years' successful record in a similar post.

age 30 - 40. Middle Eastern experience and knowledge of Arabic would be valuable, though not essential.

NEWS DIGEST

T Clarke declines to £274,000

SHARES of T Clarke fell 10p to 72p yesterday following news that profits of the electrical contractor had fallen from 2872,207 to £274,464 pre-tax for the half year ended June 30. Turnover for the period improved to £32.22m (£30.12m). However, the directors warned that "given a real decline in turnover for the second half and anticipated redundancy

costs, the results will be substantially down for the year". The interim dividend is maintained at 1.28p from earnings of 1,265p (3,404p). Clarke is a ultimately owned by CS Holdings (Credit Suisse).

M&G Income shows 61% net assets rise

The split capital M&G income investment Trust had a net asset value of 70.6p per capital

Directors said that to reduce share at July 31, an advance of costs and to "facilitate easier 61 per cent on the previous July's level of 43.81p. administration" future divi-The value of the zero dividends would be paid on a sixmonthly basis. dend preference share rose

County Smaller Net revenue for the year amounted to £6.06m (£6.37m) for earnings of 2.46p (£58p) per net assets rise

Net asset value per ordinary share of the County Smaller Companies Investment Trust stood at 100.69p at July 1. That compared with the 93.63p standing at June 30 1992 which covered the period from incorporation on April 10 1991.

Available revenue for the year to end-June totalled £556,334 (£518,941 for period). A second interim dividend of 1.875p, in lieu of a final, makes a 3p (same) total.

North Midland Cons increases 13%

North Midland Construction increased pre-tax profits by 13 per cent from £84,000 to £95,000 in the six months to June 30 on sales down 11 per cent at

The interim dividend is 0.4p (0.3p), payable from earnings per share of 0.71p (0.56p).

Fidelity European net assets at 130.33p

At June 30 1993 net asset value of Fidelity European Values was stated to be 130.33p per share. In the half year to that date income totalled £1.34m. Net revenue was £474,000 for earnings per share of 1.14p.

Idwal Williams to buy rest of Graig

The scheme of arrangement for Idwal Williams to affect the buy-out of Graig Shipping shares not already owned by them has been sanctioned and accordingly the consideration of 157.5p cash per scheme share will be sent to sharehold-

ers in the next week. Graig's independent directors, Mr Gordon Owen, Mr Peter Tudball and Mr Glyn Harris, have resigned from the board in line with the agree-

Market share expected to fall in face of nuclear and gas-fired plants **Dawsongroup** shares jump 60p

SHARES IN Dawsongroup, the Milton Keynes-based commer-cial vehicle hire and distribution company, surged 60p to 303p yesterday on news of a jump in interim pre-tax profits from £1.97m to £3.55m.

Mr Peter Dawson, the chairman and chief executive who holds almost 75 per cent of the shares, said the result represented "an exceptional perfor-mance in what is still a fragile market."

The 80 per cent rise in profits for the six months to June 30 was achieved on the back of a 13 per cent increase in turn-

over to 224.8m. Earnings per share rose to 7.7p (4.5p) and the interim dividend is doubled to 1.5p. The group has two main divi-

sions - truck and trafler rentals and a large Volvo truck dealership. Mr Dawson said the rental side, which includes both short-term and contract hire as well as portable cold stores, continued to be the cornerstone of the group's recov-

Activity in the new and used truck market had increased but from a very low base. Margins had also been under fur-ther pressure on the service and parts side of the truck

Turnover from the rentals division was 5 per cent ahead at £17m, while pre-tax profits were 86 per cent up at £3.36m. That was achieved via a 10 per cent increase in rental revenues per unit, better utilisation of a smaller fleet and quality vehicles which could con

higher prices.
In contrast, the commercial vehicle division's turnover was up 34 per cent, with sales to third parties of £7.73m (£5.77m) and intra-group sales of £5.91m (£2.13m), but pre-tax profits were only 12 per cent ahead at

£191,000. Mr Clive Gear, finance director, said the company's financial position remained strong, gearing almost unchanged at 119 per cent. The gearing may sound high, but in our industry it's excep-

tionally low."

Net borrowings were £38.2m (£31.7m) and net interest payable was virtually unchanged at £2.05m

The rentals division plans to add at least one location to the current 29, and to replace more of the fleet. It believes it has a solid base of contract hire at 46 per cent of revenues, and points out that the portable cold store sector, now three years old, has doubled both size and turnover in the first

Conrad Ritblat cuts losses to £184,000

WITH ITS preliminary is generating an income yield statement for the year ended May 31, showing a much reduced loss, Conrad Ritblat Sinclair Goldsmith announced the purchase of the freehold of the building in Glasgow which houses its Scottish operations. It is buying the property, in West George Street, from Cityprop for £2.85m satisfied in

8m ordinary shares, subject to shareholders' approval. British Linen Bank is arranging the placing of up to 5.68m of the shares at 47.5p each; to raise £2.7m for the vendor.

The group occupies some 5,150 sq ft of the building at a current rent of \$61,700 per year, the remainder is let at a

total of £150,000. The property

of 7.43 per cent. Mr John Ritblat, chairman of this surveying, estate agency and rating consultancy group, reminded shareholders that the

merger of Conrad Ritblat and Sinclair Goldsmith was completed just before May 31. Despite a small drop in turnover from 22.77m to 22.67m the pre-tax loss was cut from £525,000 to £184,000 by affective control of costs. Losses per

share were 1.4p (3.5p). The rating division continued to "perform with distinc-tion", while the professional department expanded in valuation work. Agency markets were difficult because of lack of tenant demand.

PUBLIC NOTICES

NOTICE PUBLISHED BY THE SECRETARY OF STATE UNDER SUBSECTIONS 8(5) AND 10(6) OF THE TELECOMMUNICATIONS ACT 1984 The Secretary of State hereby gives notice as follows.

He proposes to grant separate licences under the Telecommunications Act 1984 ("the Act") to Sprint Holding (UK) Limited ("Sprint") and WORLDCOM INTERNATIONAL, INC ("WorldCom") to run telecommunication systems throughout the United Kingdom. Sprint and WorldCom are together referred to in this notice as "the Licensees", The licences will each be for a period of 25 years subject to earlier revocation in specified circumstances.

The principal effect of the licences will be to enable the Licensees to install and run telecommunication as throughout the United Kingdom. The Licensees will be able to provide a wide range of services but example radio services and certain intermedional services. The licences authorise connection to a wide rather systems including earth orbiting apparatus allowing the provision of some types of intermedional service. On securing a share of 25% or more of the mades in respect of particular services in an area apply the Director General of Telecommunications, each of the Licensees may be obliged to make available telecommunication services to all who reasonably request them within that area.

The licences will be subject to conditions such that section 8 of the Act will apply to them, thereby making each of the systems run under each licence eligible for designation as public telecommunication systems under section 9 of the Act. It is the intention of the Secretary of State to designate the systems of each of the Licensees as

The Secretary of State proposes to grant the Reences in response to an application from each Licensee for such a licence because he considers that it will help to satisfy demands in the United Kingdom for the provision of services of the type authorised, will promote the interests of consumers in respect of the quality and variety of such services, and will maintain and promote effective compension between those engaged in the provision of

He proposes to apply the telecommunications code ("the Code"), subject to certain exceptions and conditions, to Sprint throughout the United Kingdom and to WorldCom in London and its vicinity (a map of the area is smached as an Annex to the drampht tiesness. The effect of the exceptions and conditions to the application of the Code is that the Licensees will bave duties:

(a) to comply with various safety and environmental conditions, in particular (with certain exceptions) to install lines underground or only on such above-ground apparatus as is already installed for any purpose; (b) to comply with conditions designed to ensure efficiency and economy on the part of the Liconsecs, in connection with the execution of works on land concerning the installation, maintenance, repair or

(c) to consult certain public bodies before exercising particular powers under the Code, including the local planning and highway authorisies and, where appropriate, English Nature, Scotlish Natural Herit the Countryside Council for Wales, the National Trust and the National Trust for Scotland, as well as relevant electricity suppliers;

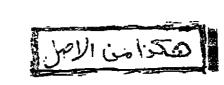

(d) to keep and make available records of the location of underground apparatus and copies of the exceptions and conditions in each ficence to the powers under the Code; and ure that sufficient funds are available to meet certain liabilities arising from the execution of

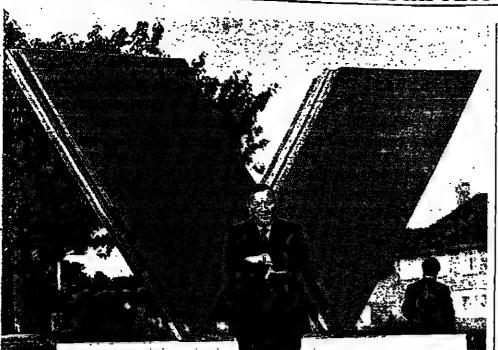

The reason why the Secretary of State proposes to apply the Code to the Licensees is that the Licensees will need the statutory powers in the Code to install and maintain the bijecommunication systems which are to be installed and run under the proposed licenses. institute and rin times use proposed accesses.

The reasons why it is proposed that the Code as applied should have effect subject to the exceptious and tions referred to show are that they are considered requisite or expedient for the purpose of securing physical cuvironment is protected, that there is no greater damage to land then necessary, that the system installed as sucidy and economically as possible, and that the Licensess can meet (and relevant personnel individual accessions from the economically.) and ecosomically as possible, and tarising from the execution of works.

Entorest into the straining from the constitution where the proposed licences, the application of the Code to either of the Licensees and the proposed exceptions and conditions referred to above. They should be made in writing by 8 October 1993 and addressed to the undersigned at the Department of Trade and Industry Telecommunications and Posts Division, Room 2.84, 151 Buckinghain Palace Road, London, SWIW 958. Copies of the proposed licences can freely be obtained by writing to the Department or by calling 071-215 1736.

PJ Kirby

Wickes achieves £4.1m and resumes dividend payments

WICKES, the DIY and timber retailer which came close to collapse two years ago, yester-day returned to the dividend after a two-year absence, on the back of improved interim profits.

The company, which operates III stores in the UK, Belgium, the Netherlands and France, declared an interim pay-out of 0.2p as it revealed pre-tax profits of 24.08m for the six months to June 30.

That compared with \$6.5m last year on an FRS 3 basis, which included extraordinary gains of £5.1m on the conversion of unsecured loan stock. Stripping out those gains, the comparable pre-tax profit was

Earnings were 1.0p (2.1p including extraordinary gains). Turnover increased to £294m (£266.5m). UK turnover increased by 13 per cent and pre-tax profits by I7 per cent. Excluding new stores, likefor-like sales rose only 0.5 per

cent. But Mr Henry Sweet-baum, cheirman, said that rep-

Bass sells 46 pubs to Marston

By Philip Rawstorne

BASS has agreed to sell 46 public houses to Marston Thompson & Evershed, the Staffordshire-based regional brewer, for £10.8m.

This follows Bass's sale of 44 pubs to Greene King, the East Anglian brewer, last week for Mr John Denning, director

of Bass Taverns, said yesterday: "We continue to manage our portfolio of pubs to improve the overall quality of our estate and the return on apital employed."

Bass has opened 22 new houses so far this year and has further 16 sites under development, representing a total investment of £34m.

The pubs bought by Marston are mainly in south and south-west England and in Yorkshire and Lincolnshire, areas in which the brewer is not represented in strength; 38 are freehold and 37 are under management, with the rest let

Mr David Gordon, managing director of Marston, said the outlets acquired increase the company's estate to 230 managed houses and 664 tenanted

Bristol Channel shares suspended

By Jean Marshall

SHARES IN Bristol Channel Ship Repairers were suspended yesterday at 8p at the company's request pending share-holders' approval of its reorganisation proposals.

Mr Christopher Bailey, chair-man, said the company had started talks with Mr Andreas O Ugland and other members of his family regarding the pro-posed acquisition of a fleet of vessels and a ship management business.

Should the transaction pro-ceed, he said the company expected to fund the purchase price, expected to be between £15m and £20m, by means of a rights issue. The enlarged group would be better positioned to take advantage of further shipping-related opportu-

At the same time the ship repairer and engineer announced a pre-tax loss of

Brammer studies pumps arm bid

Brammer, the ball bearing distributor and electrical services group, yesterday said it was considering a conditional offer for its Master Pumps and Equipment US offshoot

26, compared with profits of £168,604. Turnover fell to £48,974 (£1.27m).

Mr Bailey said the result had been hit by the recession, coupled with the upgrading work which had effectively closed the dry docks for some months.

The losses were also after a non-recurring charge of £180,000 for cancelling management and administration agreements with CH Bailey, a £134,000 rise in repair and maintenance costs and other non-recurring charges. Losses per share were 0.74p.

against earnings of 0.21p. Mr Bailey said that at about the time of the annual meeting he would step down in favour of Mr Ugland. Other directors would also be resigning. Mr Ugland is chairman of

Ugland Brothers, a ship management company, which is Bristol's largest shareholder with a 24.19 per cent stake.

The approach could lead to a

firm offer within the next few

it has been seeking a buyer

under its policy of concentrat-

weeks, the company said.

(declared 19 August 1992)

1. Life insurance surplus Actuarial valuations of the life funds of Liberty Life and its subsidiary are not conducted at the half-year stage. For the purpose of this Interim report, the net taxed surplus has been based on an estimate resulting in net taxed surplus per share being

2. Capitalisation share award and right of election to receive the interim cash dividend in lieu thereof

shown at half the level achieved for the provious full financial year ended 31 December

The directors have resolved to award capitalisation shares to ordinary shareholders of Liberty Life who are registered in the books of the company at the close of business on Friday, 3 September 1993 in lieu of the interim cash dividend in the ratio of 1.5 new fully paid ordinary shares of 10 cents in Liberty Life for every 100 ordinary shares held ("the capitalisation shares"). Shareholders are entitled and will be given the opportunity to decline the award of capitalisation shares in respect of all or any part of their shareholding and instead may elect to receive an interim cash dividend in respect of the year ending 31 December 1993 of 80 cents per ordinary share ("the

In the normal course, the Liberty Life interim dividend would have been ob cents per Share following the company's usual dividend policy at the interim stage of declaring half of the previous year's total normal dividend. In conjunction with the award of capitalisation shares in lieu of the interim dividend, it has been decided that the equivalent interim cash dividend which may be elected, would for 1993 be declared at 80 cents per ordinary share, being half of the estimated total dividend for the year of 160 cents (1992: 132 cents). It should be stressed that this change in dividend policy and capitalisation issue must not be assumed as a precedent and will not necessarily

To the extent that capitalisation shares are issued in the above circumstances, this should minimise Liberty Life's liability in respect of Secondary Tax on Companies (STC). Non-resident shareholders making the election to receive the interim cash dividend will be subject to non-resident shareholders' tax of 15%. However, this will not apply in the case of non-resident shareholders receiving the capitalisation shares.

The new ordinary Liberty Life shares which will be issued pursuant to the capitalisation share award will be issued as tully paid up by way of a capitalisation of part of Liberty Life's distributable reserves and for share premium. Subject to the approval of The Johannesburg Stock Exchange and the London Stock Exchange, a listing for the new Liberty Life ordinary shares to be issued pursuant to the capitalisation share award will commence on Friday, 8 October 1993. Documentation dealing with the capitalisation share award and the interim cash dividend election will be posted to shareholders on or about Thursday, 9 September 1993. In order to be valid, completed election forms will need to be received by the company's South African or United Kingdom transfer secretaries, as the case may be, by no later than Friday, 1 October 1993. Should such electron not be timeously received, Liberty Life will automatically issue capitalisation shares to all relevant shareholders concerned.

The award of capitalisation shares will only be made to ordinary shareholders of Liberty Life on the basis of holdings of ordinary shares in whole shares. All fractions of new capitalisation shares will be aggregated and sold on The Johannesburg Stock Exchange for the benefit of all relevant shareholders.

It is expected that share certificates in respect of the new Liberty Life ordinary shares and, if applicable, cheques in respect of the interim cash dividend and fractions will be posted to shareholders on or about Friday, 8 October 1993.

3. Changes in subsidiaries Listing of Liblife Strategic Investments Limited ("Libsd") on The Johannesburg Stock

It was announced on 22 July 1993 that Liblife Strategic Investments Limited ("Libsil"), a wholly-owned subsidiary of Liberty Life which was formed in 1983 for the purpose of holding for the account of shareholders' funds of Liberty Life part of the key strategic investments in leading South African industrial and financial companies, which, at the time of acquisition by Liberty Lite, were considered to be too large for prudent absorption within the policyholders' portfolios of Liberty Life, would be listed on The Johannesburg Stock Exchange.

*Note: Converted at the Commercial Rand rate of exchange at 30 June 1993 of £1 = R5,02

In order to implement these arrangements, Liberty Life on 4 August 1993 offered to its shareholders the renounceable rights to 114.57 million Libsil shares in the ratio of 50 Libsil shares for every 100 Liberty Life shares held to raise approximately R1,03 billion for Liberty Life before expenses. These shares were offered at a price of 900 cents per share calculated on the basis of a discount to Libsil's net asset value of approximately 10% at 21 July 1993, being the date upon which the terms of Liberty Life's offer were finalised. Shareholders were also given the opportunity of applying for additional Libstl shares at a price of 1 000 cents per share being the approximate net asset value per Libsil share at 21 July 1993. At the close of business on 16 August 1993, this net asset value was calculated at 1 000 cents. The offer will close on Friday, 3 September 1993. In the event that the offer is fully taken up. Liberty Life will hold approximately 80% of Libsil's issued ordinary share capital which for the purpose of the listing was established at 558 million shares of 1 cent each.

Total new business written by Liberty Life and its wholly-owned subsidiary, Charter Life Insurance Company Limited, during the six months ended 30 June 1993 amounted to a record R1 036 million, representing a 47% increase over the R706 million recorded for the comparable period in 1992.

New annualised recurring premium income for the first six months of 1993 was R344 million, an increase of 24% over 1992's first half performance of R278 million. Single premiums totalled R692 million, an increase of 62% over the comparable amount written in 1992 of R428 million.

Achieved in the prevailing depressed economic conditions affecting South Africa. Liberty Life's new business tigures confirm its proven ability to enhance market share through the continuing success of its extensive product range and its outstanding investment performance on behalf of its policyholders.

The net taxed surplus attributable to ordinary shareholders increased by 22.3% to R177,0 million (1992: R144,7 million) for the six-month period ended 30 June 1993. This increase is based on the conservative estimate of half the previous full financial years' not taxed surplus. This enabled the payment of the equivalent cash dividend of 80 cents per share, representing half the estimated total dividend of 160 cents per share for 1493, in conformity with the provisions of note 2 hereof.

Facilitated by a sharp rise in net premium income, which increased by 30% in the sixmonth period under review to R1.72 billion (1992; R1.32 billion) and the outstanding overall performance of Liberty Life, particularly in the investment area, total consolidated assets of the company improved from R35.7 billion to R40.4 billion. Over the six-month period, the Life Funds (including investment and other reserves) increased by R3.1 billion to a total of R26,1 billion and total shareholders' capital and reserves employed increased from R8.5 billion to almost R10,0 billion at 30 June 1993. Subject to no unforeseen factors arising during the remaining months of the financial

year, the net taxed surplus and results for 1993 are expected to show a satisfactory improvement over the level attained in 1992.

As this Fund was oversubscribed, this notice appears as a matter of record only.

HE unsurprising event for accounting and auditing this year – with the unprecedented

volume of pronouncements - has been the cry of "too much". But I have another concern; over-engineer the rules and you will endanger accountancy as a real profession.

There are still too many options for accounting for the same thing, when no one way can rationally be said to be right or best. The Accounting Standards Board needs support and encouragement in resolving the remaining issues. It is time, also, to extract ourselves from a stick-in-the-mud attitude to the need to redefine and revitalise the audit.

But you need a well sharpened pencil to draw the line between narrowing choices and compromising professional judgments, I readily acknowledge that practising accountants should now reassert the author-ity of those judgments and thus render an almighty rule book

For that is what professionalism means: forming judgments from professional experience and then sticking to what your guts tell you, however tough the going. Most accounting is commonsense. An experienced auditor conducting a rapid financial investigation of a company will instinc-tively judge its financial state without pondering over the fine print of the

rule book. That is what a good audit represents, or should do. But I am currently seeing its reverse. The threat of sanctions (not least through litigation for absurd sums) engenders an attitude which says "stick to what the

Auditing should remain an art. It is overlooked that the term derives from

To contribute to fundamental cultural change,

Roger Davis argues that professional experience and instinct should count for more than rigid adherence to the rule book

to listen to explanations and to judge on whether they stand up. The growing complexity of the different parts which make up a business, and of the environment in which it functions. requires more judgment, not less, by the auditor.

The problem is that the more rules you have, the more the avoidance industry will find the loopholes; and the inevitable consequence being yet more rules. It is so obvious that I stress it only because it is what I see happening in practice. Write a 50-page standard on the meaning of each of the 10 commandments and those inclined to adultery will find something to excuse their indul-

Applying that analogy to account-ing, you find the need for yet more explanatory notes to the accounts as an excuse for not getting the figures right in the first place. It adds yet further to the complexity of company

There is a danger of reaching a level of auditing and accounting precision with which business will not be able to cope. Companies will adopt one accounting policy for their external reporting and another for internal management purposes. There can be no sense in that.

I fear for a profession more con-cerned with whether the figures get into the right boxes, rather than with a sensible overall picture of business performance, encapsulated in this recent exchange with one of our brightest managers: "If you were run-

fully committed to the project; they are rightly insisting, however, that the need for rigorous cost

inevitable acceleration in overhead spend. There is little income as yet, but the major shareholders are

the latin auditore - to listen; that is, ning this company would you think you had done well or badly?" answered by "It depends on how you

interpret the standard". So we have a stark choice. Auditors will go on shielding behind an evergrowing rule book. Or they will stand up to be counted on accounting that flies in the face of commonsense; I believe auditors did lose some of that culture in the 1980s, because of competitive pressures to retain business in an environment which was already encouraging a legalistic approach to

¬ hankfully, my evidence is that the climate has changed; company boards are increasingly asking auditors robustly to challenge their thinking on financial reporting and stewardship. The practising accountant should capitalise on the

For I fear the consequences if the trend continues and a rule book mentality really does get a grip on auditing and accountancy. At best you will narrow the outlook of the people in the profession and they will increasingly lose sight of the underlying commercial drivers of the business being audited. At worst you will no longer be able to attract or retain those with the able and agile minds auditing needs if it is to serve the public interest.

It will also be deleterious to the outstanding business training which the profession has traditionally given to its graduates and from which industry has benefited.

M4 Corridor

on what the auditor can and cannot do, such as so-called audit quarantining to build fences between auditors and management: a red herring if ever there was one, and something that betrays an outdated understanding of the profession.

Because the professional accountant's traditional business advice has required more specialism, many accountancy firms have become multi-disciplinary partnerships. Rather than threatening audit independence, all their services represent a professional challenge, founded on the audit discipline. Increasingly audit itself needs industry and functional specialists from non-accounting

The final audit report to shareholders should be based on regular assurance to management from a unique professional perspective, and by working on the correct assumption that most British management is trying to do its best for stakeholders.

When the chairman of one of our largest clients said to me recently, As the company's auditor, do you think the board should involve itself in this transaction whose ethics could be questioned?" should I have said "I am not allowed to advise you but I will tell you after the

The good auditor has a knack of sensing those who are only on the make for themselves. No amount of rules will help: not highly prescriptive accounting standards; not lengthy auditing standards; not lengthier company accounts; and not longer audit reports. Quite simply an auditor should not put his or her name to a company report if the professional instinct says the basic message is wrong. But that is not the way we are

This is where we get back to professionalism. It is about none of the above, but the ability and attitude of those who work in the profession.

The victous circle is ever more regulations and a disinclination for brighter graduates to join the party. The virtuous circle is the opposite. Can auditors be trusted with flexibil-

ity? Auditors have to earn that trust. I Practising accountants should view the rule books as the underpin-

ning and not the driver of their judg-• They should be able to stand up for those judgments without fear of the consequences. So they need sup-port, which they don't always get, not just from company managements but from all those institutions who share

governance.

Those who write the rules should concentrate on the spirit and avoid the growing tendency to over-engineer commonsense subjects.

Clarendon House, 81 Mosley Street, Manchester M2 3LQ. Please quote ref 162156.

Michael Page Finance

REGIONAL CHIEF AUDITOR

c.£55,000 + Banking Benefits and Car

Standard Chartered, one of the largest and most successful of British international banks, operates in more than 50 countries worldwide. The Group Audit department performs an important role in ensuring that the bank has the resources and controls required to develop and manage the business effectively.

This senior post, available due to internal promotion, is one of a small management team reporting direct to the Group Head of Audit and Security. It carries full responsibility for teams

of auditors based in the UK and Europe, and will include international assignments, thereby embracing a broad range of activity both geographically and by product.

The right person will combine genuine leadership skills with a strong background in auditing international banking activities. Regular travel will be involved, and an ability to liaise effectively at the most senior levels is essential. The position demands high standards and in return offers exceptional involvement and prospects.

Please write in confidence to our adviser, Nigel Halsey, at The Halsey Consulting Partnership, 34 Brook Street, Mayfair, London W1Y 1YA. Telephone 071-495 4446.

Standard & Chartered

Group Finance Director

North West

Since its inception in July 1991 the Peaco Group has grown dramatically with an acquisition, on average, every six months. The Group has an annual turnover in excess of £10m and has assembled four market leading performance sportswear brands. They have ambitious plans for the future and seek to appoint a Group Finance Director to assist in the profitable development of the business.

Reporting to the Chief Executive, you will assume full responsibility for the financial management of the Group encompassing statutory accounting, monthly reporting, budgetary control and systems development. You will be a key member of a closely knit management team and will be expected to provide strong financial

c £38,000 + Car + Benefits

leadership and have a significant influence on the future of the business.

Candidates are likely to be Chartered Accountants, aged 33-40, who will have operated as Finance Director of an independent company or an autonomous business. In addition you will need to demonstrate a strong track record of achievement combined with the maturity, energy and interpersonal skills necessary to succeed in a dynamic

COMMODITIES AND AGRICULTURE

CIS offered 50% export cut in aluminium talks

By Kenneth Gooding, Mining Correspondent

THE COMMONWEALTH of Independent States tentatively offered to cut its annual aluminium exports to the European Community to about 300,000 tonnes, nearly 50 per cent below the 1992 level of 582,000 tonnes, during recent contacts with the EC.

In contrast, European aluminium producers suggest imports should be restricted to 80,000 tonnes - which they claim was the "normal" level before CIS exports began to surge in 1990. The European Commission appears to favour a limit of 150 000 tonnes which was the annual average for the past three years.

This was a crucial issue when the commission recently made determined attempts to persuade the CIS industry voluntarily to restrain exports.

The commission went armed with a report of its investigation into the impact of the unprecedented increase in CIS exports that came to the conclusion that "serious damage" was being done to the EC aluminium industry. It also suggested restrictions should be imposed on CIS aluminium imports to the community. Having failed to reach a

quick understanding with the CIS producers, the commission on August 7 said it would limit imports of CIS aluminium to the end of November to 60,000 tonnes. That would give the European industry some breathing space while further negotiations took place.

The restrictions have been widely condemned, mainly because aluminium is a global commodity and the CIS material will simply flow to other markets and be replaced in the EC by metal from producers outside the CIS. The commission's report

warned that there were drawlateral restrictions. It said such action would "unquestionably draw a particularly negative reaction" from the CIS.

It also suggested that the effect on the London Metal Exchange, which sets the world price of aluminium. would be "unclear but limited and not immediate".

Also, much of the CIS aluminium was slightly below the quality required by the LME and was therefore sold at a discount to the world price. But it could be blended with higher-

grade material and was then suitable for most purposes. The report pointed out that the imposition of restrictions would give a competitive advantage to producers outside the community who still had unlimited access to this lowerpriced metal. The report also concluded

that limiting imports of CIS aluminium to the EC "only addresses one of the causes of the aluminium industry's problems. A full solution would require that [the CIS] has more disciplined export policies in order to restore the world balance of supply and demand."
Although widely criticised.

the EC's action does seem to be having an effect. Russia's foreign trade ministry announced on Wednesday that it would cut the number of organisations permitted to export metals from 132 to five and the number allowed to export oil from 114 to nine. Ms Tatyana Aristarkhova, adviser to Mr Sergei Glazyev, the foreign trade minister, said: "We had big losses of foreign revenue in the past because of a number of incompetent exporters. This provoked all these antidumping campaigns against

Mexican oil giant profits from private tuition

Commercial contractors are showing Pemex how to cut costs, writes Damian Fraser

FF THE south-east further relaxation is expected old monopoly of the distribucoast of Mexico in the Sound of Campeche a group of foreign and private Mexican oil companies is drilling for oil. Petroleos Maxicanos (Pemex), the country's state of

corporation. In the nearest on-shore town, Cludad del Carmen, property prices have soared as new residents have looked for homes: local entrepreneurs have set up video bars and a Kentucky Fried Chicken outlet to cash in on the boom; and rich, rowdy foreign oil workers have upset

After being closed to foreign oil drillers since the early 1970s, Mexico is now opening up. Private - and thus foreign companies still cannot explore for oil and take a cut of what they find, but they are doing drilling work for Pemex on a contract or turnkey basis Of about 60 wells in the Bay of Campeche, 36 are being drilled by private oil companies, at a cost to Pemex of between \$300m and 400m.

While the government is unlikely before next year's presidential election to modify Mexico's nationalist constitu tion to permit foreign oil companies to explore for oil. some

tion of oil in Mexico. This is not the end of the trend toward opening," says Mr Rafael Quijano, an expert

ington. "Quite the contrary; it

The partial opening of the sector to foreign contractors has already had an effect on how Pemer does business. on Pemex at the Petroleum Thanks to their greater nimble Finance Corporation in Washness and efficiency, private contractors take half as much time to drill a well as the state Pemex recently allowed a

'Pemex's main problem is not that they don't have good people in the field. Its the ponderous organisation above that'

private consortium headed by Valero Energy of Texas to build, onerate and own a casoline plant in Mexico for the first time, and has taken a 50 per cent stake in Shell's refinery at Deer Park, Texas. It had also put up secondary pet-rochemicals plants for sale, although this has now been postponed for the foreseeable future because of low petro-

chemical prices.

In an indication of possible changes ahead, the government has drawn up draft legislation that would allow private companies to use Pemex pipes to import oil, according to a report cited in the El Financiero newspaper. Such legisla-tion, if passed by to congress, would break Pemex's 55-yearcompany, according to Mr Ernesto Marcos, its finance director. So contracting out has saved Pemex huge sums in drilling costs, as well as teaching it lessons that it has used

to improve its own operations. We are not willing to follow examples of pre-cooked dinners [on the rigs]," says Mr Marcos, referring to Mexican distaste for American frozen food, "but we certainly follow other practices of the private compa-nies." He points out that Pemex has substantially decentralised procurement, allowing rigs to buy equipment directly from suppliers, rather than through the Mexico City headquarters, which often entailed months of delay. The private drillers are gen-

erally American, Mexican or joint-ventures between the two. So far of the 36 wells contracted out, most have been to four companies - Triton international of Houston, Faja de Oro and Protexa, both Mexican, but contracting work out to foreigners, and a joint Mexican-US owned company, EPN-

They operate on a turnkey basis, drilling a given depth for a specified sum before handing over the well to Pemex, which brings it into production, and take all financial risk in case drilling proves more difficult than expected. Generally they make do without the large numbers of cooks, waiters and other excess staff seen on the Pemex wells and have an average basic crew of 32 to 35, compared with 42 at Pemer

Apart from personnel, the main difference between the private companies and Pemer is in logistical and managerial expertise, rather than technology. One oil man in Campeche explains: "Pemex's main problem is not that they don't have good people in the field. Its the underous organisation above that. They have to go to six or eight people to make a deci-sion, whereas I can make one there and then".

Mr Marcos thoroughly agrees. "Before, we had to coordinate people in drilling with

people in procurement with people in transportation. You can never structure yourself in a company this size so that such co-ordination is efficient." The lack of co-ordination caused delays in drilling pushing up Pemer's costs.

So convinced is the company of the benefits of contracting out that Mr Marcos claims it is now ahead of most international oil companies in the pro-portion of drilling work it gives out on a turn-key basis. Pemer will continue to drill a few of its own wells, he says, but only to keep abreast of technological developments.

The main limit on such contract work is Pemex's own budget rather than lack of oil to be taken out. The Sound of Campeche is rich in oil, producing 19m barrels a day of Mexico total of 2.67m b/d last year. Its extraction costs are among the lowest in the world, and were there were more funds, further investment in exploration and drilling would be justified, says

But although the govern-ment tells Pemex to operate as s commercial company, it sets its budget according to political criteria. The company is under instructions to meet growing demand for all and maintain exports at current levels of about 1.37m b/d; rather than to maximise

Ukrainian grain estimate raised

bility not only of eliminating purchases of foreign grain, but even of selling it." he said. "This applies particularly to wheat. There is even a possibility of exporting seed."

Ukraine last year imported small amounts of grain, mainly for animal feed.

The Itar-Tass news agency quoted Ukraine's ambassador in Moscow, Mr Vladimir Kryzhanovsky, as saying the country had such a good grain harvest this year that it was considering the possibility of paying off its debt for Russian energy supplies with 5m tonnes of grain exports.

NZ dairy farmers face disappointing market returns

By Terry Hall in Wellington

A SHARP fall in the prices on some international dairy markets in recent weeks has cast doubt on the New Zealand Dairy Board's ability to meet this season's target payout to

farmers. In May Mr Dryden Spring. the board's chairman, told dairy farmers, in his traditional pre season message, that a payout of NZS5.50 (22) per kilogram of milk fat was likely in the year to June 30, 1994, Mr Spring's forecasts are usually cautious, being designed to help farmers plan for the coming year, but this time he appears to have been over-opti-

cated yesterday. The blay statement was made at a time when the industry was in a buoyant mood following last season's \$5.65 payout, to which was added various dairy company payments of up to NZ\$1 per

WORLD COMMODITIES PRICES

kilogram, giving some farmers record returns.

But the market situation has not lived up to expectations. The price for butter has stayed in the doldrums, and there has been a sharp weakening in the value of whole milk powder.

Much of the present problem centres on currency difficulties, which are inhibiting trade in most dairy commodities except cheese, the official said. Of particular concern is the fall in European currencies against the US dollar, in which much of the world's dairy trade is carried out, and this situation has been worseed by the recent strong rise in the value of the New Zealand doi-

The board has warned farmers that the high level of opti-mism in the New Zealand industry, which is leading to high prices for both stock and farmland, does not take account of what it hopes will be short term pressures in the

NZ dairy men look like losing on this year's roundabouts what they gained on last year's swings

The official said it was unlikely that there would be an early lift in butter prices and there were question marks over the price for milk powder of which New Zealand hopes to sell 320,000 tonnes abroad this season, twice the amount produced just four years ago. He said that demand for New Zealand cheese was holding up-well, adding: "It really is the

glamour product of

moment. . World demand for cheese - especially the constatent type New Zealand produces

that did not rely on cheese to some extent - whether they be ers or Mexican or pasta dishes. In addition there was a strong demand from manufacturers of

effects of the sharp drop in international butter and milk powder prices would have been is growing strongly". much more severe a decade

He pointed out that there ago, when New Zealand prorange of commodities in bulk form. Now about 70 per cent of were exported in consumer ready form, he said, which helped to "soften the blow" of

MARKET REPORT

A fluctuating London Metal Exchange COPPER market recovered losses in the afternoon and the three months delivery price \$2 on the day. An early fall below \$1,900 triggered a bout of speculative selling that sent the price to \$1,890. But buyers were encouraged by continuing nearby technical tightness, which held the cash/three months premium at just above \$30 a tonne. The ZINC market firmed by \$9.50 over the day to end after hours trading at \$893.50 a tonne. Traders saw no news behind the rise and said that after several days testing, and

LONDON STOCK EXCHANGE

Shares easier after turbulent session

By Terry Byland, UK Stock Market Editor

AN EXPECTED bout of profit-taking in the London . stock market was overwhelmed yesterday by a series of unforeseen developments elsewhere in the global markets arena. A huge increase in the US trade deficit in June, a bombing raid on Iraq by American aircraft, and a warning on the economic outlook from Hang Seng Bank, Hong Kong subsidiary of HSBC, prompted a turbulent session for share prices. But all ended well, with the FT-SE 100 index rallying to close a net 8.1 off at 3,065.5.

London market strategists professed themselves satisfied with the final picture, pointing out that the fall on the Footsie was of little significance when measured against the upsurge of the past month.

Equities opened higher, largely on the back of US buying orders laid down overnight by Wall Street investors celebrating the record close on the

Dow Industrial Average. Within half an hour of the official opening, the FT-SE Index was 15.6 points ahead at a new trading peak of 3,089.2 and traders were hoping to see the 3,100 mark challenged before the end of the day. In the banking sector, Barclays rose sharply on the

has appointed the new chief

executive for which it has been traders began to take some of the trading session seeking.

However, neither UK government bonds nor stock index futures would give support and the market began to soften. The report from the Hang Seng bank, expressing some caution on the outlook for global economies, cast a cloud over the London market's newly-in-spired confidence. Share prices

turned off smartly and market

the large paper profits already chalked up in the equity trading account which opened on

came just before Wall Street opened, with the news that the US trade deficit had jumped by about 44 per cent in June. The Footsie quickly dropped to 3,054.8, a turnround of 33 points since the early part of

TRADING VOLUME IN MAJOR STOCKS

London feared the worst, but was proved wrong when the US bond market held up relatively well and the Dow Industrial Average also held steady to show a gain of 3.08 in UK trading hours. The Footsie staged a good recovery to close on a buoyant note in good turnover, although restrained by substantial falls in HSBC and similarly Far Eastern-orientated stocks.

Seaq volume remained high at 836.9m shares, if slightly below Wednesday's 887.1m; retail, or customer business jumped to £1.92bn on Wednesday as overseas investors bought heavily into UK equi-

Traders said that foreign investors had held back yester-day, while UK funds had switched their attention to the second line stocks. Non-Footsie shares made up around 62 per cent of the Seaq total, although the FT-SE Mid 250 Index dipped 8.9 to 3,486.0.

The international blue chip stocks had a difficult session pressure before finding support from the Federal Reserve. The drug sector held firm but saw support from the US which has stimulated the sector's rally from its heavy setback.

Domestic, interest-related, issues moved erratically as a weaker session in the UK bond market challenged some of the optimism for base rate cuts.

Shares in HSBC savaged

THE MASSIVE rerating and upsurge in HSRC shares since the Hong Kong bank's July 1992 merger with Midland Bank, of the UK, was brought to a shuddering halt yesterday after the UK market reacted with dismay to much lower than expected profits from HSBC's Hong Kong subsidiary

Hang Seng Bank. The Hong Kong subsidiary posted profits up 17 per cent at HK\$2.75bn, compared with HK\$2.37bn, while the market had expected a profits rise in the region of 23 per cent. Hang Seng accompanied its results with a cautious review of pros-

pects in the region. HSBC is by far the largest of the UK-registered banks, measured by market capitisation,

dwarfing others such as Bar-clays, NatWest and Lloyds. Some London-based analysts put on a brave face as marketmakers savaged the HSBC share price. One said: "The market has not taken on board the fact that it was only recently that the Hong Kong banks began to lift the veil of secrecy that has surrounded their real profits for the last 60 years. There is a feeling that Hang Seng may have only declared something like 80 per cent of their real profits during the half year." The analyst added that a much clearer picture would emerge with Hang

Seng's full-year numbers. HSBC is scheduled to report interim results on August 31, with analysts previously looking for profits in excess of £1.25km, up from £521m. buosted by the inclusion of profits from Midland Bank and the big shift in the value of the HK dollar against steriing.

HSBC shares, trading at 341p at the time of the Midland merger in July last year, subsided to 316p by last August before embarking on a remarkable run which took the share lier this week. Yesterday it dropped 40, or 5.2 per cent, to 724p, with the Hong Kong-registered shares down 35 at 706p. Turnover in HSBC 75p shares reached 13m, with more

than 3m of the Hong Kong-registered shares changing hands. The Hang Seng shock also jolted Standard Chartered shares from their upward tack. Worries that profits growth generated by the bank's Far Eastern businesses could slow saw Standard slide 25 to 964p.

Barclays in demand

The appointment by Bar-clays of Mr Martin Taylor as its new chief executive as from January 1 next year triggered a burst of heavy buying in Bar-clays shares, which touched 494p at one point before ending

19 up at 491p. Turnover in Barclays totalled 16m, well above usual levels of activity and the highest single day's trade since the aftermath of the bank's firstever preliminary loss and the halved dividend announced last March

The appointment of Mr Taylor was described as "very good news" by one banks spe-cialist, although he professed surprise at the extent of the share price rise. Mr Taylor is currently chairman and chief executive of Courtaulds Textiles. The latter's shares tumbled as the news came out, closing 15 lower at 548p on turnover of 1.5m.

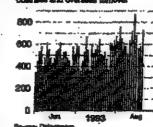

The rise in Barclays came at the expense of other banks, notably Lloyds, which fell 10 to 535p on hefty turnover of 4.1m as some institutions switched between the two stocks.

BAe setback

Shares in British Aerospace came under pressure after Taiwan's vice-economics minister was quoted as saying that BAe's regional jets joint venture with Taiwan may not go

FT-A All-Share index

ahead due to differences between BAe and local banks over its financing

volume of 4m.

still has commercial logic and

ley on Monday. Redland, down 17 at 513p, and BMC, 18 lower at 795p, were the two main casualties

is7p.

RPB eased 2% to 250p, after Philips & Drew Fund Management said it had reduced its holding to below the 2 per cent

The reports sent the stock tumbling, and at the day's worst the shares were down 28 at 445p. A denial of problems in the negotiations from British Aerospace helped to steady nerves and the shares clawed back some of the earlier losse to finish 14 lighter at 454p on

Mr Sandy Morris at NatWest Securities said: "The regional jets deal is no longer a make or break issue for BAe particularly after the disposal of the corporate jets business, but we belive the regional jets venture

it will go through." The heavy end of the building sectors came under sustained selling pressure, following bearish comments on the sector from Carr Kitcat & Ait-ken, the stockbroker, and following on from the rather gloomy picture painted by Mar-

in the sector, with Rugby 4 off at 278p and Marley 6 down at

EQUITY FUTURES AND OPTIONS TRADING

TRADING volumes remained high in the London derivatives markets yesterday but they drifted lower in the absence of the overseas demand seen in the previous session, writes

Terry Byland. In stock index futures, the September Footsie contract to a new trading peak of 3,201 trade deficit, undermined both stock index futures and the

was lost as it became clear that there was no fol-low-through to what had clearly been the buying orders in the overnight posthag.

A disappointing interim report from Hang Seng Bank, the Hong Kong subsidiary of HSBC, and then a substantial, broke through 3,100, moving to a new trading peak of 3,201

underlying share prices. The September contract fell to 3,065 before steadying to close at 3,073, virtually in line with the fair value premium estimated at 4 points against the cash market. Turnover

reached 12,374 contracts. Volume in traded options dipped to 46,299 contracts from Wednesday's 74,157 as indees braced themselves for

expiry today of the Footsie Index options. The Footsie Option traded 15,523 contracts and the Euro Footsie 5,549 yesterday.

Among individual stock options, British Gas stood out with 3,558 contracts as investors continued to weigh the import of the report from the UK Monopolies and Mergers

up to 152p and the warrants 2 to 52%p with some dealers taking the view that the Abu Dhabi Investment Authority had recently been reducing its stake in the ordinaries and

increasing its holdings in the warrant. Merchant banks and quoted market operators enjoyed another strong session with from SG Warburg.

investors chasing the stocks higher again in response to the continuing high level of stock market activity. SG Warburg, viewed by many as the London market's leading and most successful integrated securities house, raced up 9 more to a peak 813p while Kleinwort Benson, another of the City's most powerful integrated operations, jumped 8 to 507p. its highest level since the Great Crash of October 1967. Smith New Court added 8 to a

peak 342p.

Prudential moved up 4 to 332p as insurance specialists began to focus on the group's poor performance against the market over the past month "the shares are due a bounce after underperforming the market by over 12 per cent on the month and by almost 5 per cent in the past quarter," noted

one specialist. Among brewers, James Capel was said to have issued a buy recommendation for several of the stocks in the sector, though the agency broker refused to confirm the recommendation. Bass, was said to have been among the stocks included on the buy list. Sentiment in the stock was also helped by news that it had sold 46 pubs to Marston, Thompson & Evershed for £10.78m. The

shares gained 5 to 511p. A broker's recommendation together with a disposal com-bined to boost Hillsdown Holdings. Hoare Govett were said to have recommended the stock on yield considerations. The shares close 5 up at 171p.

Turnover in Cray Electronics shares leapt to over 18m after Sir Peter Michael, a former director, sold a total of almost 9m shares at 140p. The 9m was made up of his existing holding of 3.4m shares and 5.6m shares acquired by the conversion of "A" and "B" Convertible shares. Cray shares edged up

2½ to 148½p. Cadbury-Schweppes put on 10 to 501p, after it was recommended by SG Warburg, its

Yen plummets on intervention

THE YEN'S powerful rise against the dollar was dramatically reversed at the start of US trading yesterday after the Federal Reserve intervened four times in support of its own currency, writes James

The Fed's intervention on dollar, yen came after a joug period in which dealers had been led to believe that President Clinton's administration was indifferent to the decline in the exchange rate, prefering to see a fall in the Japanese

trade surolus. Both the timing and the intensity of the intervention took the market completely by surprise and triggered one of the sharpest moves seen in an

exchange rate for a long time. Between 1520 and 1730 Locdon time, the dollar mored from Y101.70 to Y104 50, a drop of nearly three per cent in value as market players frantically squared long yen posi-

As London trading closed. the dollar's rise appeared to be showing no sign of levelling off. Dealers said that Fed intervention was well-timed and extremely aggressive.

Mr Lawrence Summers, one of the US Treasury Undersecretary, said yesterday that

the recent rapid rise of the yen was causing concern because exchange rate volatility by itself could hamper world

This remark was seen by one analyst as an important new indication that the US does not want to see any further rise in the currency.
However, other analysts said

that the Fed's intervention may mask deeper intent. Mr Steve Hannah, head of research at IBJ International in London, said that the Fed

cerned by the inflationary consequences of a weak dollar. Alternatively, a deal may have been done behind the scenes by which the Japanese will give the US greater access to its markets in return for

may have started to get con-

винтенсу виррогі. The results of Thursday's cabmet meeting undicate that Japan may be about to give way to US demands on a number of issues, "A fiscal stimulation package is quite likely this autumn and so is a cut in the discount rate." said one ana-

European trading was domi-nated by another sharp rise in the value of the franc, which rose more than 2 centimes on the day to close at FFr3.495 against the D-Mark. Another cut in the Bank

against the D-Mark. Another cut in the Bank of France's overnight lending rate, this time by ½ a percentage point, may have been one cause for the franc's rise. But several bank dealers spoke of US hedge funds buying back the franc in recent days in an attempt to square their positions in the wake of recent speculation. One analyst spoke of having seen "reasonably-sized" flows from US hedge funds yesterday. Other currencies also profited on a day of D-Mark weakness. What is the FT getting up to this Weekend?

Much the same as you, no doubt.

Russia's women are worried. They believe that the collapse of communism may have marked a step forward for democracy - but a step backward for them. The reason for their fear is that throughout post - communist Europe, women are in danger of losing one of the fundamental rights they were guaranteed under communism: the right to a safe, legal abortion. This is especially true in Russia, where the abortion debate is mixed in the nationalists' apocalyptic talk of the declining birth rate as a threat to Russia's survival. Lori Cidylo reports from Moscow.

Also this Weekend: all our regular features, including Finance & The Family; fashion and How To Spend It; travel, property, the arts, books and sport.

MONEY MARKETS

Overnight cut again

THERE were signs of a small recent bike to 10 per cent - softening in European interest and that it could soon be rates yesterday with France. Portugal and Finiand all easing monetary poncy. writes James Blitz.

At the start of the day, the Bank of France cut its over-night rate of lending for the second time this week, reducing it from 8.75 per cent to 8.25 per cent. The franc has performed

quite strongly inside the reformed exchange rate mechanism in recent days allowing the French authorities to take monetary policy without loan of endangering the currency

6 per cent from January 26, 1993

The news led to a rise in French franc interest rate futures. The September franc contract rose 8 basis points to close at 93.16. while the December contract was up 7 to close at 94.28 Three month French francs dropped simply to about 7.07 per cent on the bid side at the close of trading

from an earlier 8.00 per cent. One dealer suggested inat one more cut in the overnight rate, to 7 to per cent. would be enough to trigger moves in the more internationally sensitive official rates. He recalled that the 5-10 day lending rate was at 7.75 per cent before the

lonered to that level again, in Germany the figures for MS money supply growth for July had little impact on the market coming in below expectations at 7.5 per cent from 7.0 per cent in June.

Dealers expected that the August figure, which would comprise heavy intervention to support the franc, would come in a good deal higher. But December Euromark futures were down only 4 basis points Tradecials to tices at 30 35. Sterling fatures continued to fall on the back of

Wednesday's comments from a UK government minister that another interest rate cut should not be auticipated. The September short stering contract dropped 1 basis point to close at 94 15.

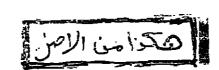

Lower expectations of a rate cut were also reflected in the cash yield curve. Although 3 month money was unchanged at 5% per cent, both 6 month and 1 year cash rate were sughtly nigher, with the latter closing at 5 i per cent from a previous close of 5% per cent. In the distinct morket, there was a large shortege of El.45on, which was difficult to remove. There was late assistance of £550m and the overnight rate peaked at 7.50

leave impetus lacking

Wall Street

US STOCK markets struggled to build on Wednesday's record-breaking gains as unex pectedly bad trade figures and profit-taking left prices mixed across the board writes Patrick Harverson in New York.

At I pm, the Dow Jones Industrial Average was down 0.56 at 3,604.30. The more broadly based Standard & Poor's 500 was 0.1 firmer at 456.05, while the Amex composite was up 1.62 at 448.25, and the Nasdaq composite down 2.51 at 732.29. Trading volume on the NYSE was 176m shares by 1 pm.

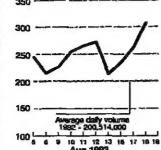

Trading was more subdued at the opening after the previous day's active session. Profit-

SAO PAULO was 6 per cent higher at midsession in reac-tion to a rerating of Telebras and congress approval of Preson salaries, which may help to control inflation in Brazil. The Bovespa index gained 4,681.17 at 84,215.23 in turnover of some Cr8.6bn.

taking led to early declines as the markets digested midweek gains, but sentiment remained

The latest economic news, however, was not helpful. The widening in the June trade deficit from \$8.4bn to \$12.1bn the largest shortfall since October 1987 - was worrying, because the increase in the def-

NYSE volume

icit was primarily the result of a sharp fall in exports.

The decline in export sales led analysts to warn that the second quarter gross domestic product figures would probably have to be revised downward. Stocks probably would have fallen further but for the continued strength in bond prices

The benchmark 30-year bond rose another quarter of a point yesterday morning, pushing the yield down to 6.234 per cent, the lowest point in the issue's 16-year history.

Leading pharmaceutical and consumer stocks were in demand for a second consecutive day. Merck rose \$1/4 to \$33%, Schering-Plough added \$14 at \$6314, Johnson & Johnson put on \$1/4 at \$401/4 and Bristol-Myers Squibb firmed \$% to

Among consumer stocks, Philip Morris added \$1/4 at 278 with 298 unchanged.

and Pepsico rose \$% to \$39%. Motor and airline stocks. which ran into selling earlier this week, rebounded. General Motors climbed \$1% to \$45%, Ford added \$% at \$50%, and Chrysler rose \$% to \$42%. UAL

firmed \$11/2 to \$146, Delta added

\$% at \$52% and AMR, parent of

American Airlines, put on \$%

AT&T, which announced the \$12bn acquisition of McCaw Cellular at the start of the week, was hit hard by profit-taking, falling \$2 to \$57% in volume of 3m shares. McCaw, traded on the Nasdaq market, also suffered, falling \$1% to

General Electric eased \$1/4 to \$97 in busy trading on reports that the company will cut 4,000 workers from its Ohio jet division as part of an overall plan for workforce reduction.

EUROPEAN concerns with the Middle East and gold cut little ice in Toronto where the gold and silver index opened a shade higher at 9,279, but then subsided by around 100 points by midses

The TSE 300 composite index was up 1.36 at 4,070.67 at noon, gold losses balanced by gains in the oil and gas, and industrial products sectors.

Volume had fallen by that stage from 31.9m shares to 24.4m in turnover of C\$287m. Declines led advances by 290 to

New fistful of 1993 highs around the Pacific Rim

Tokyo

INVESTORS were discouraged by a lack of concrete measures. to support Japan's economy at the first meeting of the new government's economic affairs ministers, writes Emiko Terazono in Tokyo.

The Nikkei average lost a further 85.71 to 20.687.47, having moved between 20,603.56 and 20,903.09. Foreign investors continued to be leading buyers, but the index faltered on sell-Volume declined to 250m shares from 288m. Falls out-

numbered rises by 716 to 243. with 184 issues unchanged. The Topix index of all first section stocks slipped 11.10 to 1,664.76, but in London the ISE/ Nikkei 50 index edged up 1.10

to 1,271.60. The ministers agreed on an economic package which would pass the benefits of a higher ven to consumers, and on deregulation of industries and the distribution system by the end of next month. Inves-

tors felt left out. However, in spite of official denials of the possibility of an official discount rate cut, traders said speculation on monetary easing was still strong. Mr Robert Feidman, an economist at Salomon Brothers, said the BOJ was likely to make a cut of 50 basis points by the end of September. But he added that the cut was already discounted in share prices and it would take 75 to 100 basis points to

make a large impact. At corporate level, Cosmo

NATIONAL AND REGIONAL MARKETS

ker which will be bailed out by Daiwa Bank, ended at Y496, down from Friday's close of Y649. Ricoh the most active issue of the day, forged ahead Y28 to Y799 on the company's development of technology to

make paper-recycling copiers. NEC retreated Y22 to Y988, falling below the Y1.000 level for the first time since August 9. The stock had risen on hopes that the government would pump in funds to improve the country's telecomyesterday's lack of discussion

was a disappointment. In Osaka, the OSE average shed 117.54 to 22.555.83 in volume of 131.9m shares, the highest since March 10.

Roundup

THE REGION produced another fistful of record highs, although London reactions to the Hang Seng Bank results in Hong Kong took some of the

edge off the day. NEW ZEALAND, which has the unusual distinction of trading 48 per cent below its all-time peak set in 1987, made up more ground as the NZSE-40 capital index advanced 61.94, or 3.2 per cent,

Turnover was described as "absolutely extraordinary" as it rocketed to NZ\$142m from Wednesday's estimated and extremely heavy NZ\$90m. Carter Holt Harvey and Fletcher Challenge led the way, climbing 20 cents to NZ\$3.39 and another 36 cents

WEDNESDAY AUGUST 18 1993

prising results on Wednesday. which triggered a rerating of both forestry stocks

AUSTRALIA broke through the 1,900 barrier as buyers snapped up industrial issues. the All Ordinaries index closing 31.6 higher at another post-1967 crash peak of 1,926.3. Turnover was heavy at

A\$630.9m. Brokers said Wall Street's record high and improving bullion prices also provided momentum, the golds index rising 61.6 to 2.218.0. jumped 42 cents to A\$15.28. KUALA LUMPUR achieved

another high after a late surge in several blue chips, including Tenaga Nasional and Telekom Malaysia. The KLSE composite index ended 7.80 stronger at 798.82 as volume rose from 312.5m to 413.1m shares.

Malayan Banking firmed 50 cents to 15.60 ringgit after its impressive annual results. Tenaga and Telekom rose 20 cents each to M\$11 and M\$16.10.

SEOUL finally wiped out the remaining losses following last week's ban on trading under false or borrowed names, the composite index rising 24.79 to 737.97 in turnover of Won60bn. BOMBAY's BSE 30-share index moved ahead a further

85.35 to 2,700.55 in trade restricted to one hour to enable delivery of cash shares. SINGAPORE tried to extend its record-breaking run but profit-taking came in after an intraday all-time high of 1,963.85, and the Straits Times

Industrial index ended a net

Dow struggles as data Bourses more pensive after recent gains

yesterday after an early attempt at flying higher, writes

They had cause. News of US warplanes bombing northern Iraq sent bullion prices higher, and German M3 grew by 7.5 per cent in July after 7 per cent in June. Some investors were also worried that laggard stocks and sectors had been prominent in recent gains. indicating that a correction might be around the corner. However, strategists seemed

clined to stay on board. Mr Marcus Grubb, at Salomon Brothers in London, said that on average, most European bourses were trading on yield ratios (bond yields to dividend yields) which are cheap by a factor of 15 to 40 per cent comnared with ten year averages The cheapest markets, he said,

were Italy, Spain and France.
FRANKFURT inched to another 1993 closing high, the DAX index rising 3.26 to 1,938.98 after an intraday 1946.39. The M3 figures, coming after hours, seemed mostly built into brokers' calculations; the Ibis indicated DAX eased

only 1.14 to 1.937.84 in the post-

Turnover eased from DM10.4bn to DM10.2bn. Englneers, steels and carmakers, in the van of this year's gains, mostly showed falls although BMW, an underperformer for much of this year, rose DM5 to DM574. Utilities, also underperformers, rose too, RWE by DM6.30 to DM426.50 and Viag

by DM8 to DM458.50.

Schering, which has changed categories this month, rose another DM36 to DM997 on prospects for its Betaseron drug, up by DM167, or 20 per cent this month against a 7.5 per cent DAX index gain. PARIS fell back by 1 per cent

as investors ignored a further slight easing in the 24 hour lending rate. The CAC-40 index, however, managed a last minute improvement from the day's low of 2,131 to end down 21.55 at 2,139.20. Turnover was some

FFr3.8bn. Alcatel Alsthom remained at the top of the most actives even although the South Korean authorities delayed further an announcement on the award of the railway contract. The shares added FFr9 to FFr734 in heavy

Lafarge Coppee slipped FFr17.20 to FFr439 in reaction, analysts said, to a media report that it may bid for a Belgian cement group. The company denied the story later.

AMSTERDAM encountered some profit-taking although Elsevier showed a 4 per cent gain, the shares rising F15.60 to F1 144.00, a new year's high, on reports that it may acquire the Official Airline Guides of the US, formerly owned by

Maxwell Communications. The CBS Tendency index fell 0.3 to 128.5. The strength in Elsevier helped other sector stocks with VNU up Fl 1.80 to F1140.80, another year's high, and Wolters Kluwer gaining

tane value 1003 (28/10/00) Highling: 100 - 12/1/97, 205 - 1386.17 Lunddig: 105 - 1202.90 205 - 1986.61. ZURICH ended mixed and quiet, the SMI index easing 6.0 to 2,481.2. In cyclicals, Brown yesterday's first-half results from ABB Asea Brown Boveri were marginally above with expectations, said Mr Frederick Hasslauer at Swiss Volksbank, but BBC bearers fell SFr18 to

MILAN saw profit-taking in spite of a good run in telecommunications. The Comit index lost 1.38 to 617.60.

Interest was shown in Sip on reports that its cellular telephone operation might be sold by next spring. Its shares gained L52 to L3,579, as Stet advanced L76 to L4.476.

MADRID stayed bullish, if more restrained with the gen-

mixed across the board. Tele-fonica standing out with a gain of Pta55 to Pta1,615 after the AT&T bid for McCaw Cellular in the US. LISBON climbed to a new 1993 high, its index rising 0.9 per cent to 1,109.01 as foreign investors bought blue chip stocks.

COPENHAGEN'S KFX index continued to pull ahead, gaining 2.74 to a new 1993 high of Den Danske bank rising DKr17 to DKr392 on satisfaction with

its half year results.
STOCKHOLM fell back, the Affärsvärlden general index losing 12.9 to 1,326 in heavy turnover of SKr29bn. Reaction to Ericsson's half year results saw the B recover from an intraday low of SKr367 to

SKr376, off SKrL OSLO lost 2.2 per cent on profit-taking, leaving the com-posite index down 12.85 at 573.52 in turnover of NKr731m. ISTANBUL gained 4.5 per cent as investors returned to equities after a further fall in interest rates. The composite index put on 466.8 to 10,915 in

China worries fail to halt Hong Kong's rise

Simon Davies discusses the issues which have helped drive the equity market higher

ong Kong equities are enjoying an amount sive performance this enjoying an impresmonth. The Hang Seng index registered its fifth consecutive record high yesterday on expectation of strong corporate results from the major index

The index closed yesterday at 7,605.26, up 38 per cent so far expect it to break through the 8,000 barrier by the year-end. After hours in London, the index gained a further 21 points.

While confidence took a slight blow yesterday, as Hang Seng Bank, a subsidiary of HSBC, announced disappointing results and warned of difficult economic conditions during the next 12 months. brokers do not expect this to have a negative effect on sentiment. Hang Seng Bank lost 50 cents to HK\$61.

Gone are the worries over the impact of the Chinese austerity measures announced early last month, and concern regarding the continuing Angio-Chinese stand-off over Chris Patten, the governor of Hong Kong, and back is a flood of international money eager to find reasonably valued stock markets which have expectations of high corporate earn-

ings growth. Over the next four months. think the index will reach 8,200," says Mr Adrian Faure, research director at Baring Securities. "It got to 7,500 because of strong corporate earnings, which will underpin this market. It will hit 8,200 on announcements on the airport project, the container terminal scheme and political agree-

Investors have reassured themselves that the direct

SOUTH AFRICA EQUITIES were generally

stronger, with the exception of De Beers, which shed 75 cents more to R87, still on Tuesday's results. The gold shares index added 42 at 1,799 and industrials 50 at 4,618, while the overall index rose 50 to 4,075.

DOLLAR INDEX

Chinese economy on listed companies' earnings will be minimal, since Chinese investments will account for below 3 per cent of current year earnings for constituent stocks of the Hang Seng index.
They are confident now that,

regardless of the performance of China's economy, the reform programme will continue unimpaired under the patronage of Mr Zhu Rongii, vice-premier in charge of the economy. Based on the forecasts of broker S.G. Warburg, the index is currently on a 1993 p/e ratio of

13.1. This remains the cheapest

in south-east Asia, compared

with 15.4 for Thailand's SET index and 19 for Singapore's Straits Times Industrial index In addition, although the pace of corporate earnings growth may be slowing, it

Hong Kong Heng Song

remains strong and economists expect between 16 and 17 per cent average earnings growth in 1993 and 1994, compared with 23 per cent in 1992. On the positive side, the Chi-

nese have given the go-shead for two key projects which are part of Hong Kong's HK\$165bn This has beightened expecta-

tions that China will approve financing for the airport. There remain a number of concerns to suggest that the equity market will retain its historical risk rating, leaving it as the cheapest in p/e terms of the Asian markets.

Rumours of the death of the Chinese patriarch. Mr Deng Xiaoping, have consistently shocked investors over the past five years. The rising profile of the pro-reformist Mr Zhu should dampen fears of a post-Deng political backlash; but the uncertainty resulting from Mr Deng's demise would strike a blow to confidence.

Hong Kong has also become more sensitive to capital movements from China. Baring Securities estimates that HK\$50bn in Chinese capital has flowed into the Hong Kong property market in the last 18

The austerity programme in China has focused on reining in speculative funds within the country; if this broadened into enforced repatriation of "spec-ulative" capital in Hong Kong, the impact would be devastating. However, such a move would be difficult to enforce. Finally, Mr Patten has stated that in his opening address to

the legislative council on October 6 he wants to give some indication of progress in the Sino-British negotiations on his political blue print for Hong Kong. An aggressive stance would undoubtedly pro voke anger from China and fear from Hong Kong.

FINANCIAL TIMES CONFERENCES

WORLD ELECTRICITY London - 16 & 17 November 1993

This annual meeting - the seventh in a series arranged jointly with Power in Europe will provide a high-level forum for utilities and their regulators, as well as suppliers of equipment and services to the power business, to discuss how the electricity industry is

Issues to be addressed include:

responding to a more competitive environment.

- * Third Party Access
- * Privatisation in emerging markets * Tariffs and pricing in the CIS
- * Fuel sources in a changing environment
- * The US experience of DSM

Speakers will include:

Mr Nicholas Argyris

Dr Rolf Bierhoff **RWE Energie AG**

Mr Gianfranco Castelli ENEL SpA

Mission Energy Limited Mr Robert J Saunders The World Bank

Mr J Michael Austell

Mr Tan Aixing Ministry of Electric Power, PRC

Mr Jaap R van Deventer

Eskom Dr Mary D Archer

Beicip Franlab

National Energy Foundation Mr Jean-Pierre Jonchère

Professor Jan Popczyk Polish Grid Company
